- Familiar stage colours

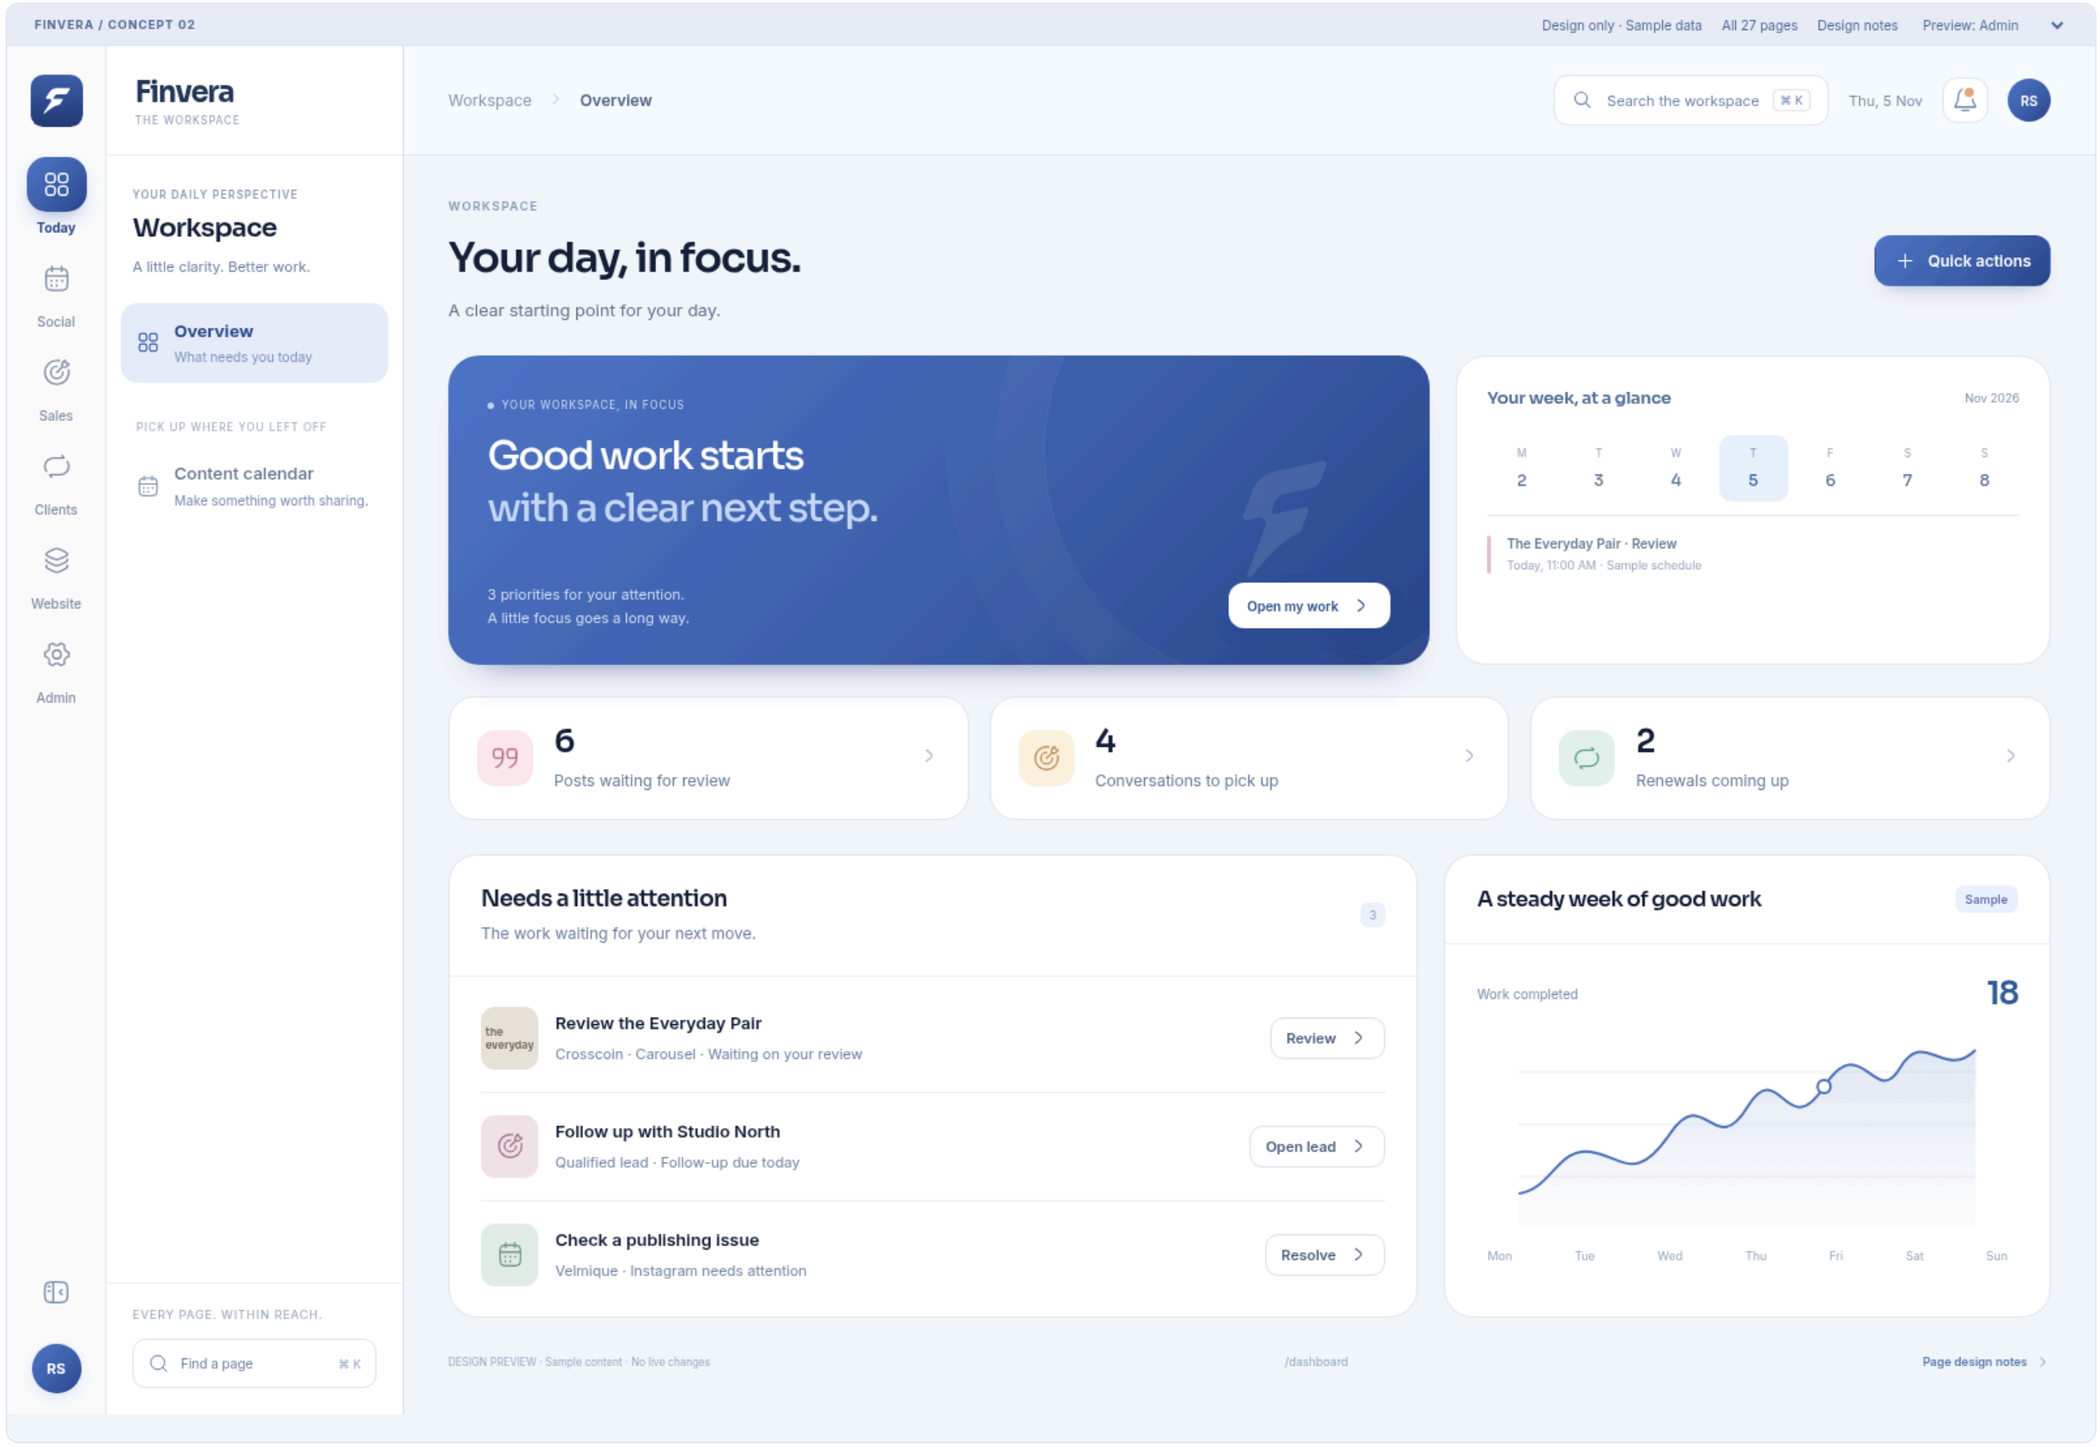

DESIGN REVIEW ONLY · 27 EXISTING ROUTES · NO APPLICATION CHANGES

Overview

Workspace · /dashboard

DESIGN ONLY · SAMPLE DATA

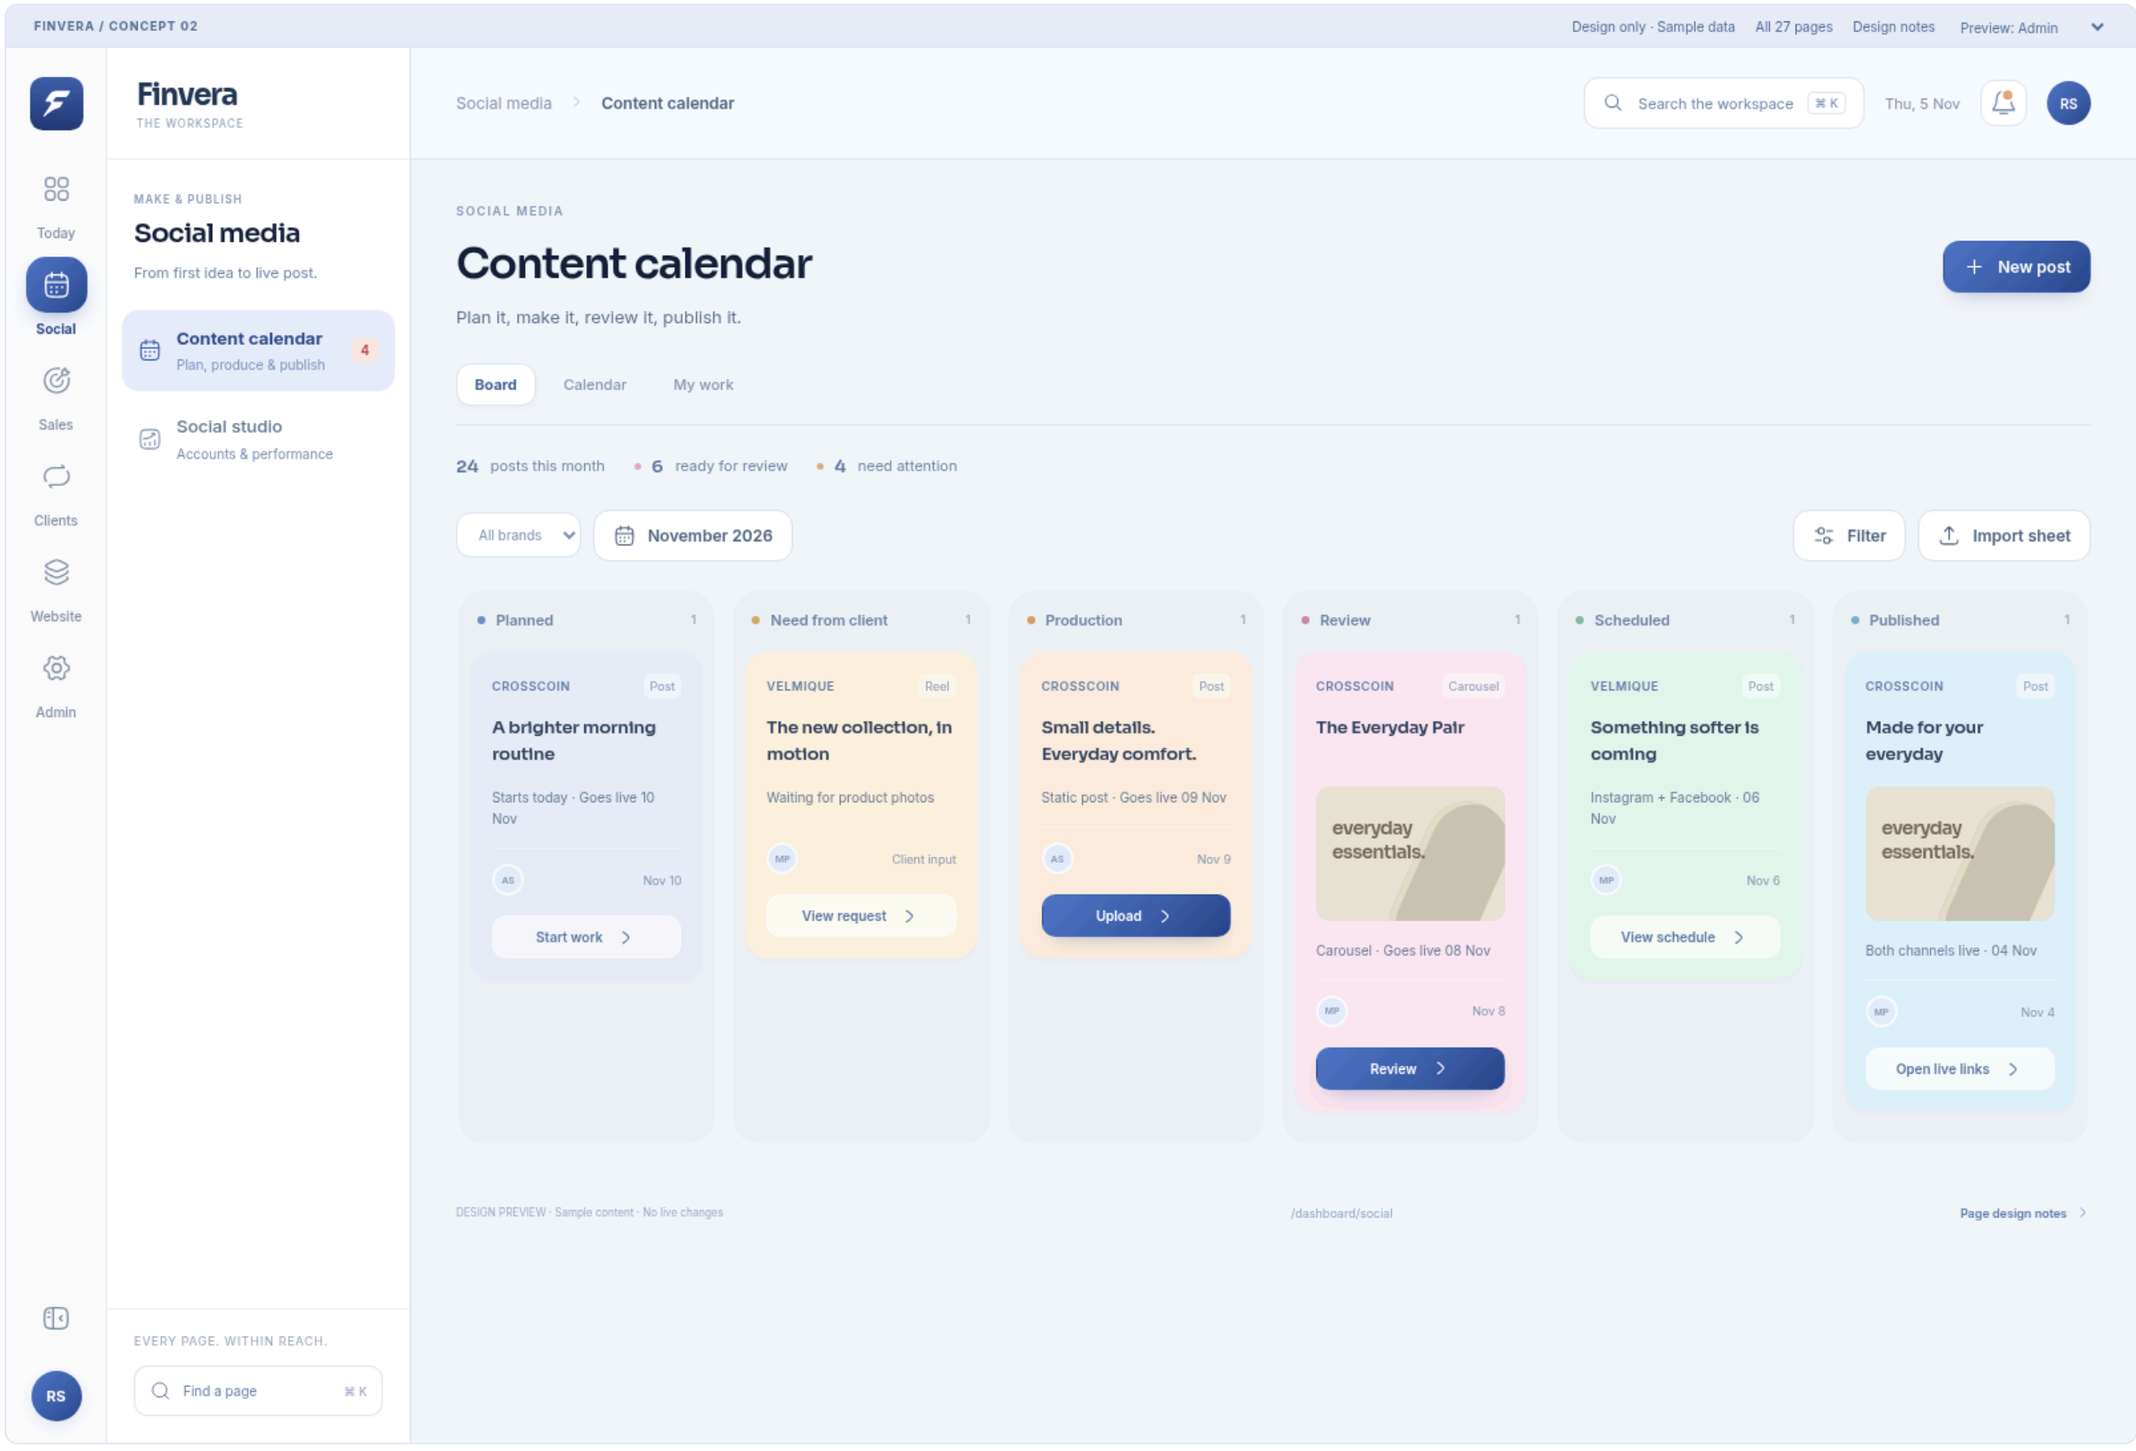

Role-aware home: personal tasks for makers, cross-team priorities for admins. · Urgent work first; business totals stay secondary. · My work remains a view of the existing home/calendar, not a new backend module.

Content calendar

Social media · /dashboard/social

DESIGN ONLY · SAMPLE DATA

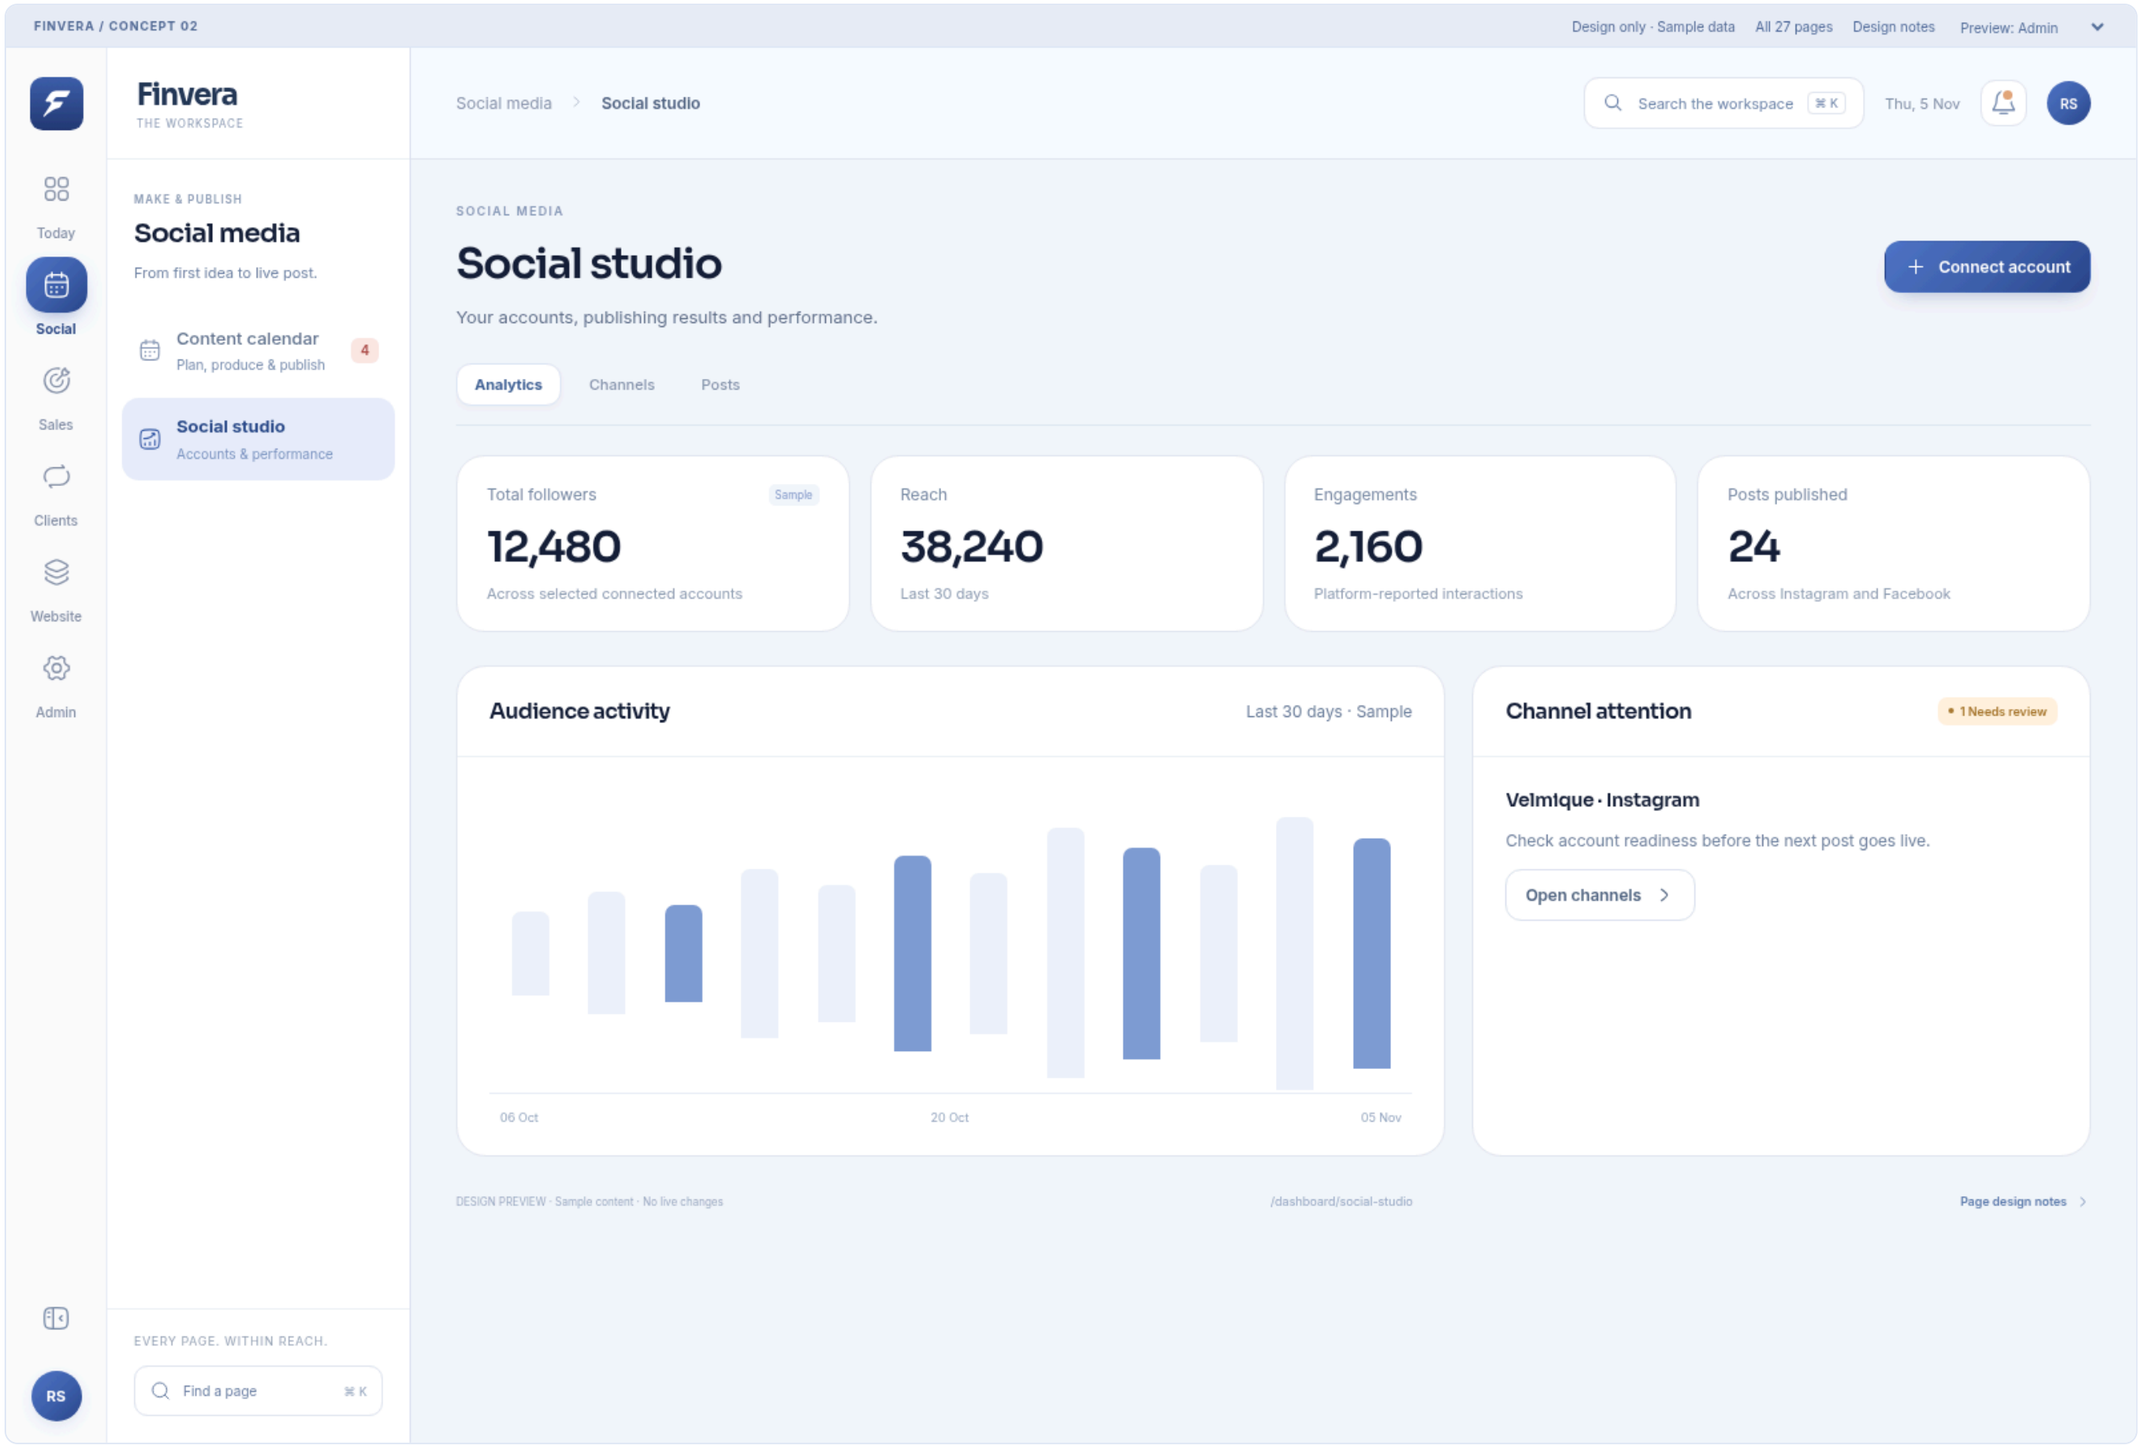

One primary action per stage; Upload stays media-only. · Client filter and view switch sit on one compact toolbar. · Publishing results remain separate for Instagram and Facebook.

Social studio

Social media · /dashboard/social-studio

DESIGN ONLY · SAMPLE DATA

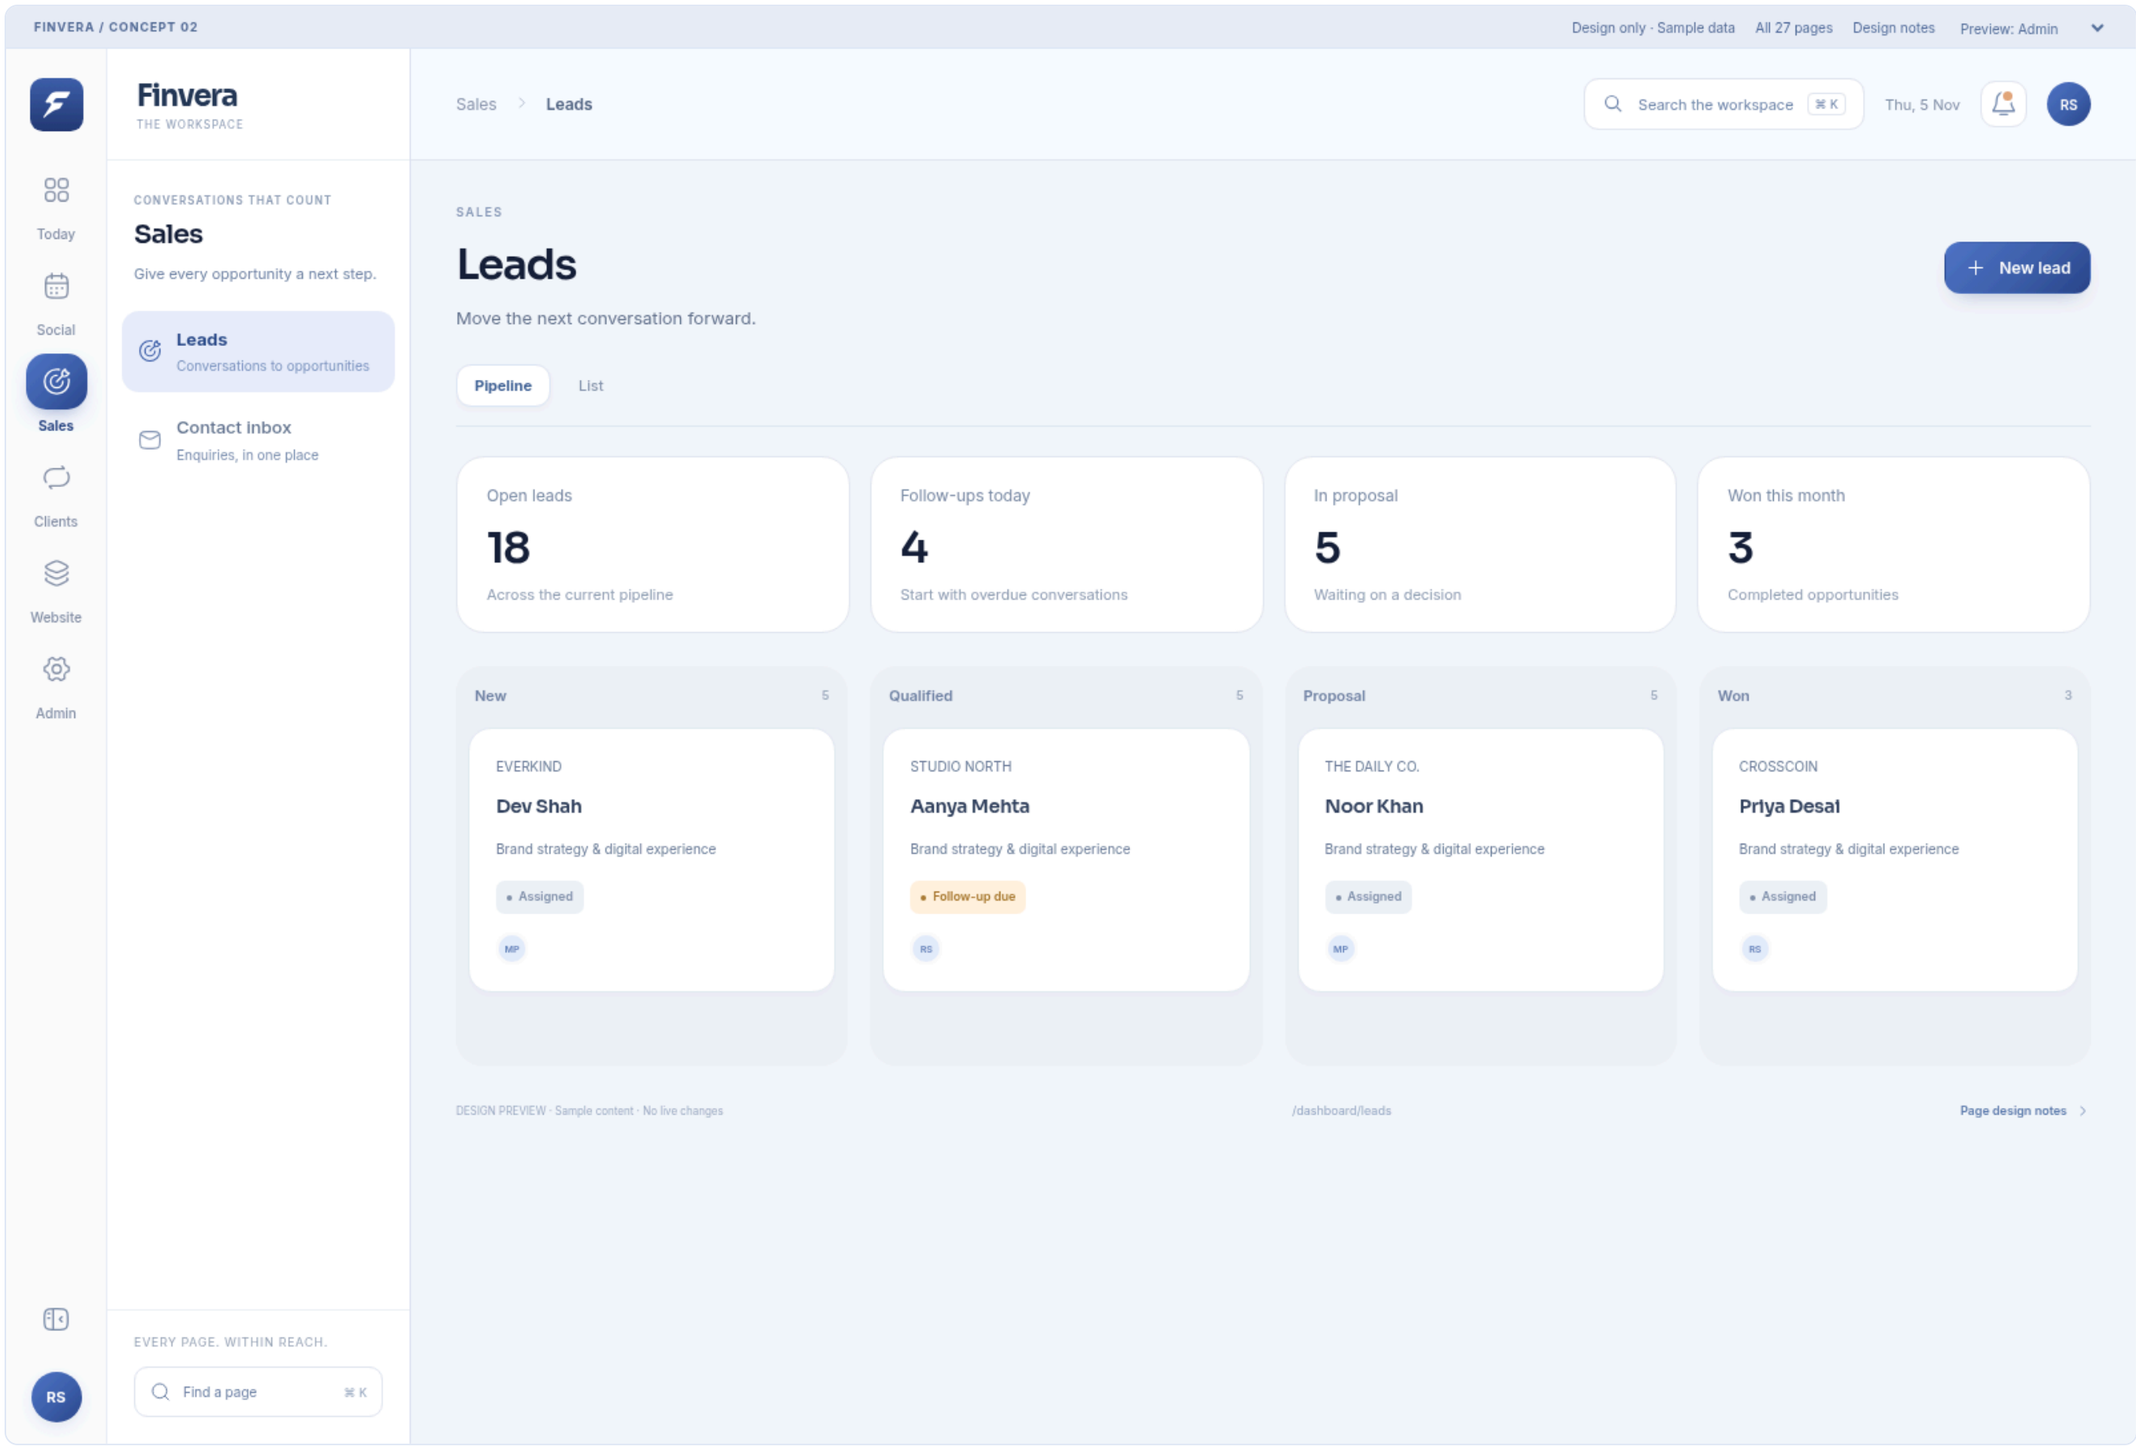

Keep Analytics, Channels and Posts within the current route. · Show the difference between connected, permission granted and tested. · Instagram profile changes open Instagram; supported Facebook fields can be edited.

Leads

Sales · /dashboard/leads

DESIGN ONLY · SAMPLE DATA

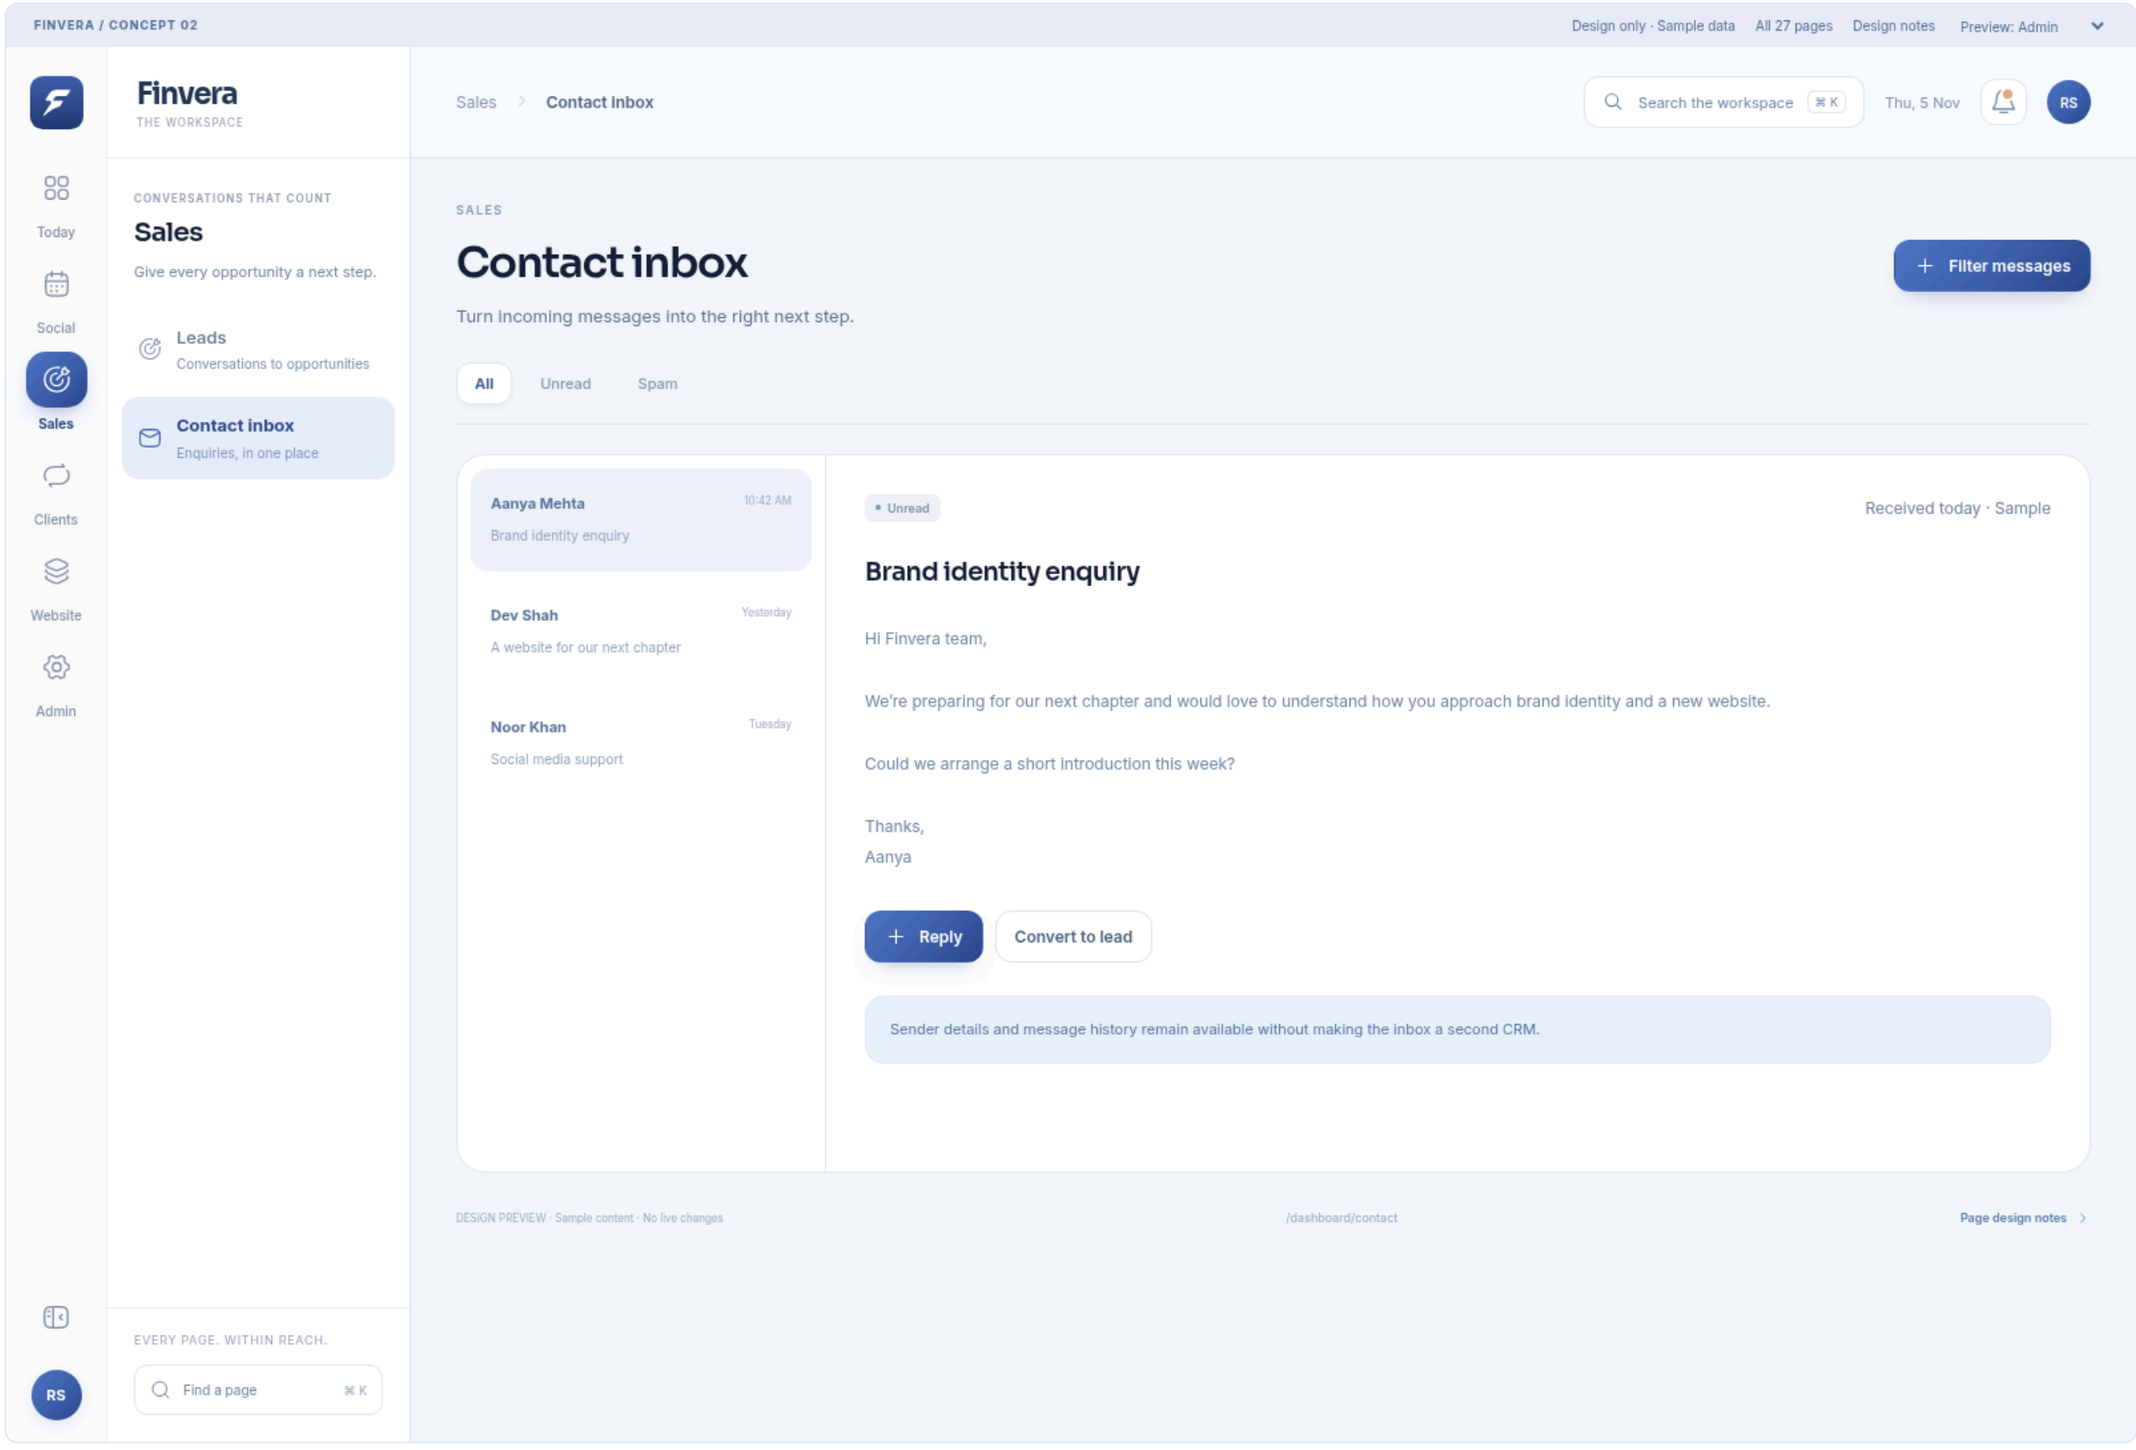

Follow-ups take visual priority over decorative totals. · Board/list switch; lead detail uses Summary, Notes and Activity tabs. · One next action per lead, with communication history alongside.

Contact inbox

Sales · /dashboard/contact

DESIGN ONLY · SAMPLE DATA

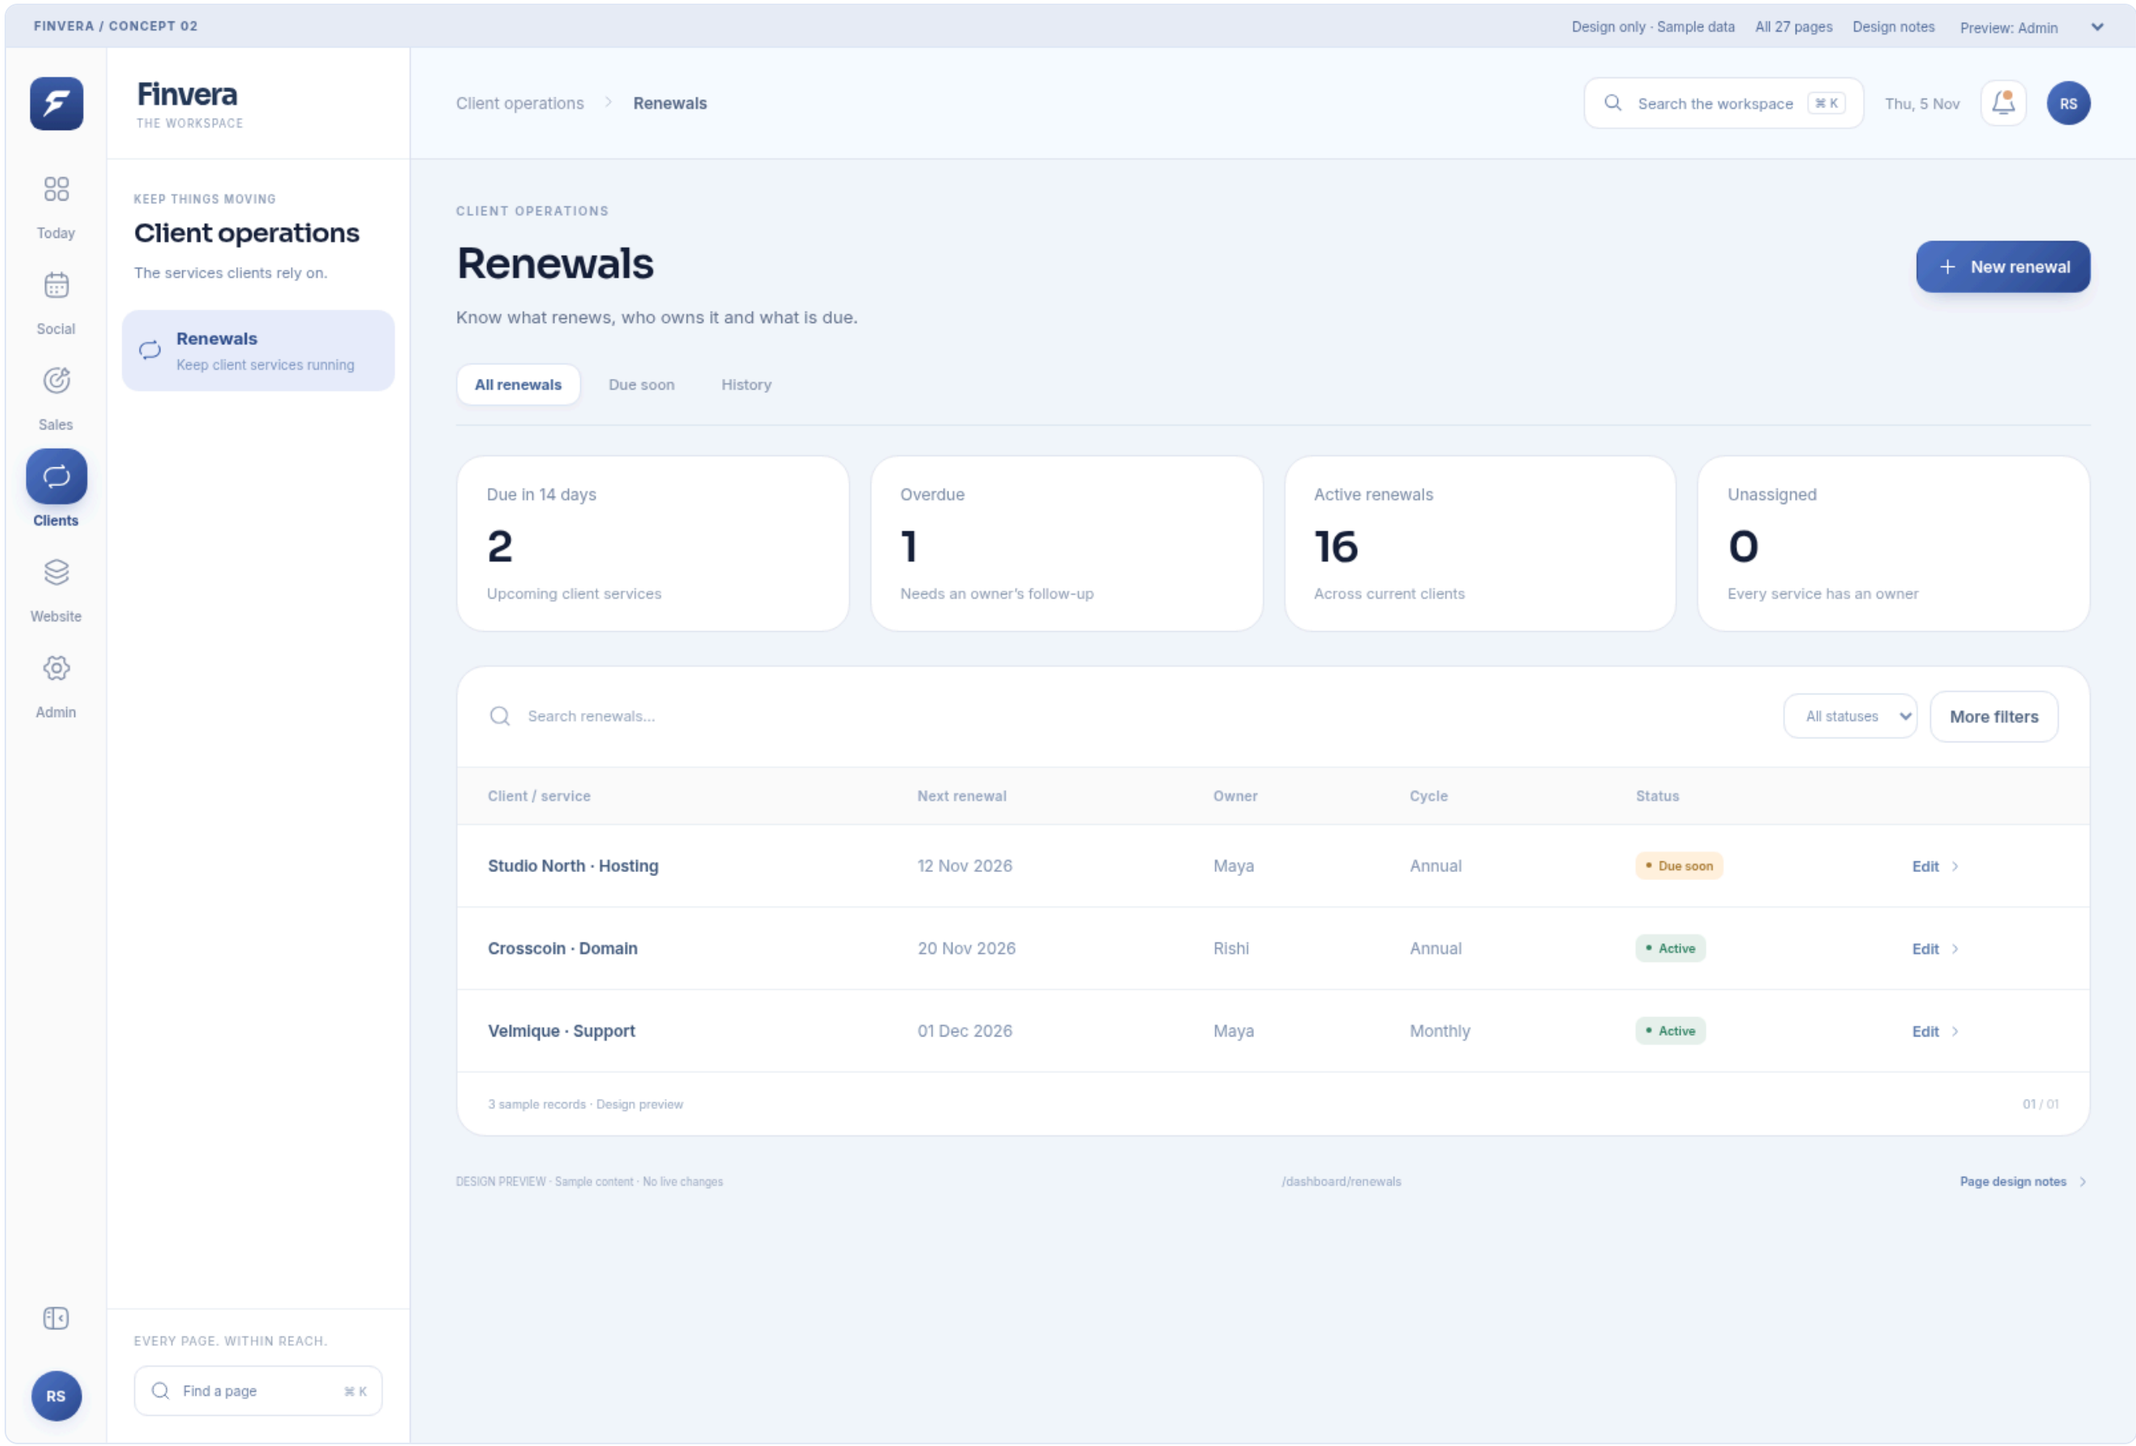

Three-pane inbox on desktop; stacked list/detail on mobile. · Reply and Convert to lead remain distinct actions. · Unread is a count; spam is a filter, not a competing main screen.

Renewals

Client operations · /dashboard/renewals

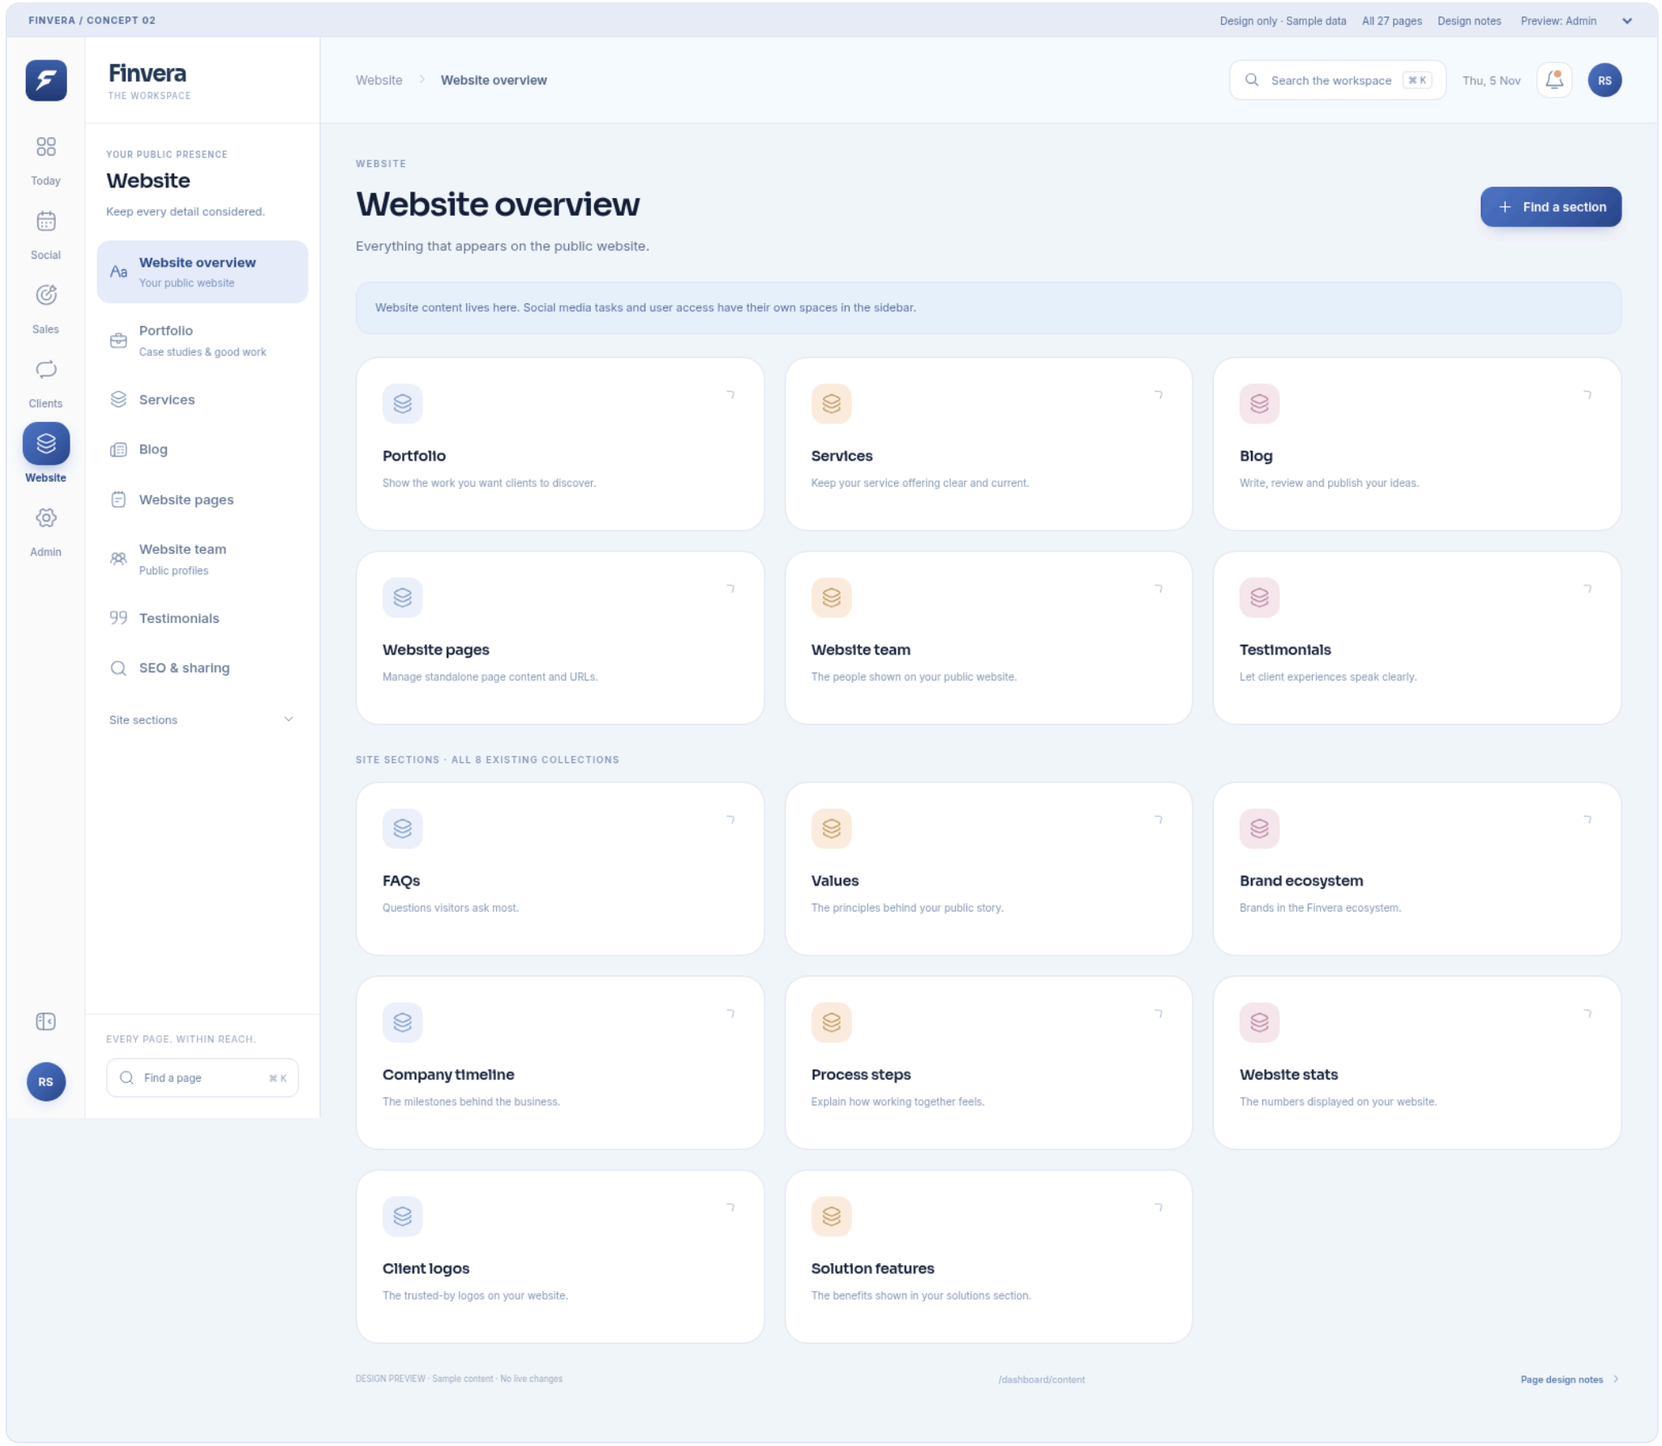

DESIGN ONLY · SAMPLE DATA

Rename the group from Projects to Client operations. · Due dates and owner come before secondary financial detail. · Renewal confirmation must retain the existing history.

Website overview

Website · /dashboard/content

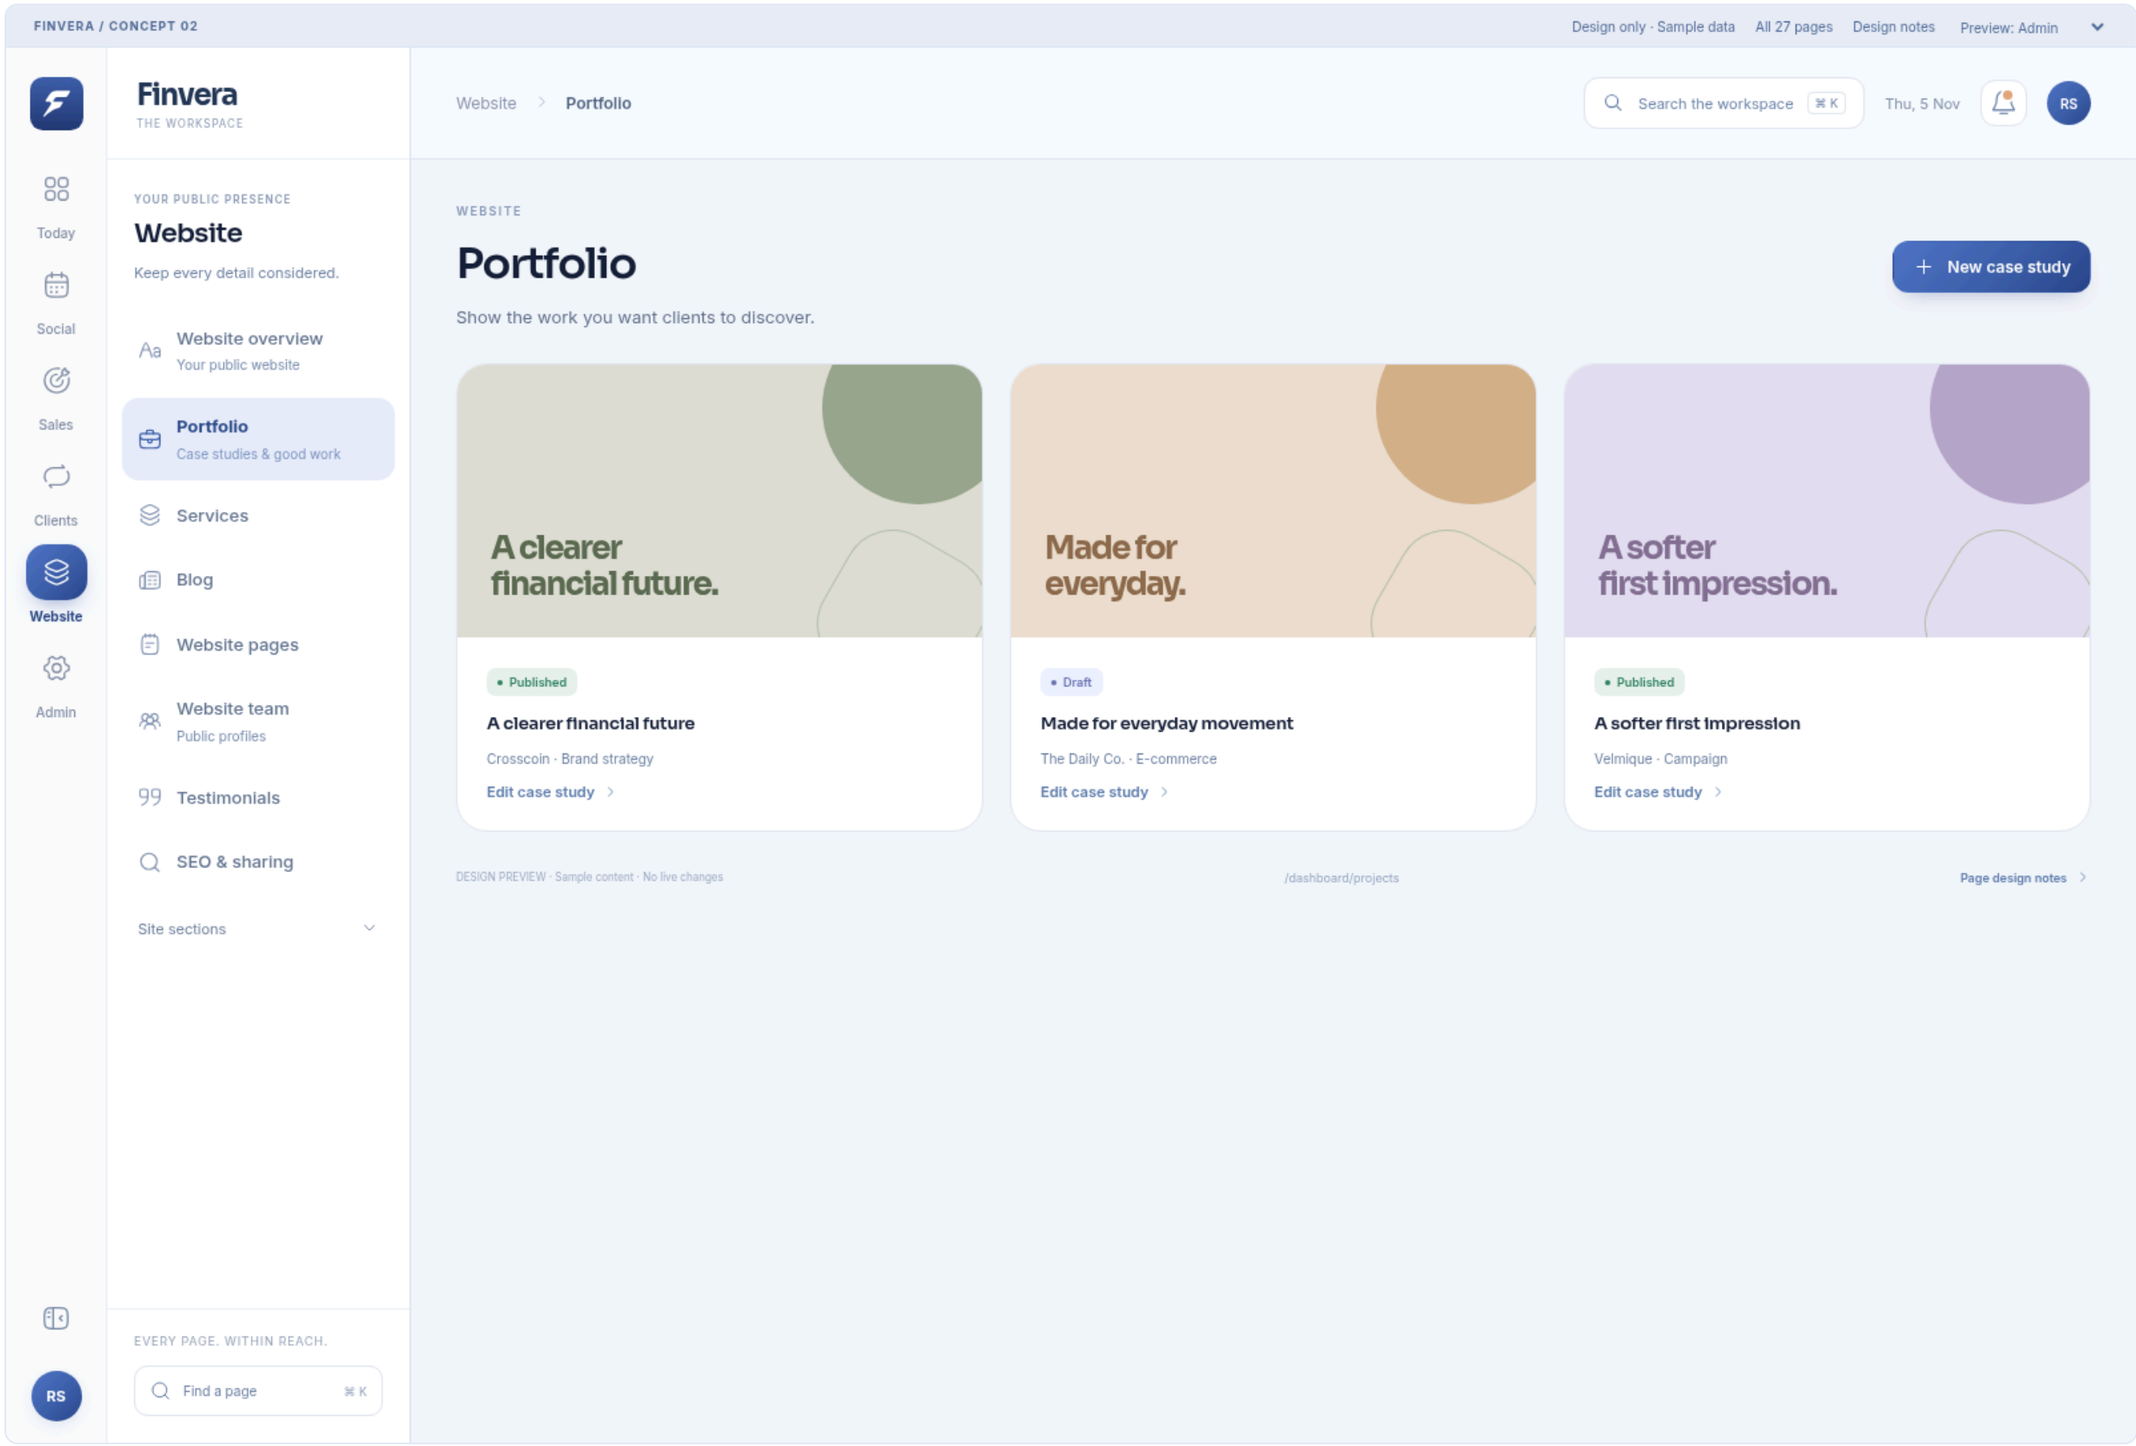

This is the existing Site content hub with a clearer role in navigation. · Expose all eight content collections through a nested Site sections group. · Portfolio projects are website case studies, not delivery tasks.

Portfolio

Website · /dashboard/projects

DESIGN ONLY · SAMPLE DATA

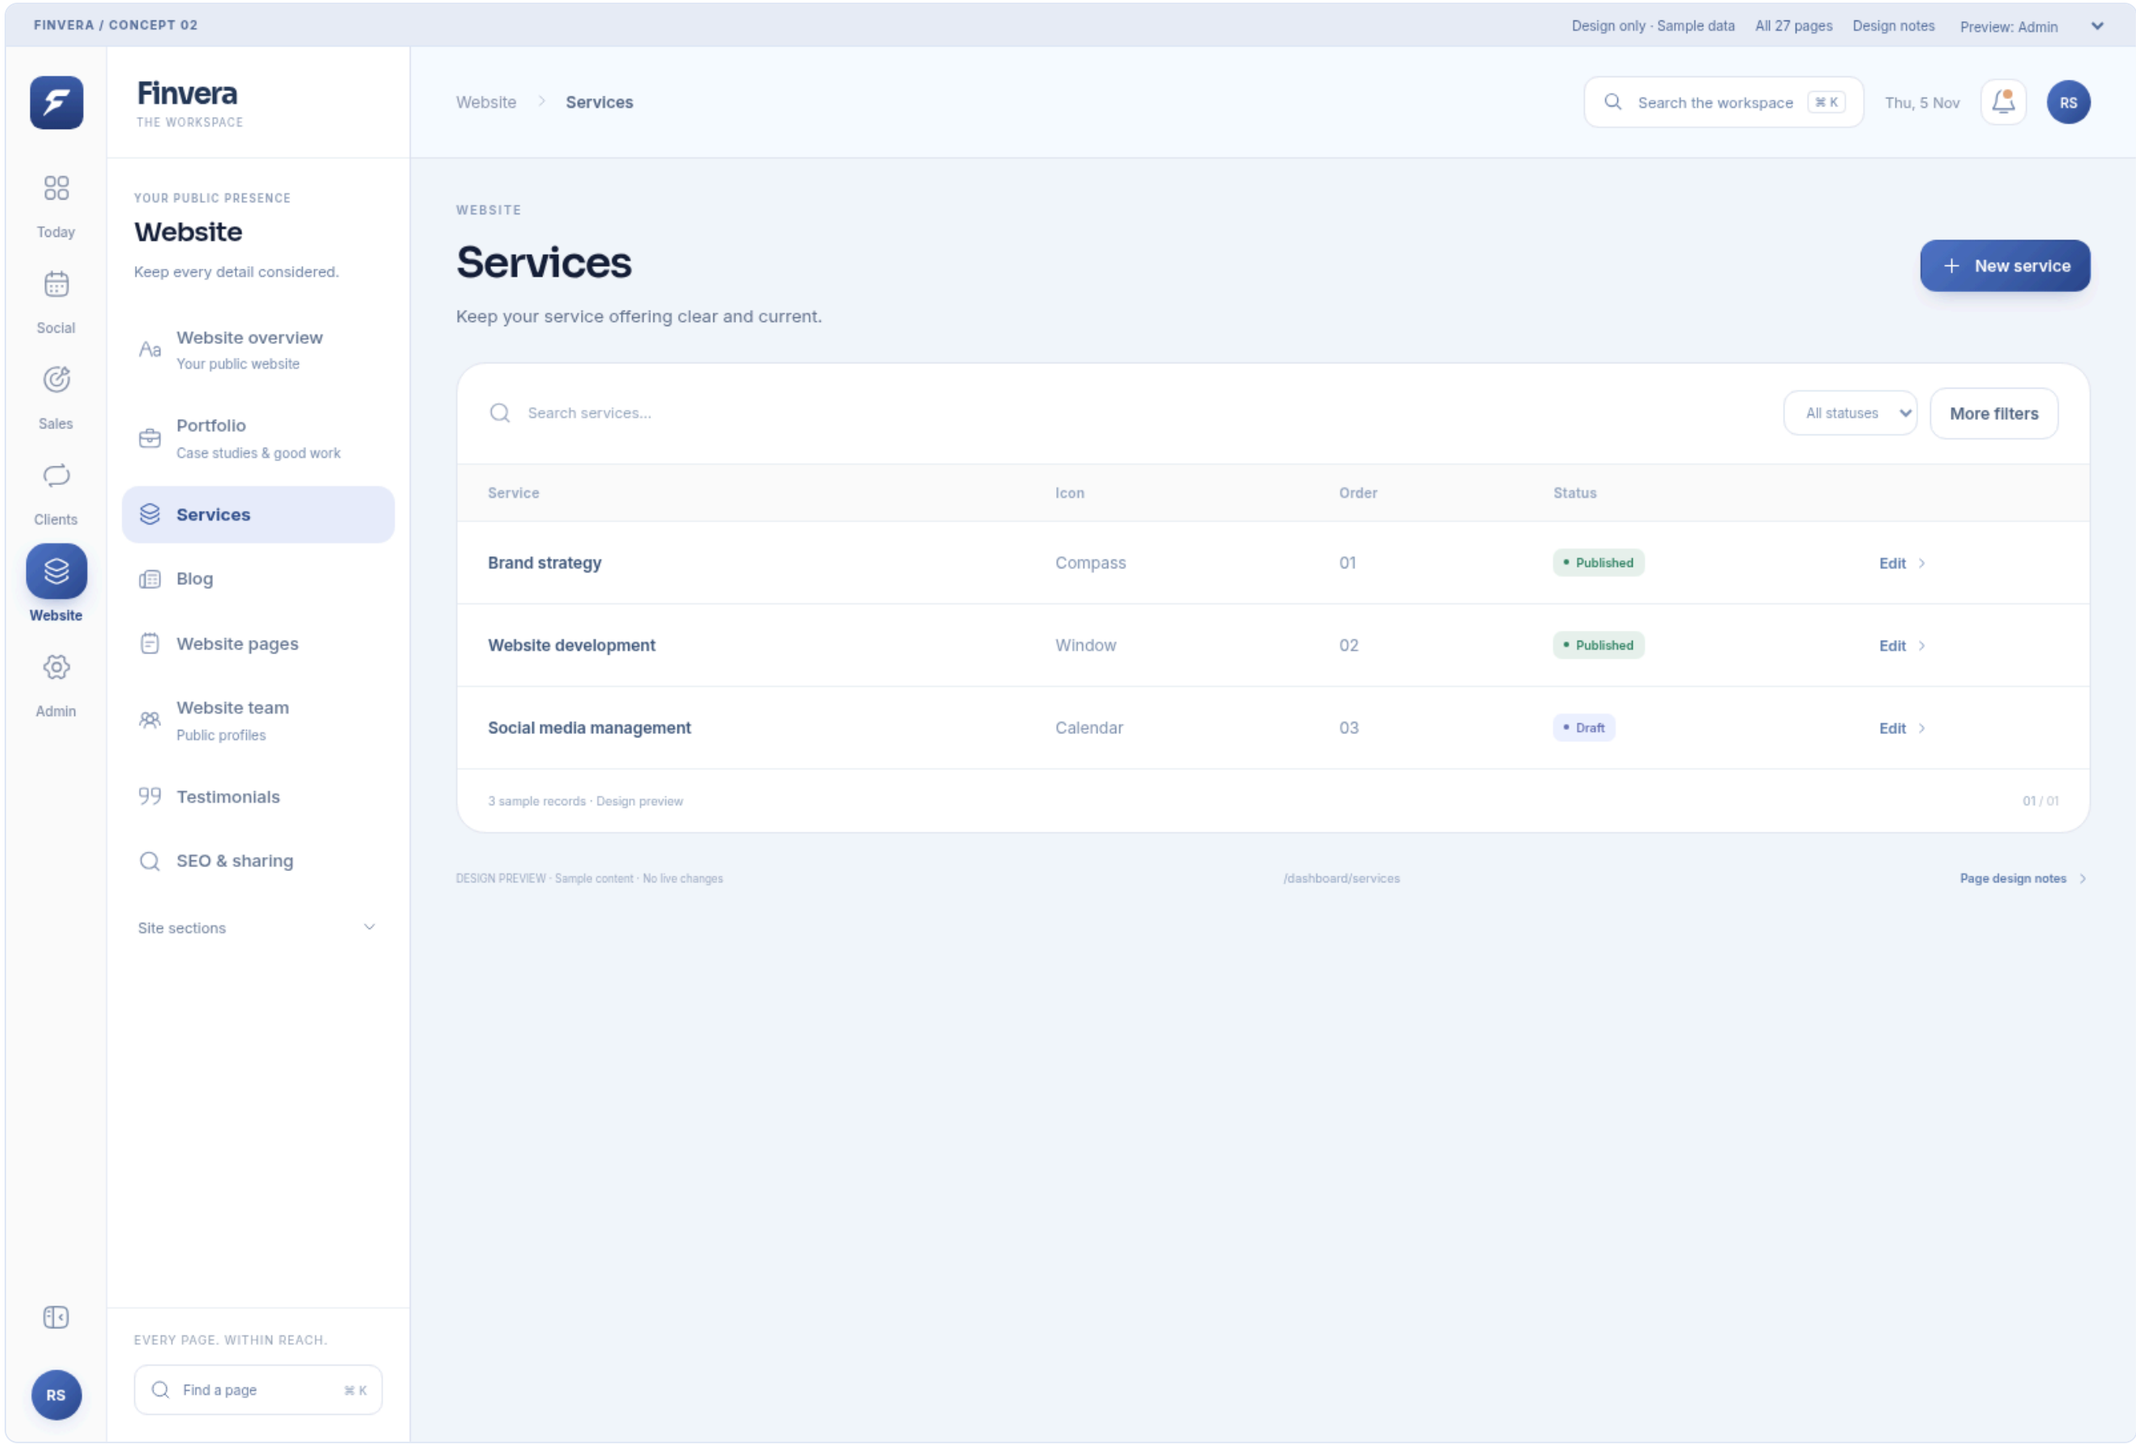

Rename Projects to Portfolio to remove operational ambiguity. · Use visual cards with status and a short case-study title. · Edit case-study content in a focused editor with live-site preview.

Services

Website · /dashboard/services

DESIGN ONLY · SAMPLE DATA

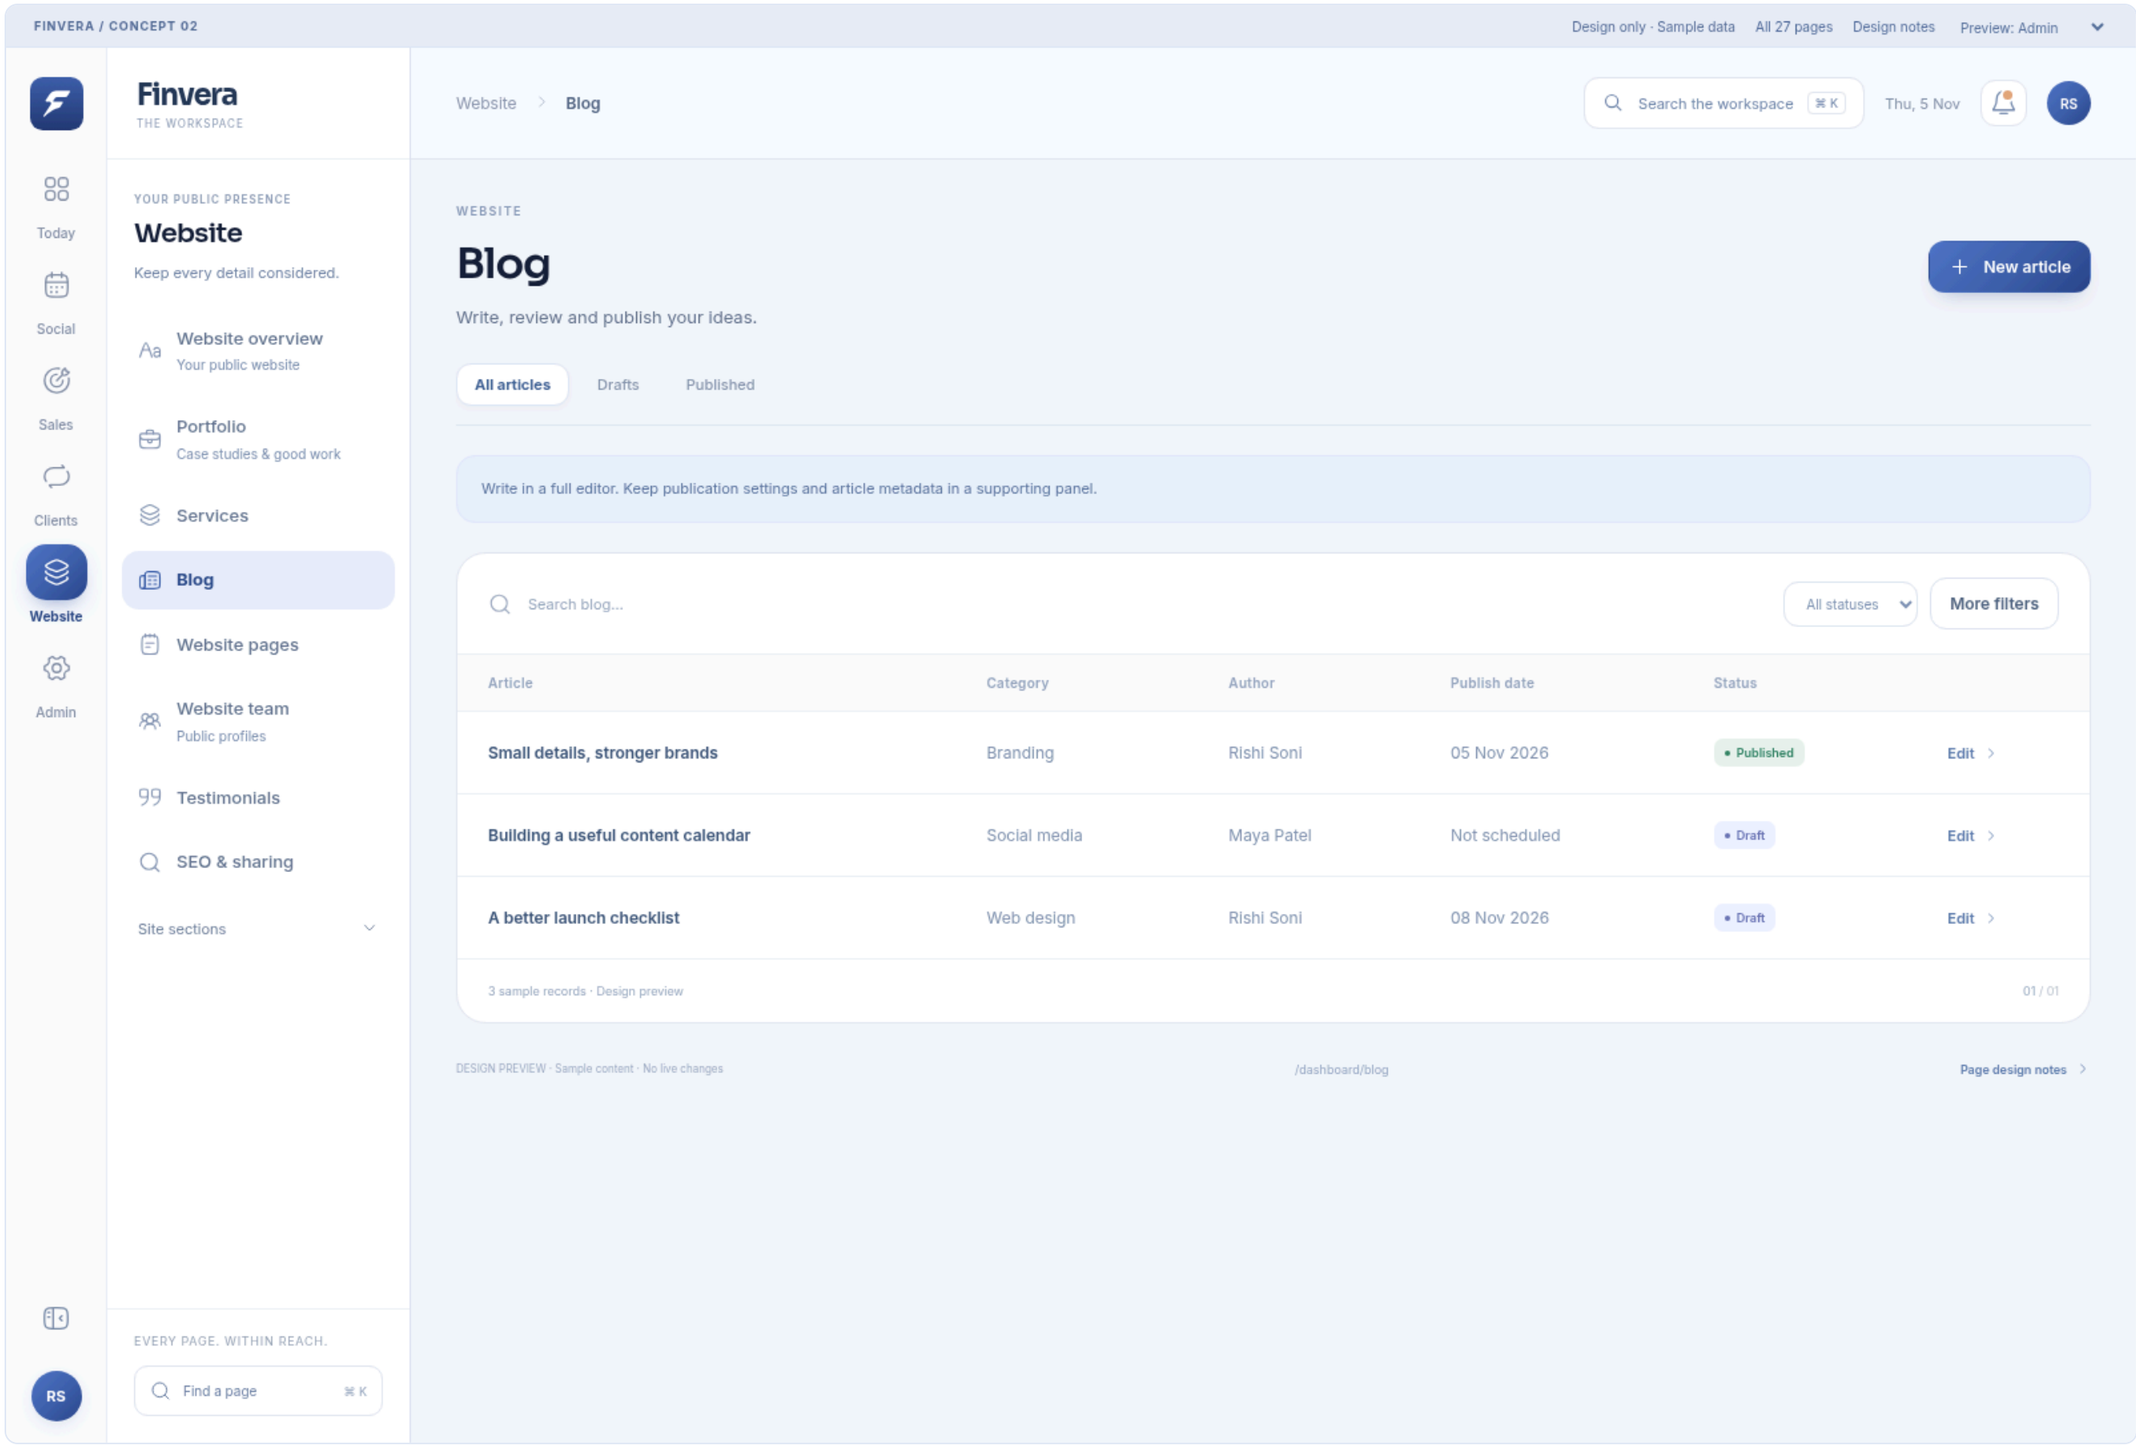

A compact ordered list is easier to maintain than large repeated cards. · Description belongs in the editor, not every table row.

Blog

Website · /dashboard/blog

DESIGN ONLY · SAMPLE DATA

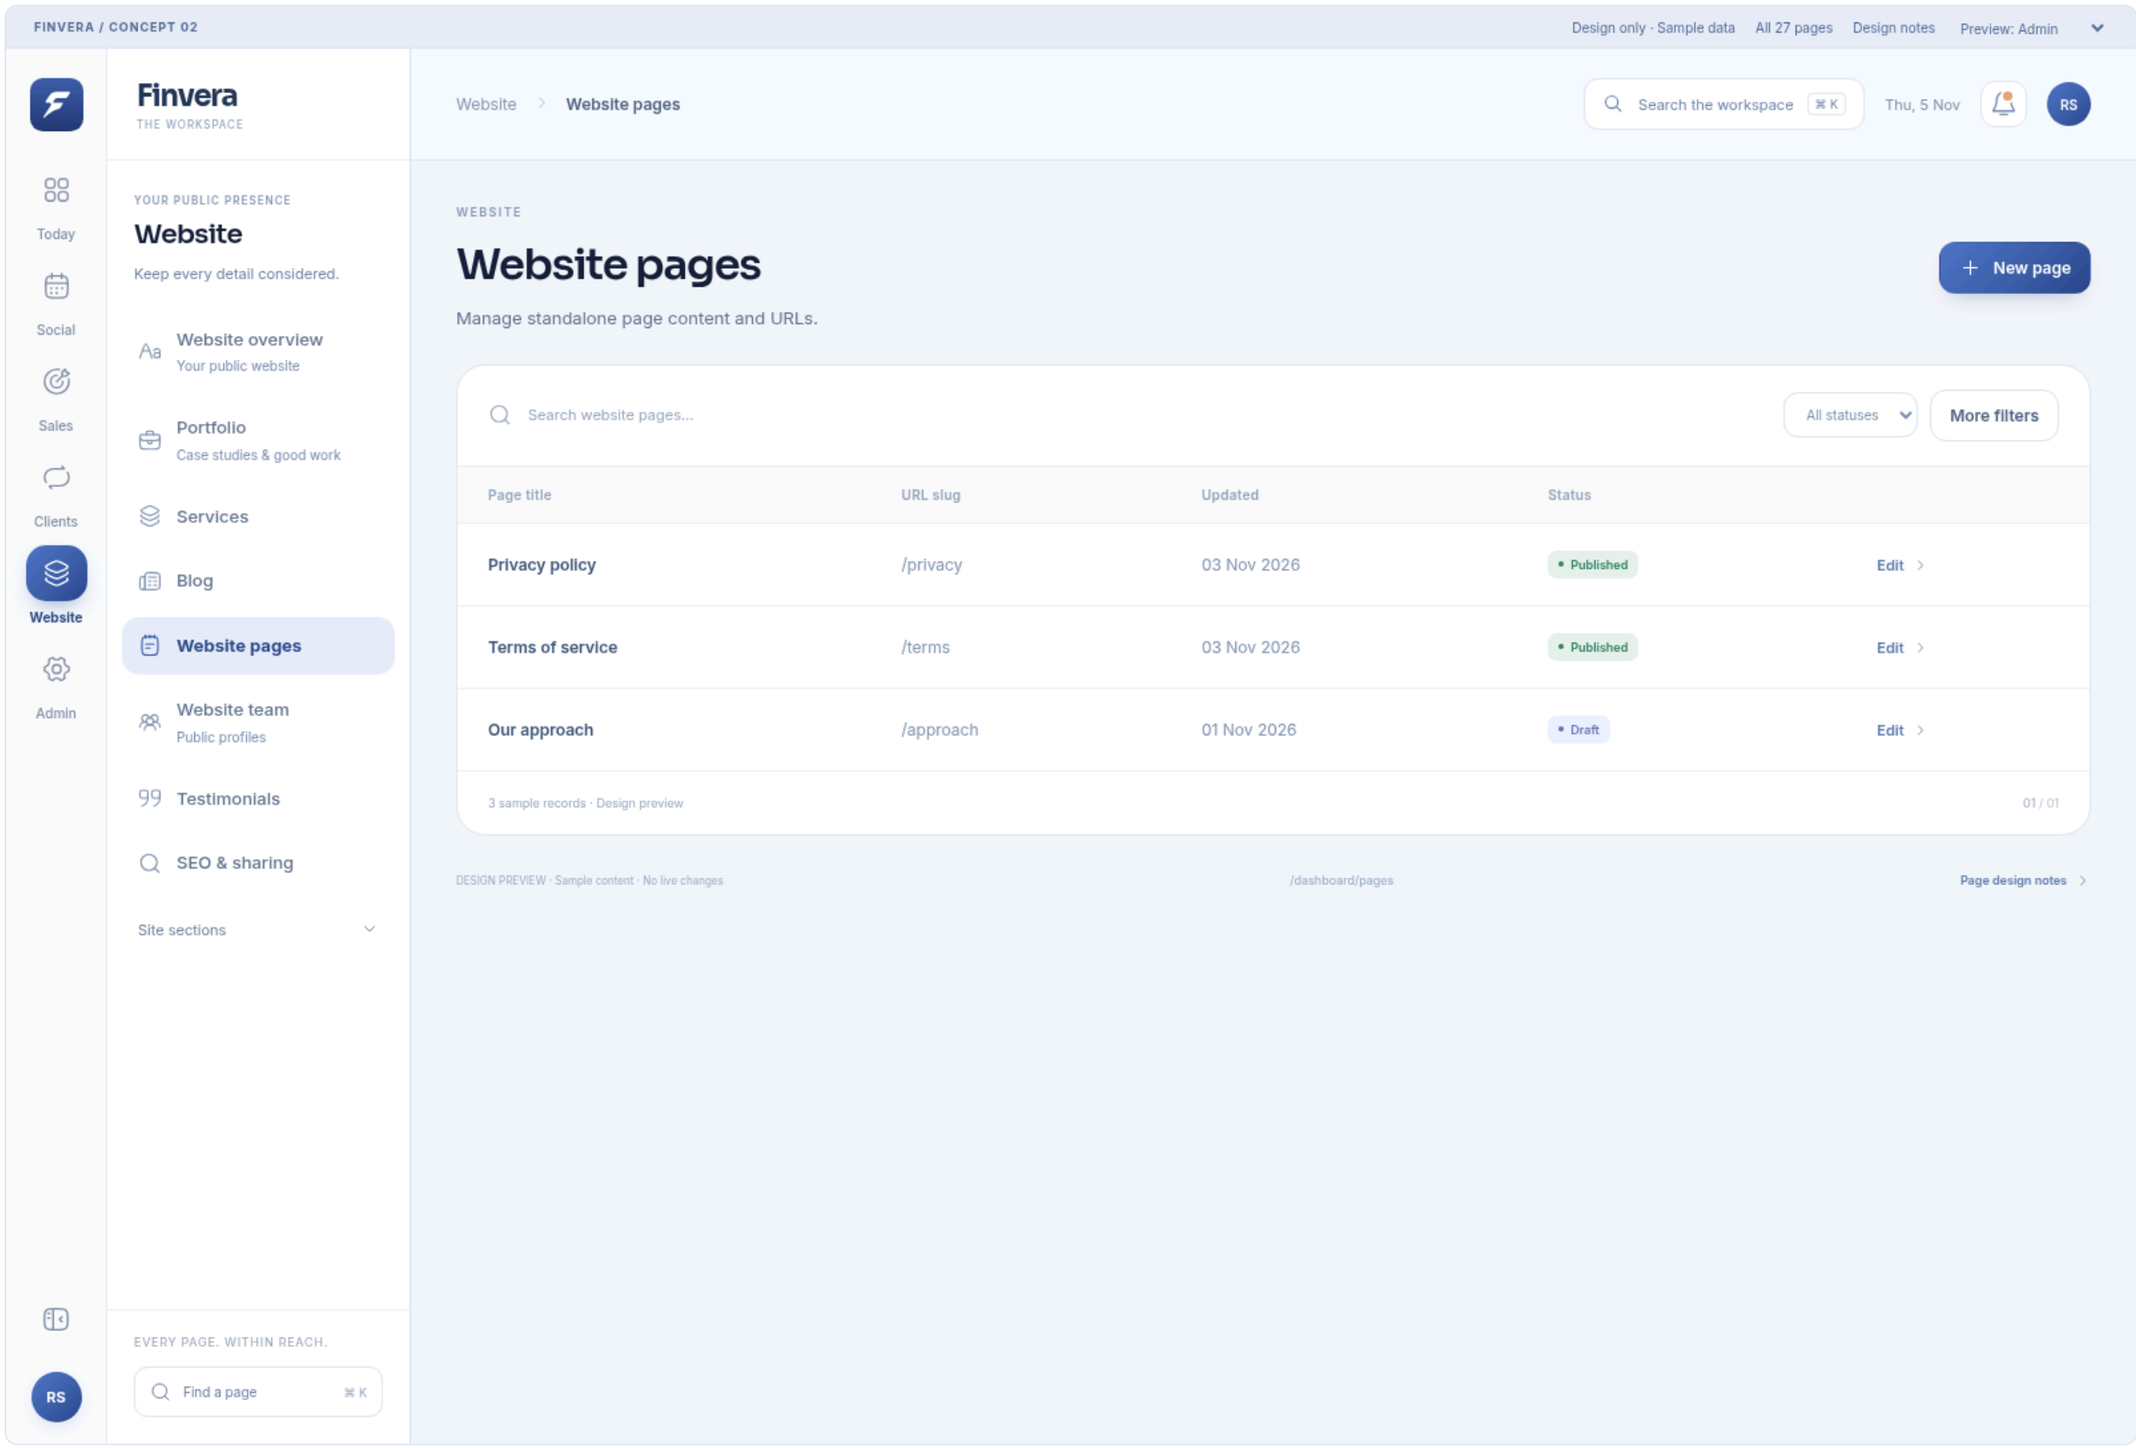

Separate content writing from publishing metadata. · Use a full writing surface; do not squeeze long articles into a narrow drawer. · Show draft/published status next to the article title.

Website pages

Website · /dashboard/pages

DESIGN ONLY · SAMPLE DATA

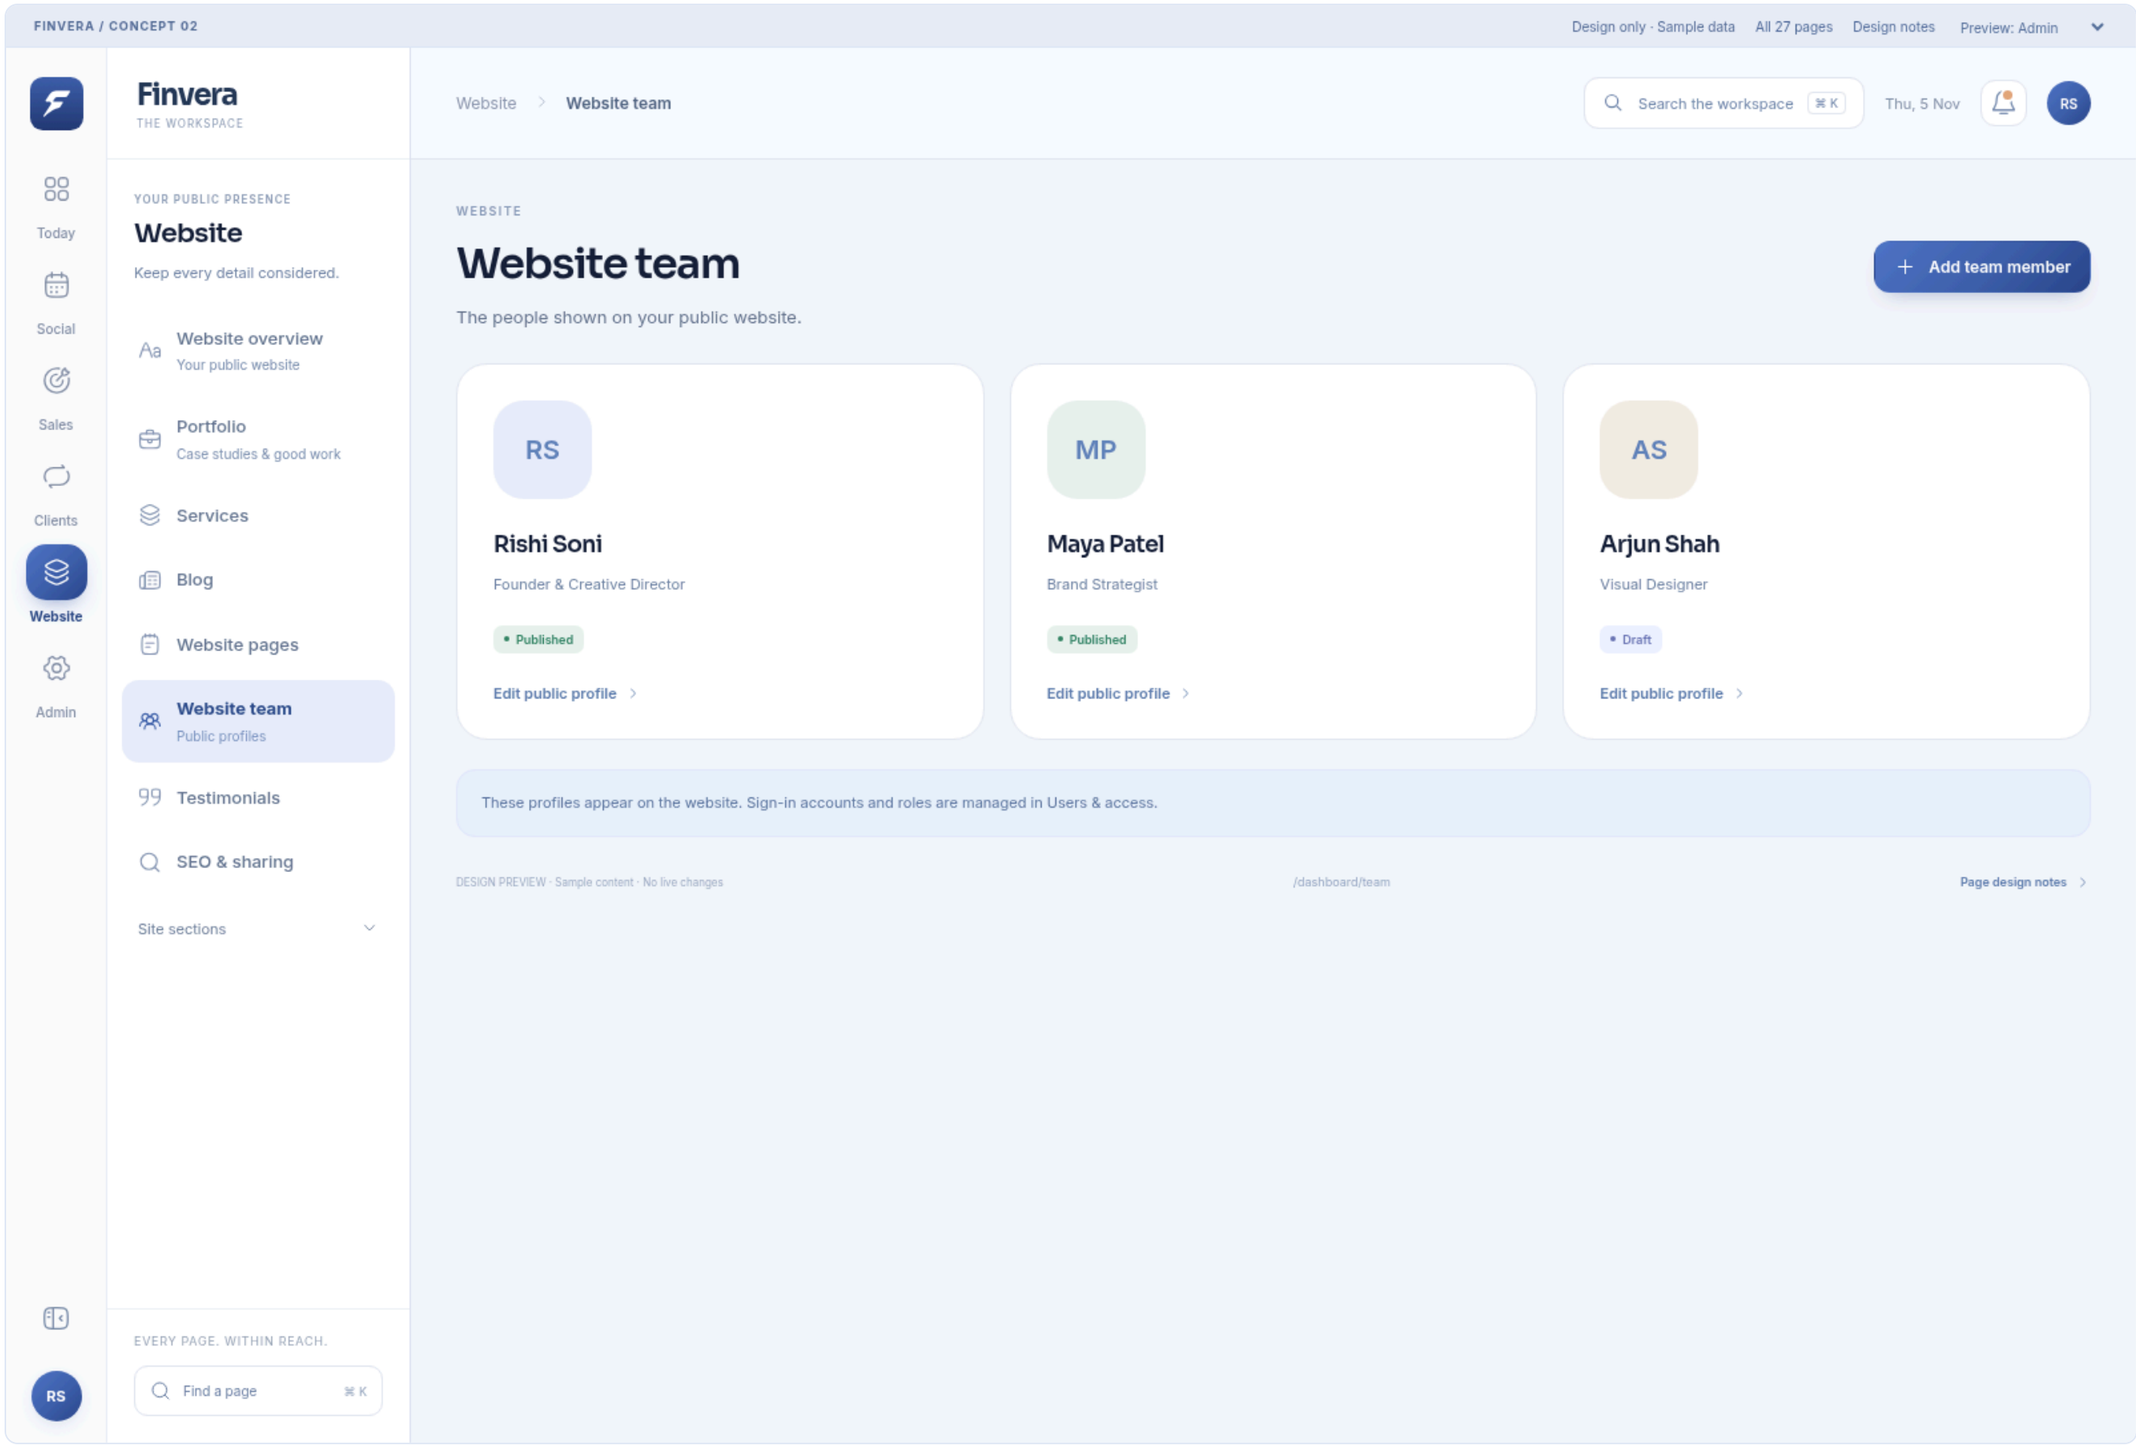

Rename Pages to Website pages so the navigation purpose is explicit. · Show the slug and a safe preview affordance alongside the title.

Website team

Website · /dashboard/team

DESIGN ONLY · SAMPLE DATA

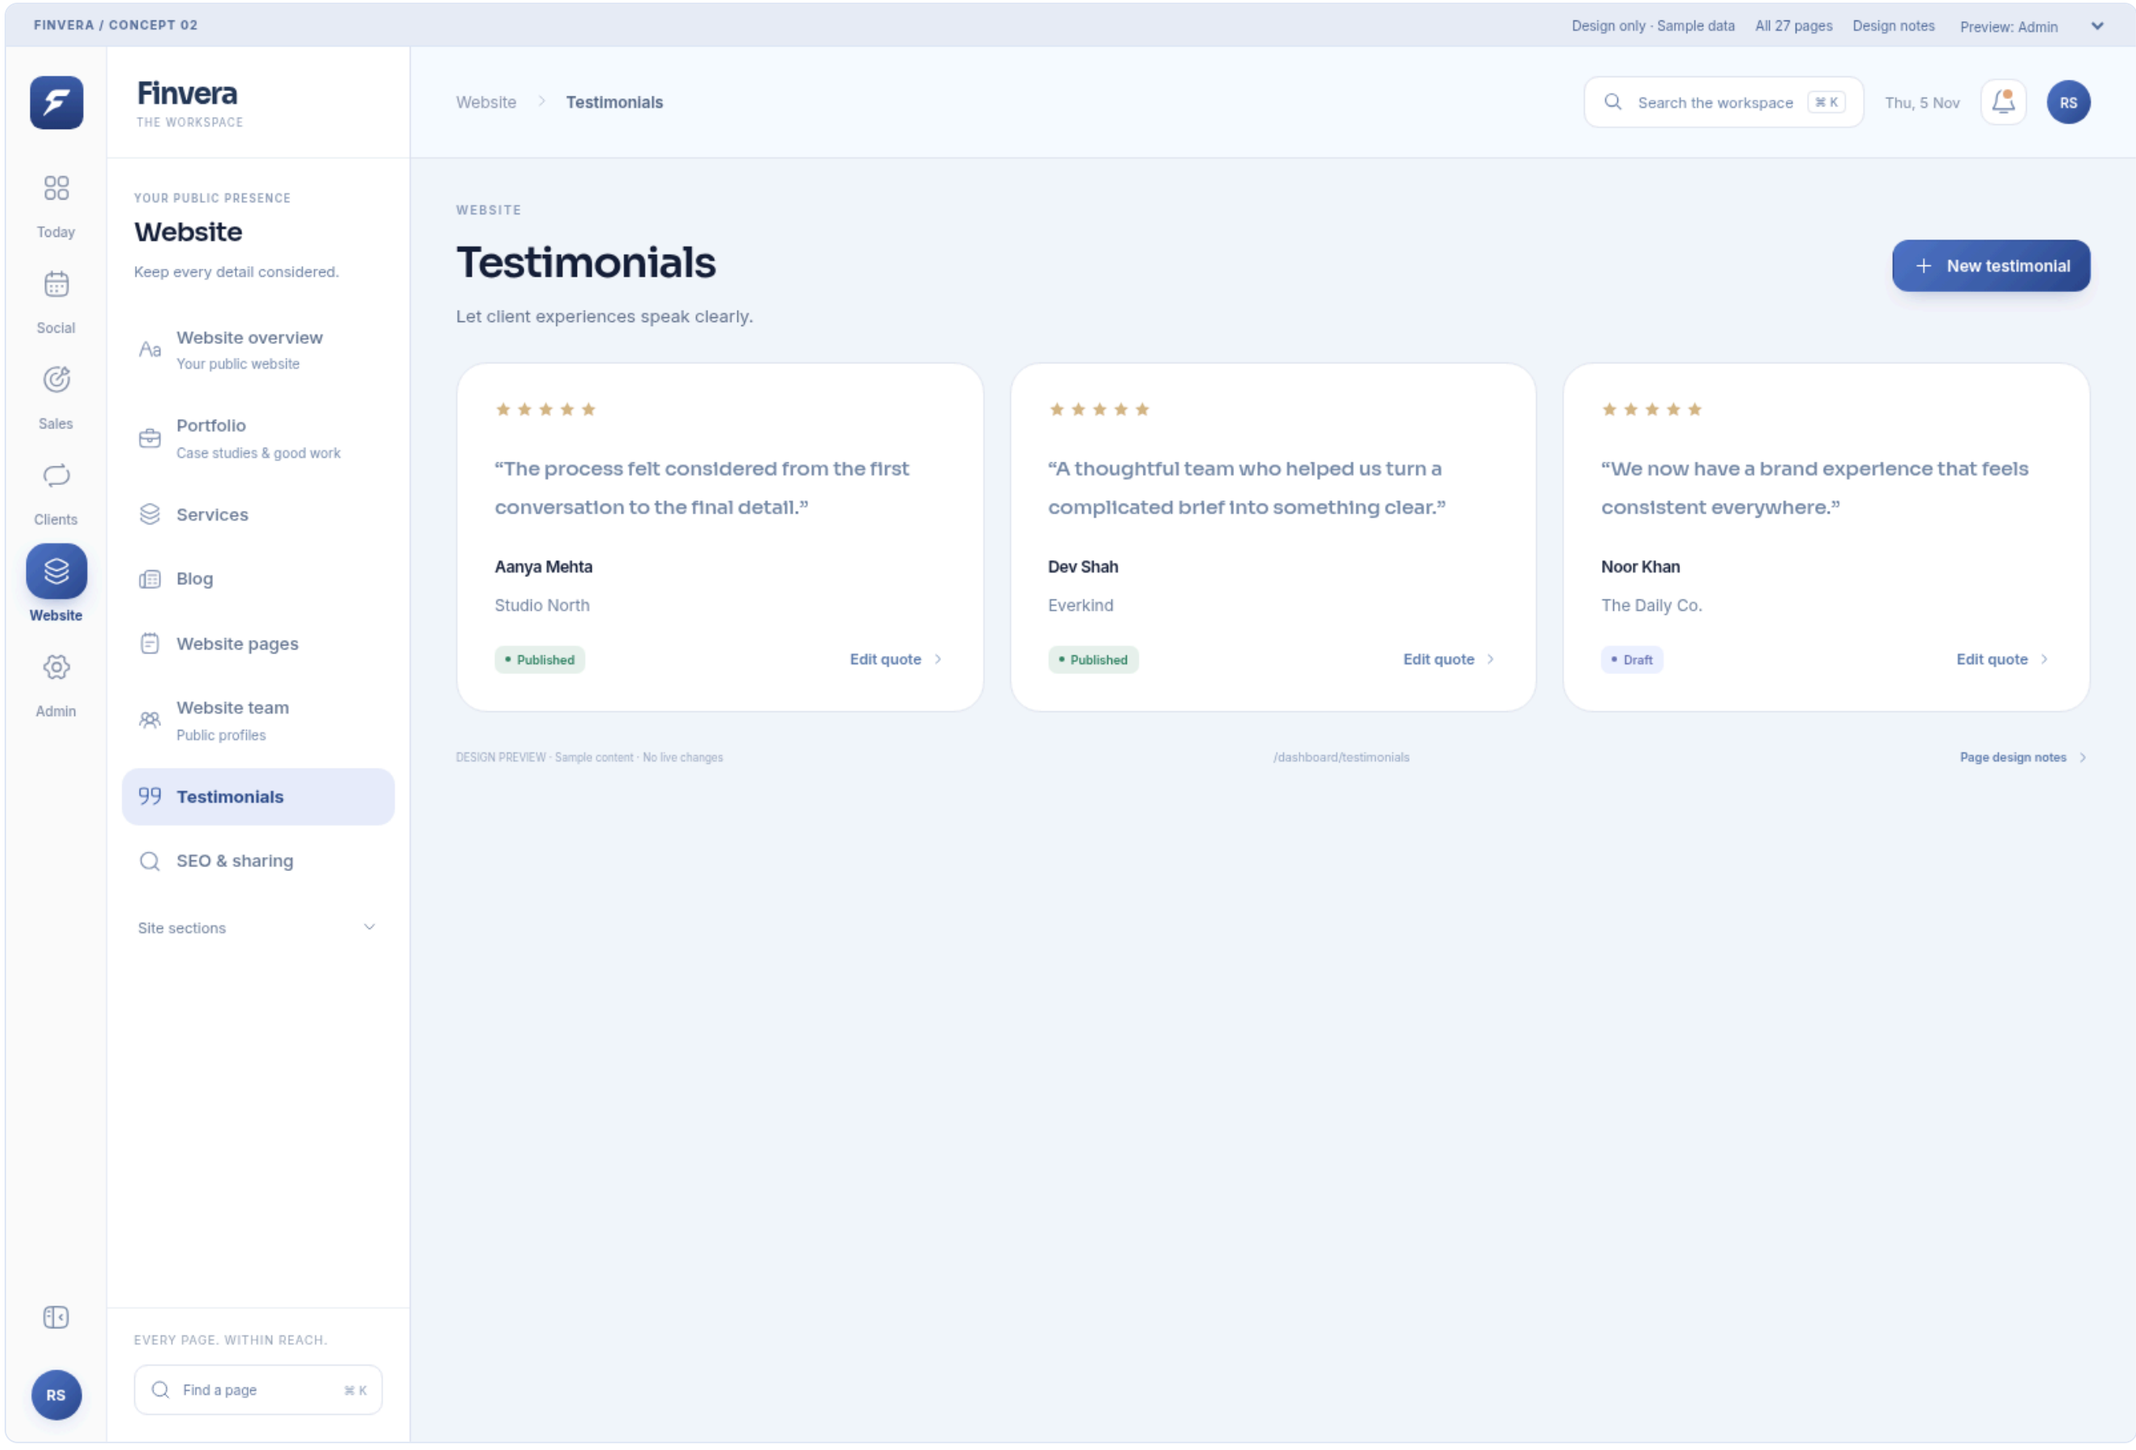

Rename Team to Website team. · This manages public bios; Users & access manages login permissions.

Testimonials

Website · /dashboard/testimonials

DESIGN ONLY · SAMPLE DATA

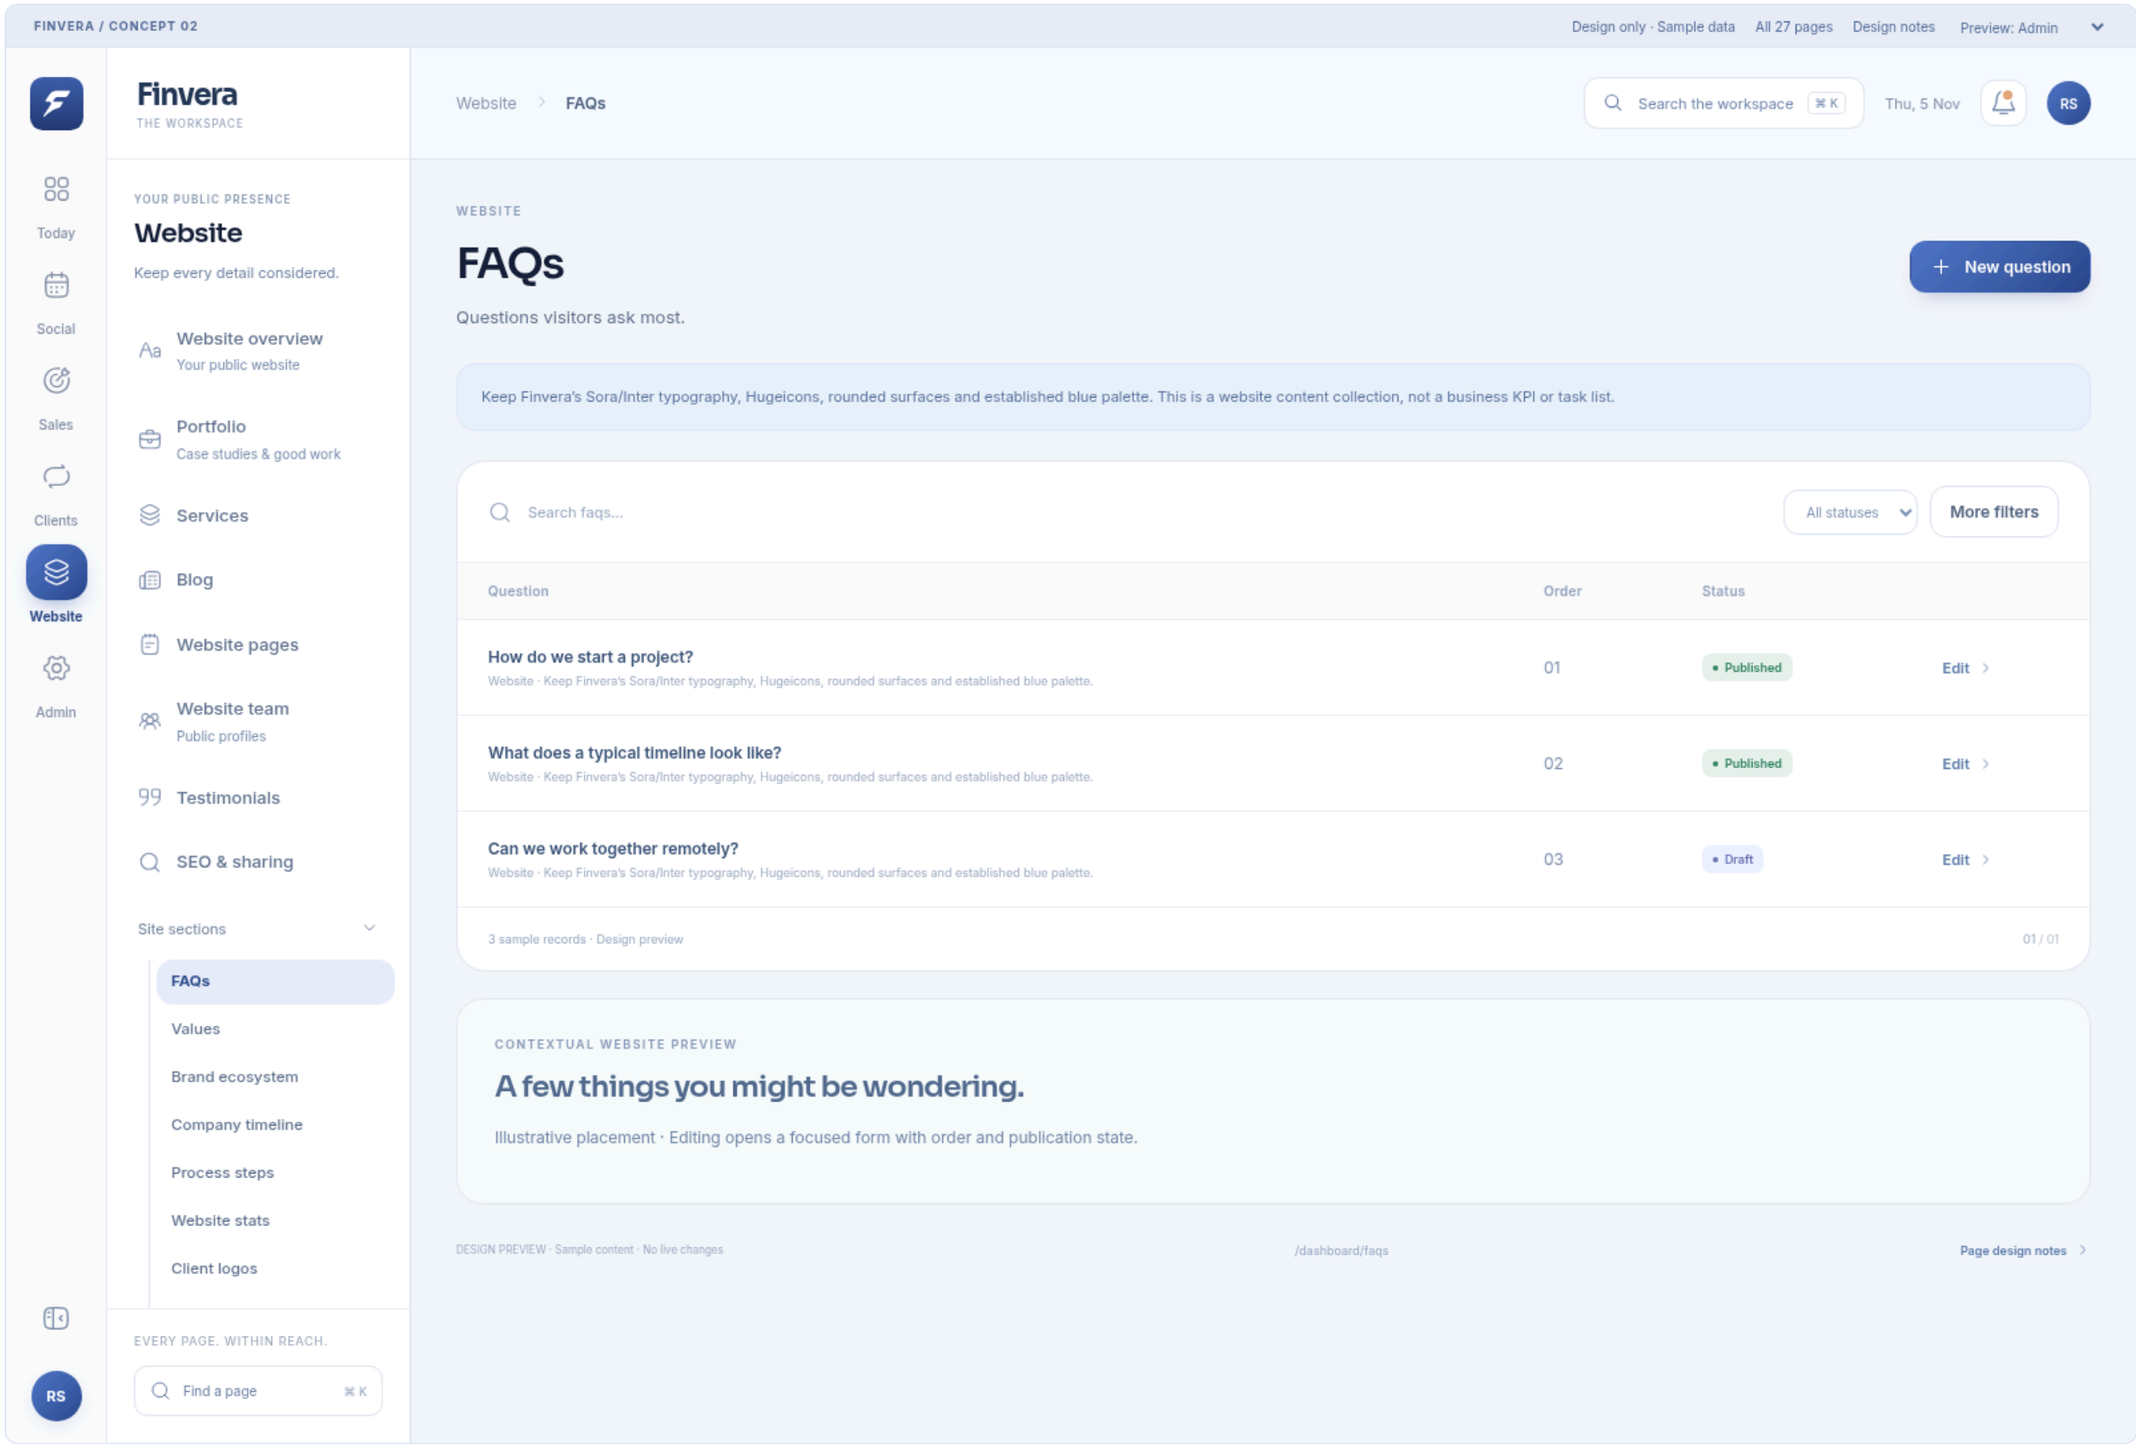

Preview the quote card and keep editing fields beside it. · Ratings and publication state stay separate.

FAQs

Website · /dashboard/faqs

DESIGN ONLY · SAMPLE DATA

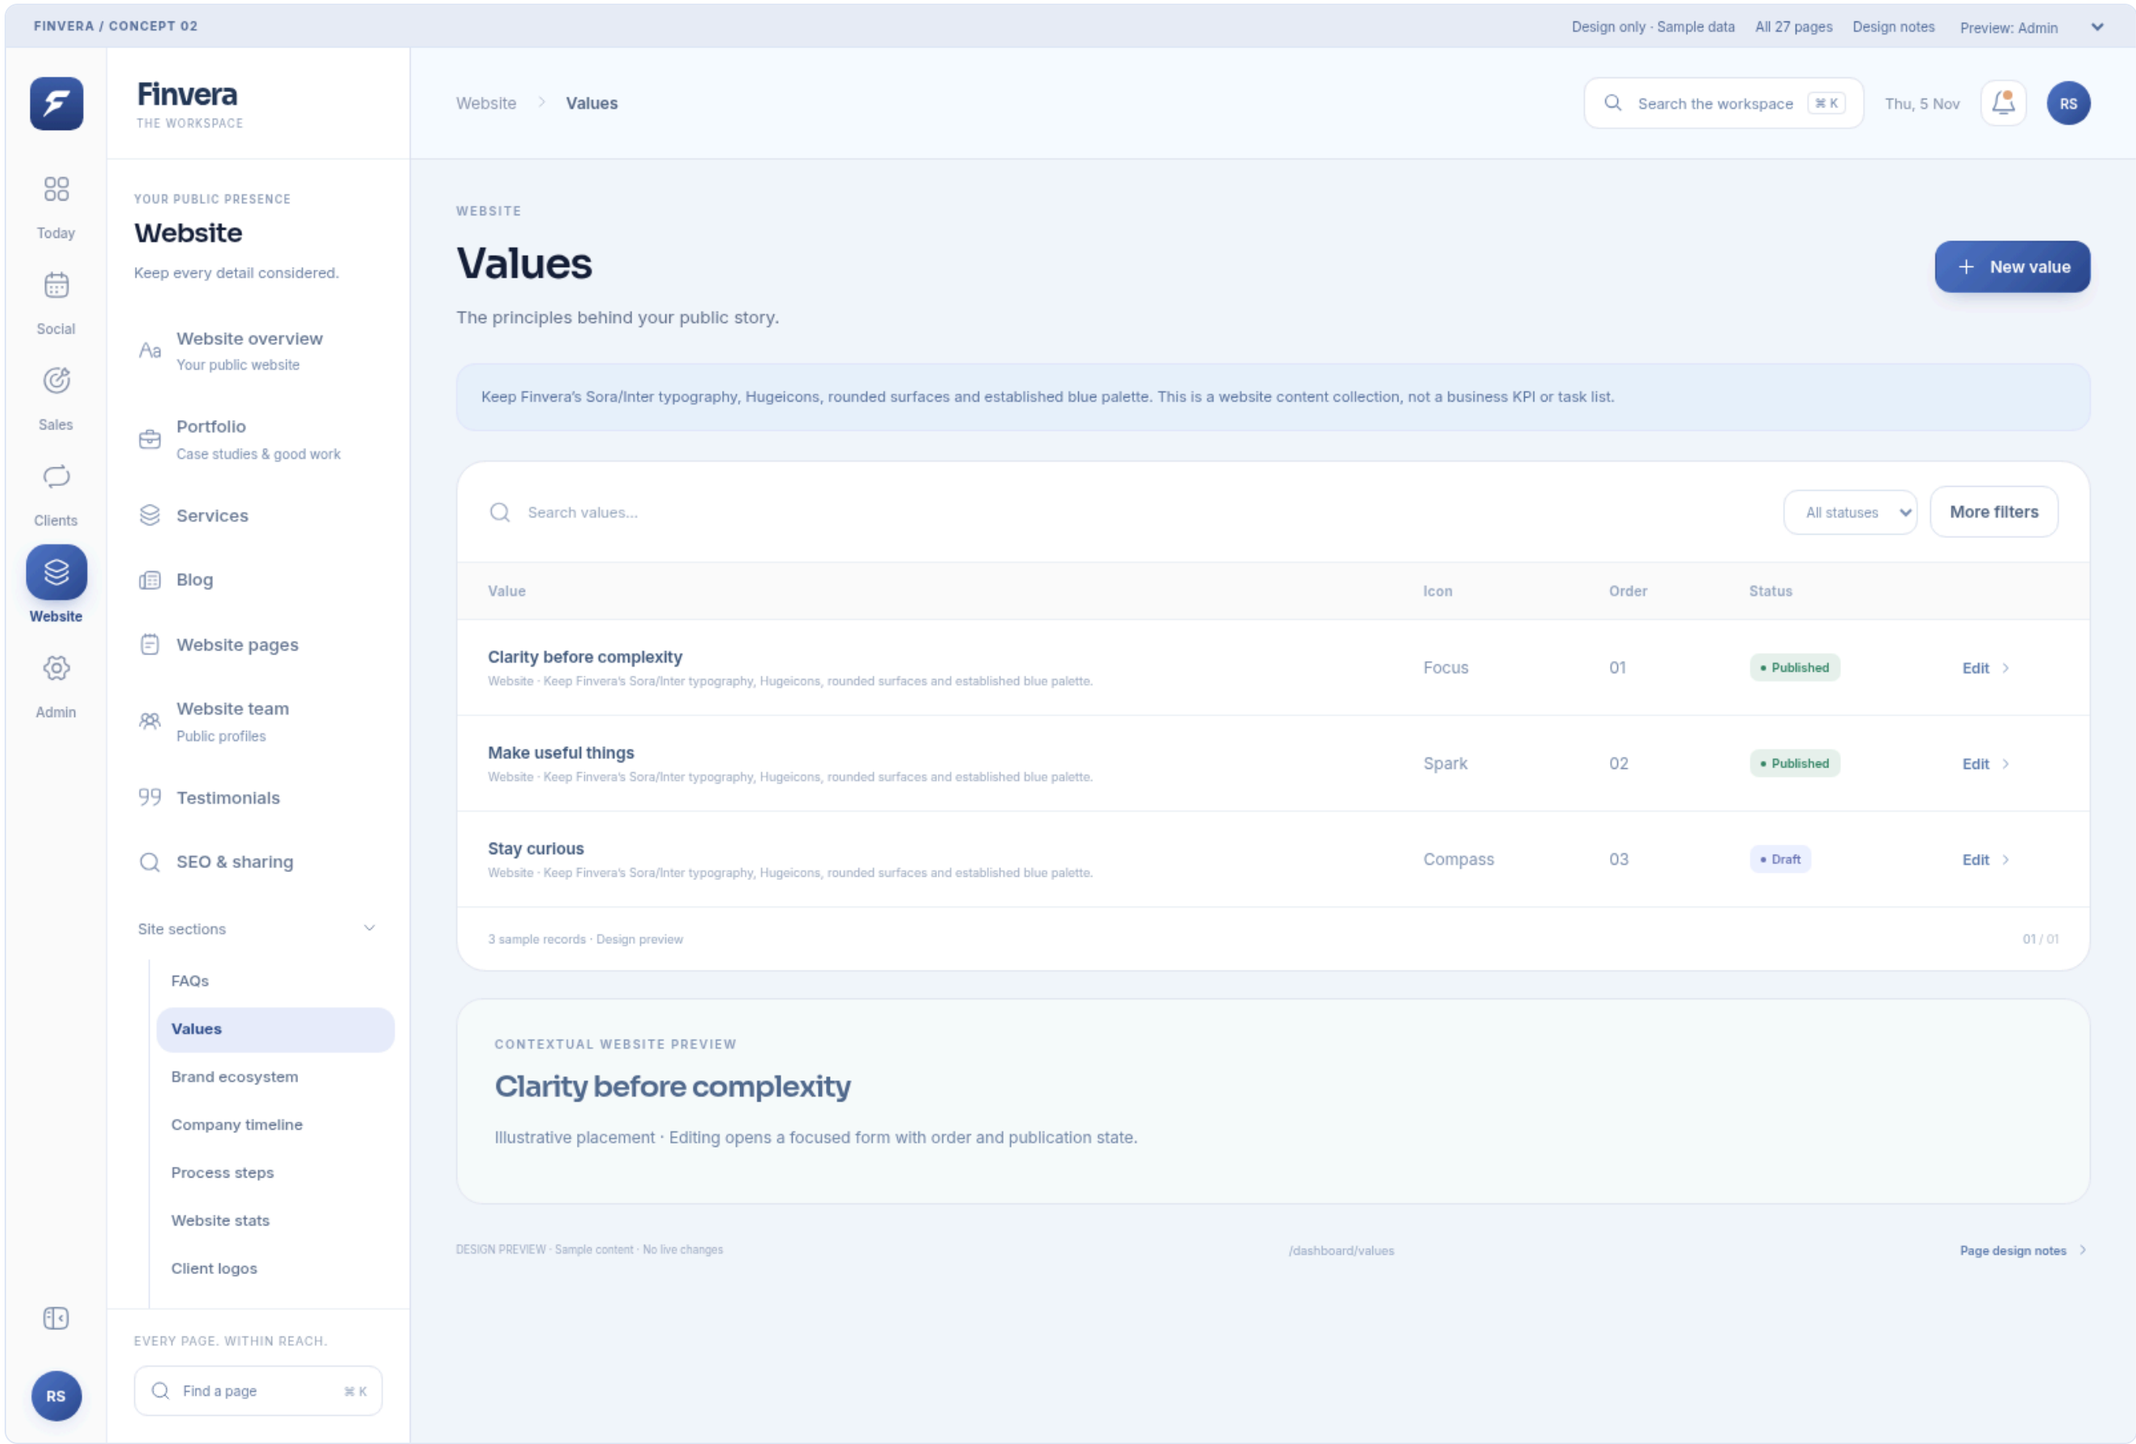

Public placement: Home page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Values

Website · /dashboard/values

DESIGN ONLY · SAMPLE DATA

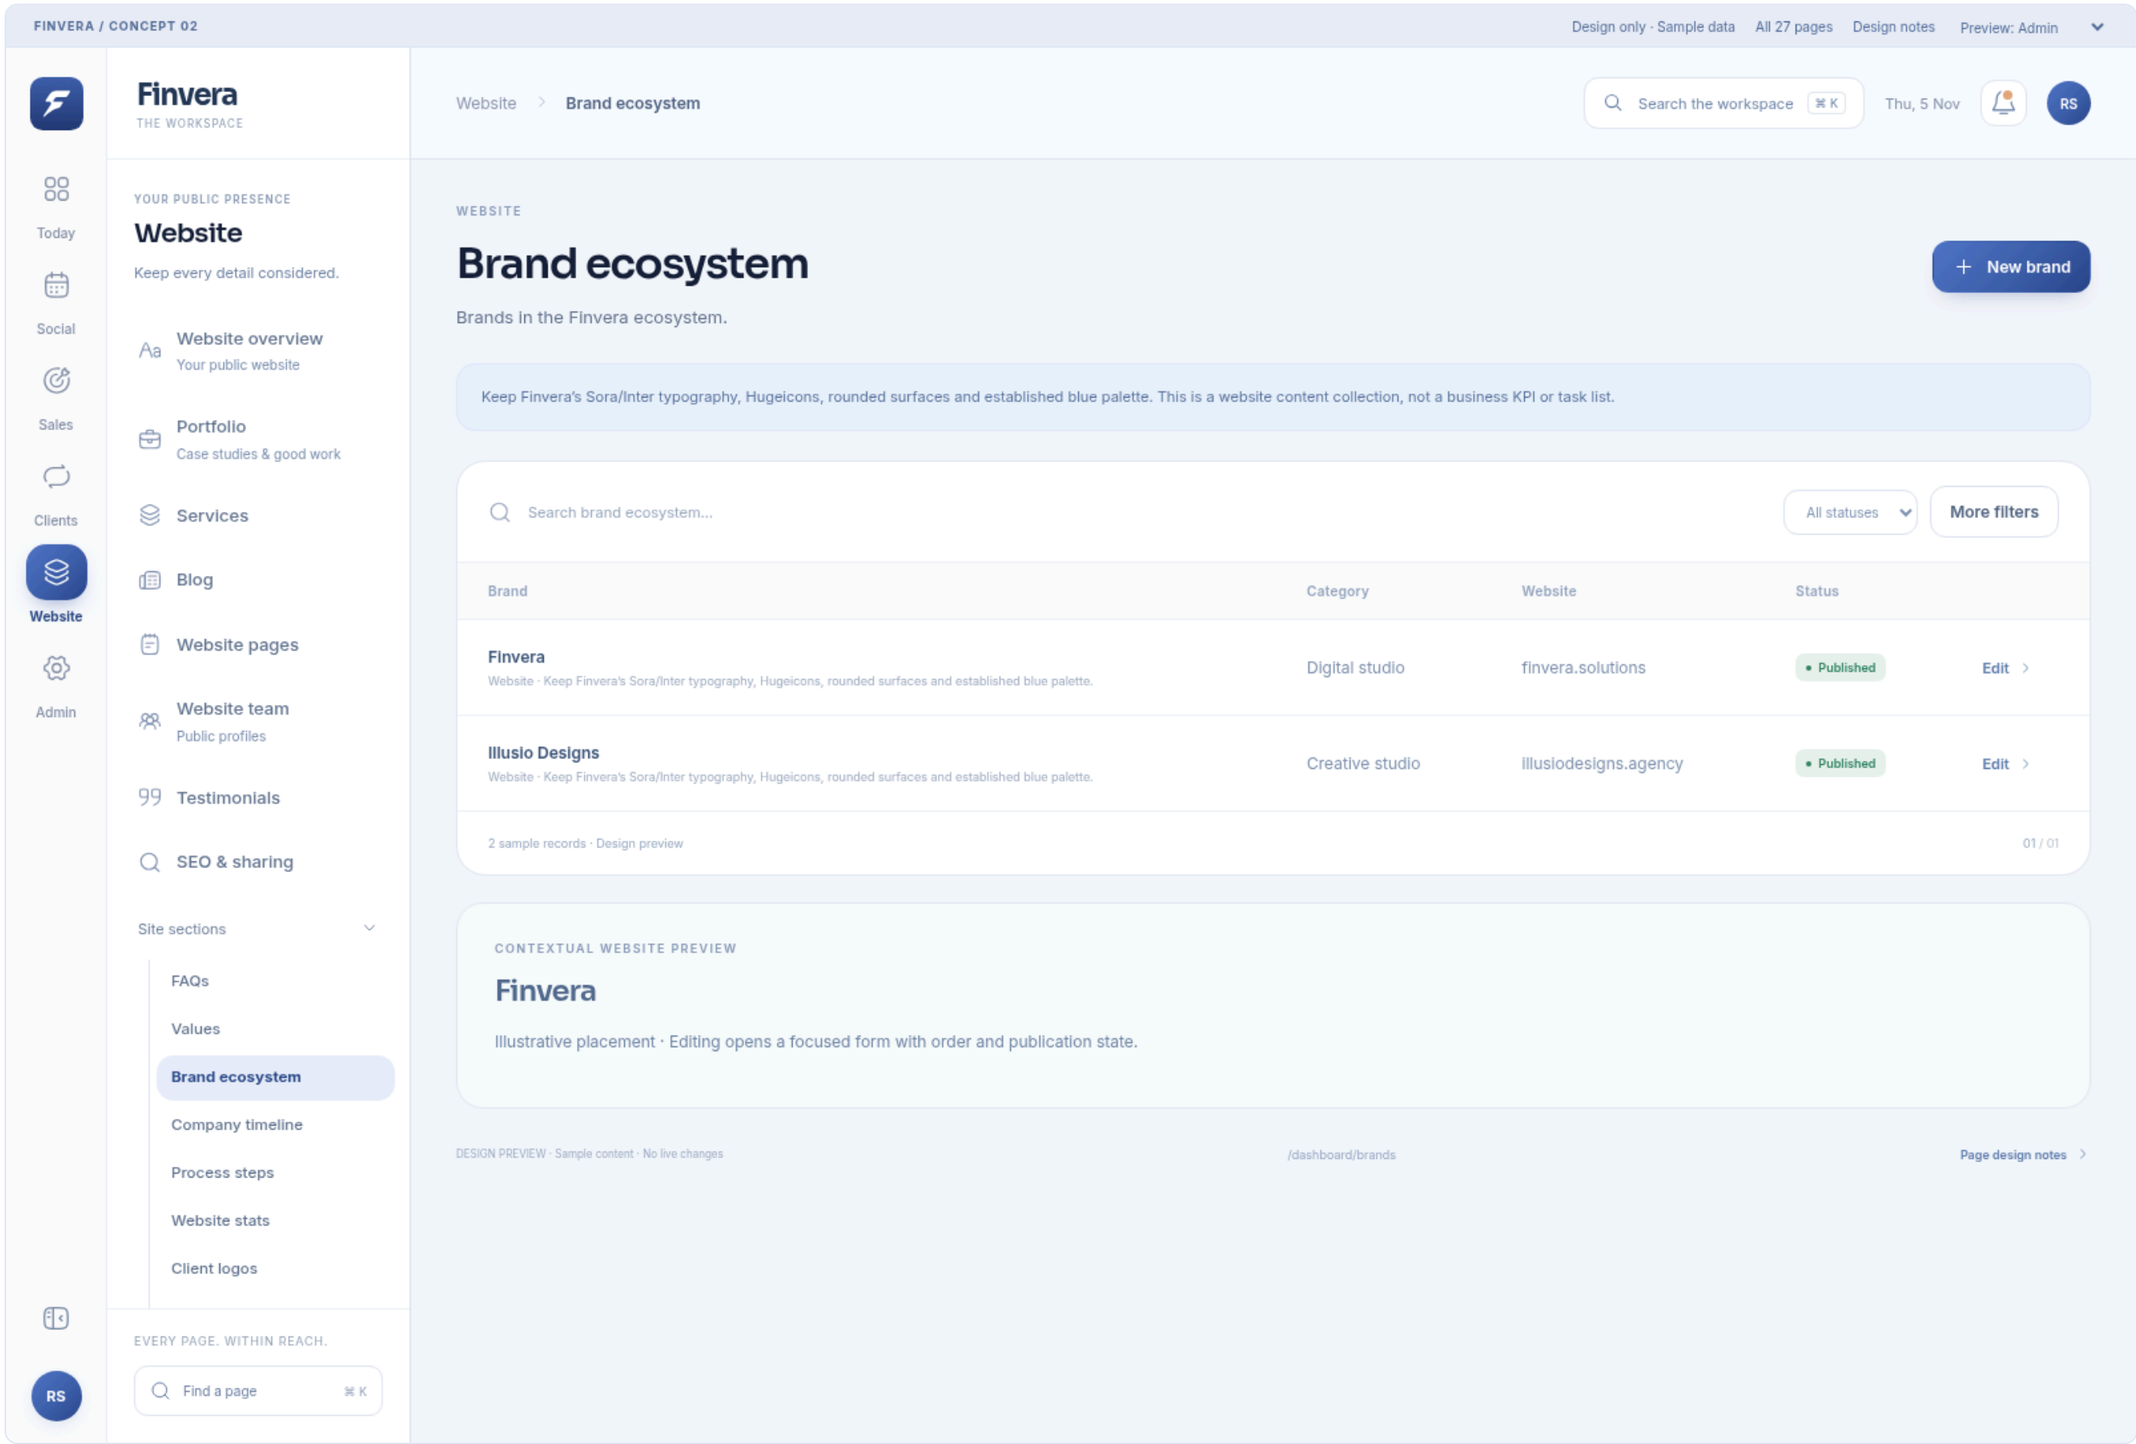

Public placement: About page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Brand ecosystem

Website · /dashboard/brands

DESIGN ONLY · SAMPLE DATA

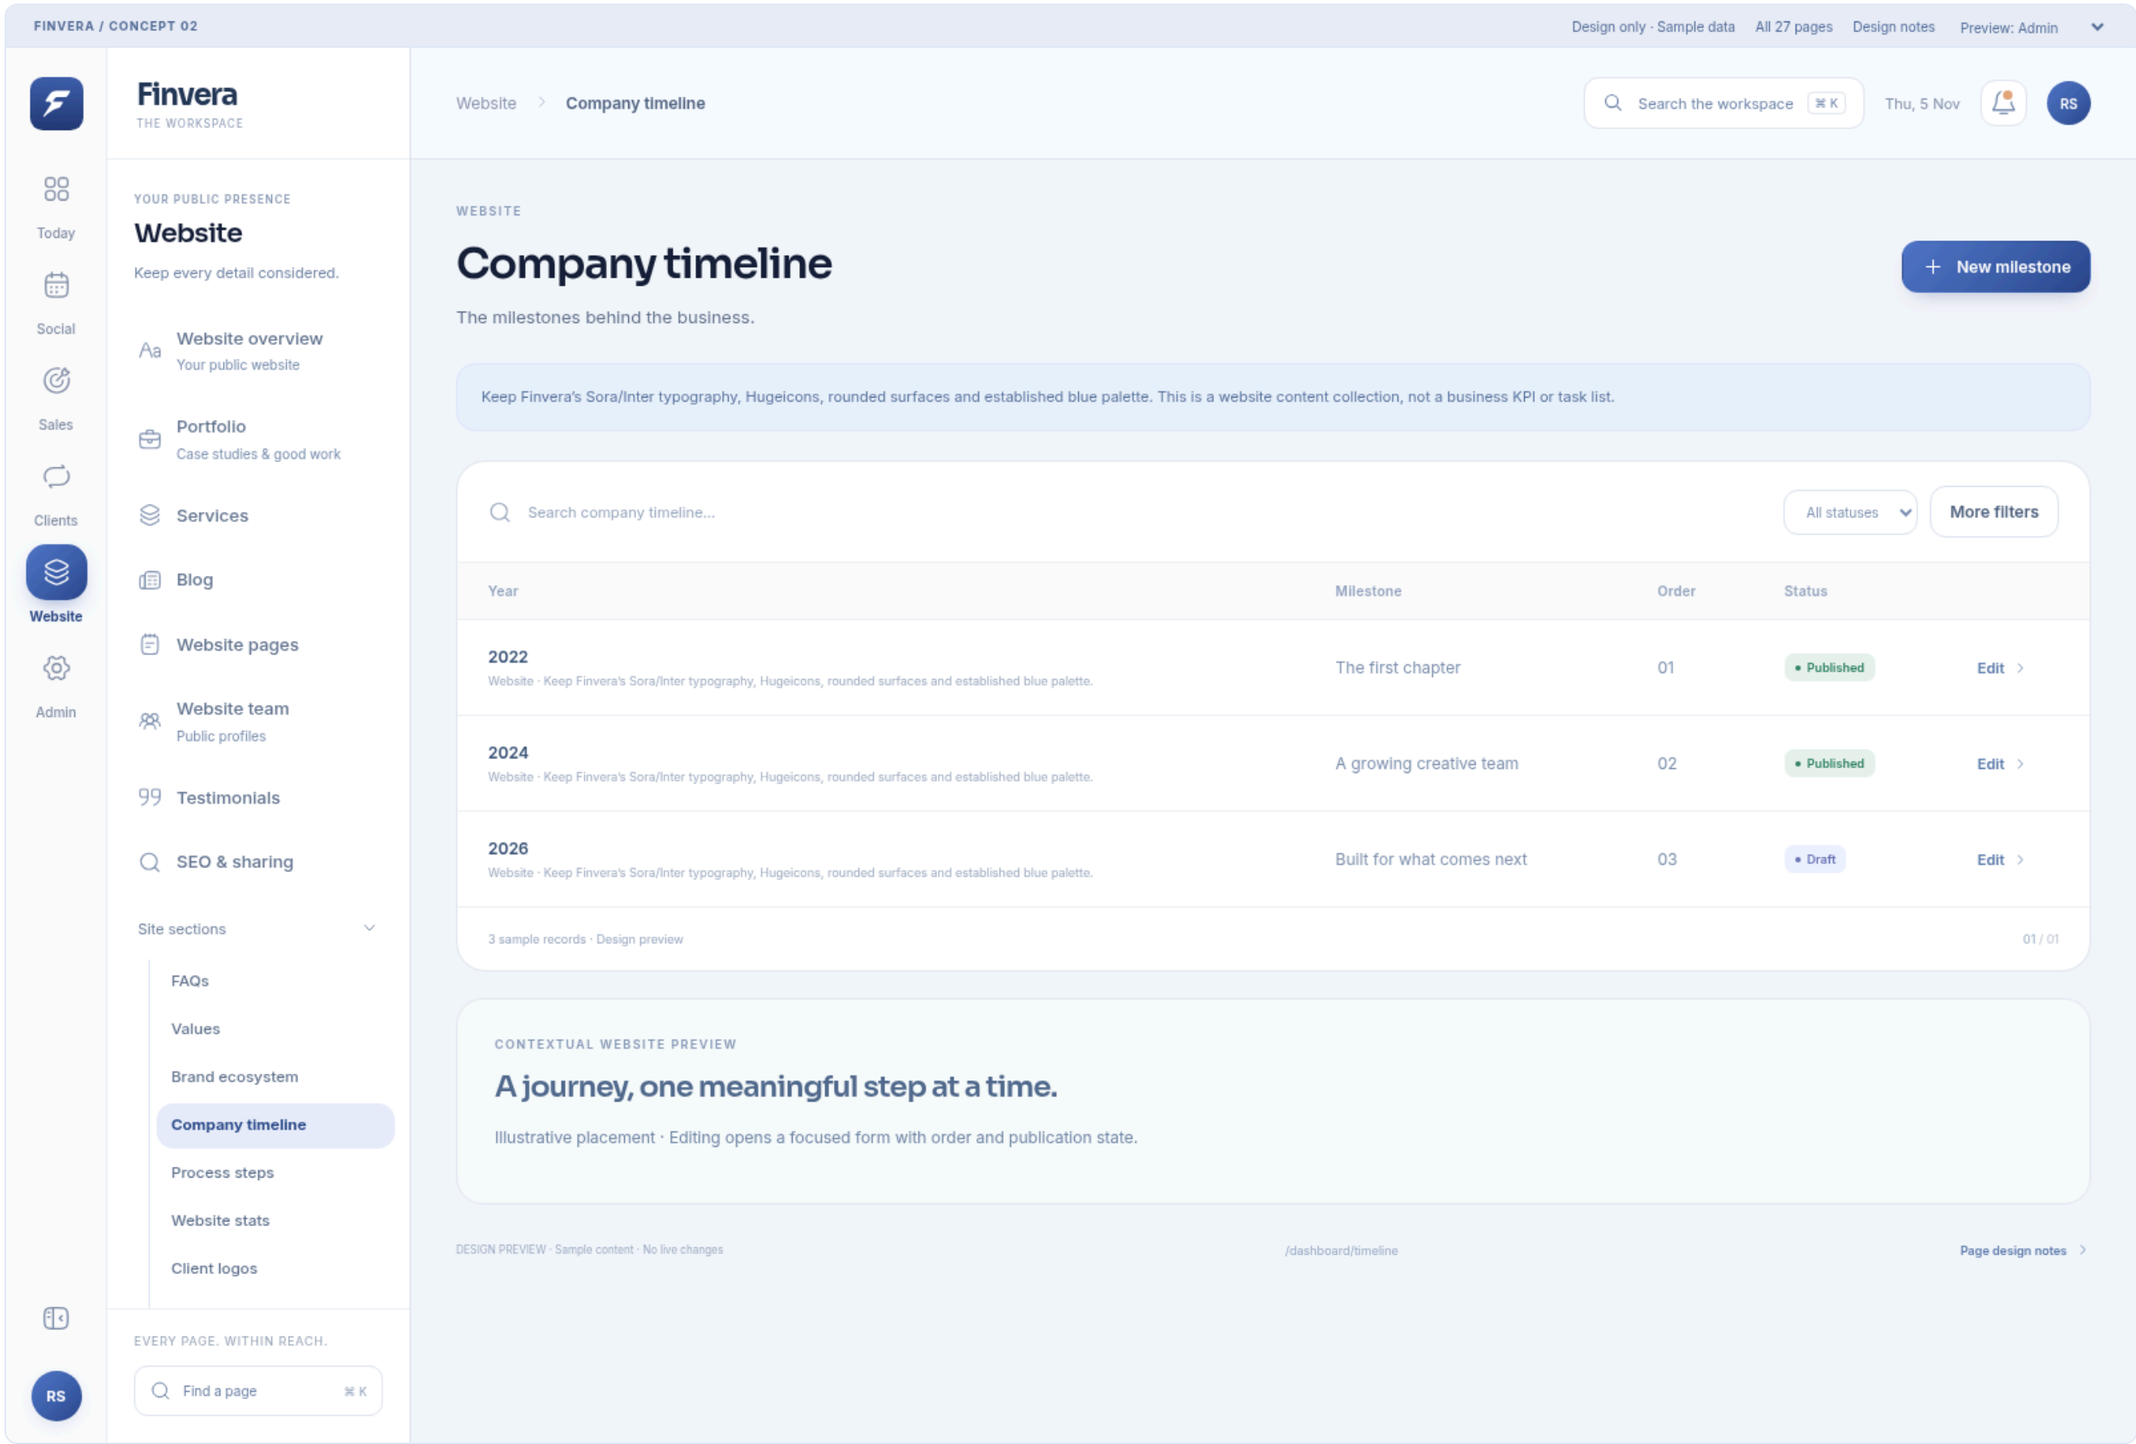

Public placement: About page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Company timeline

Website · /dashboard/timeline

DESIGN ONLY · SAMPLE DATA

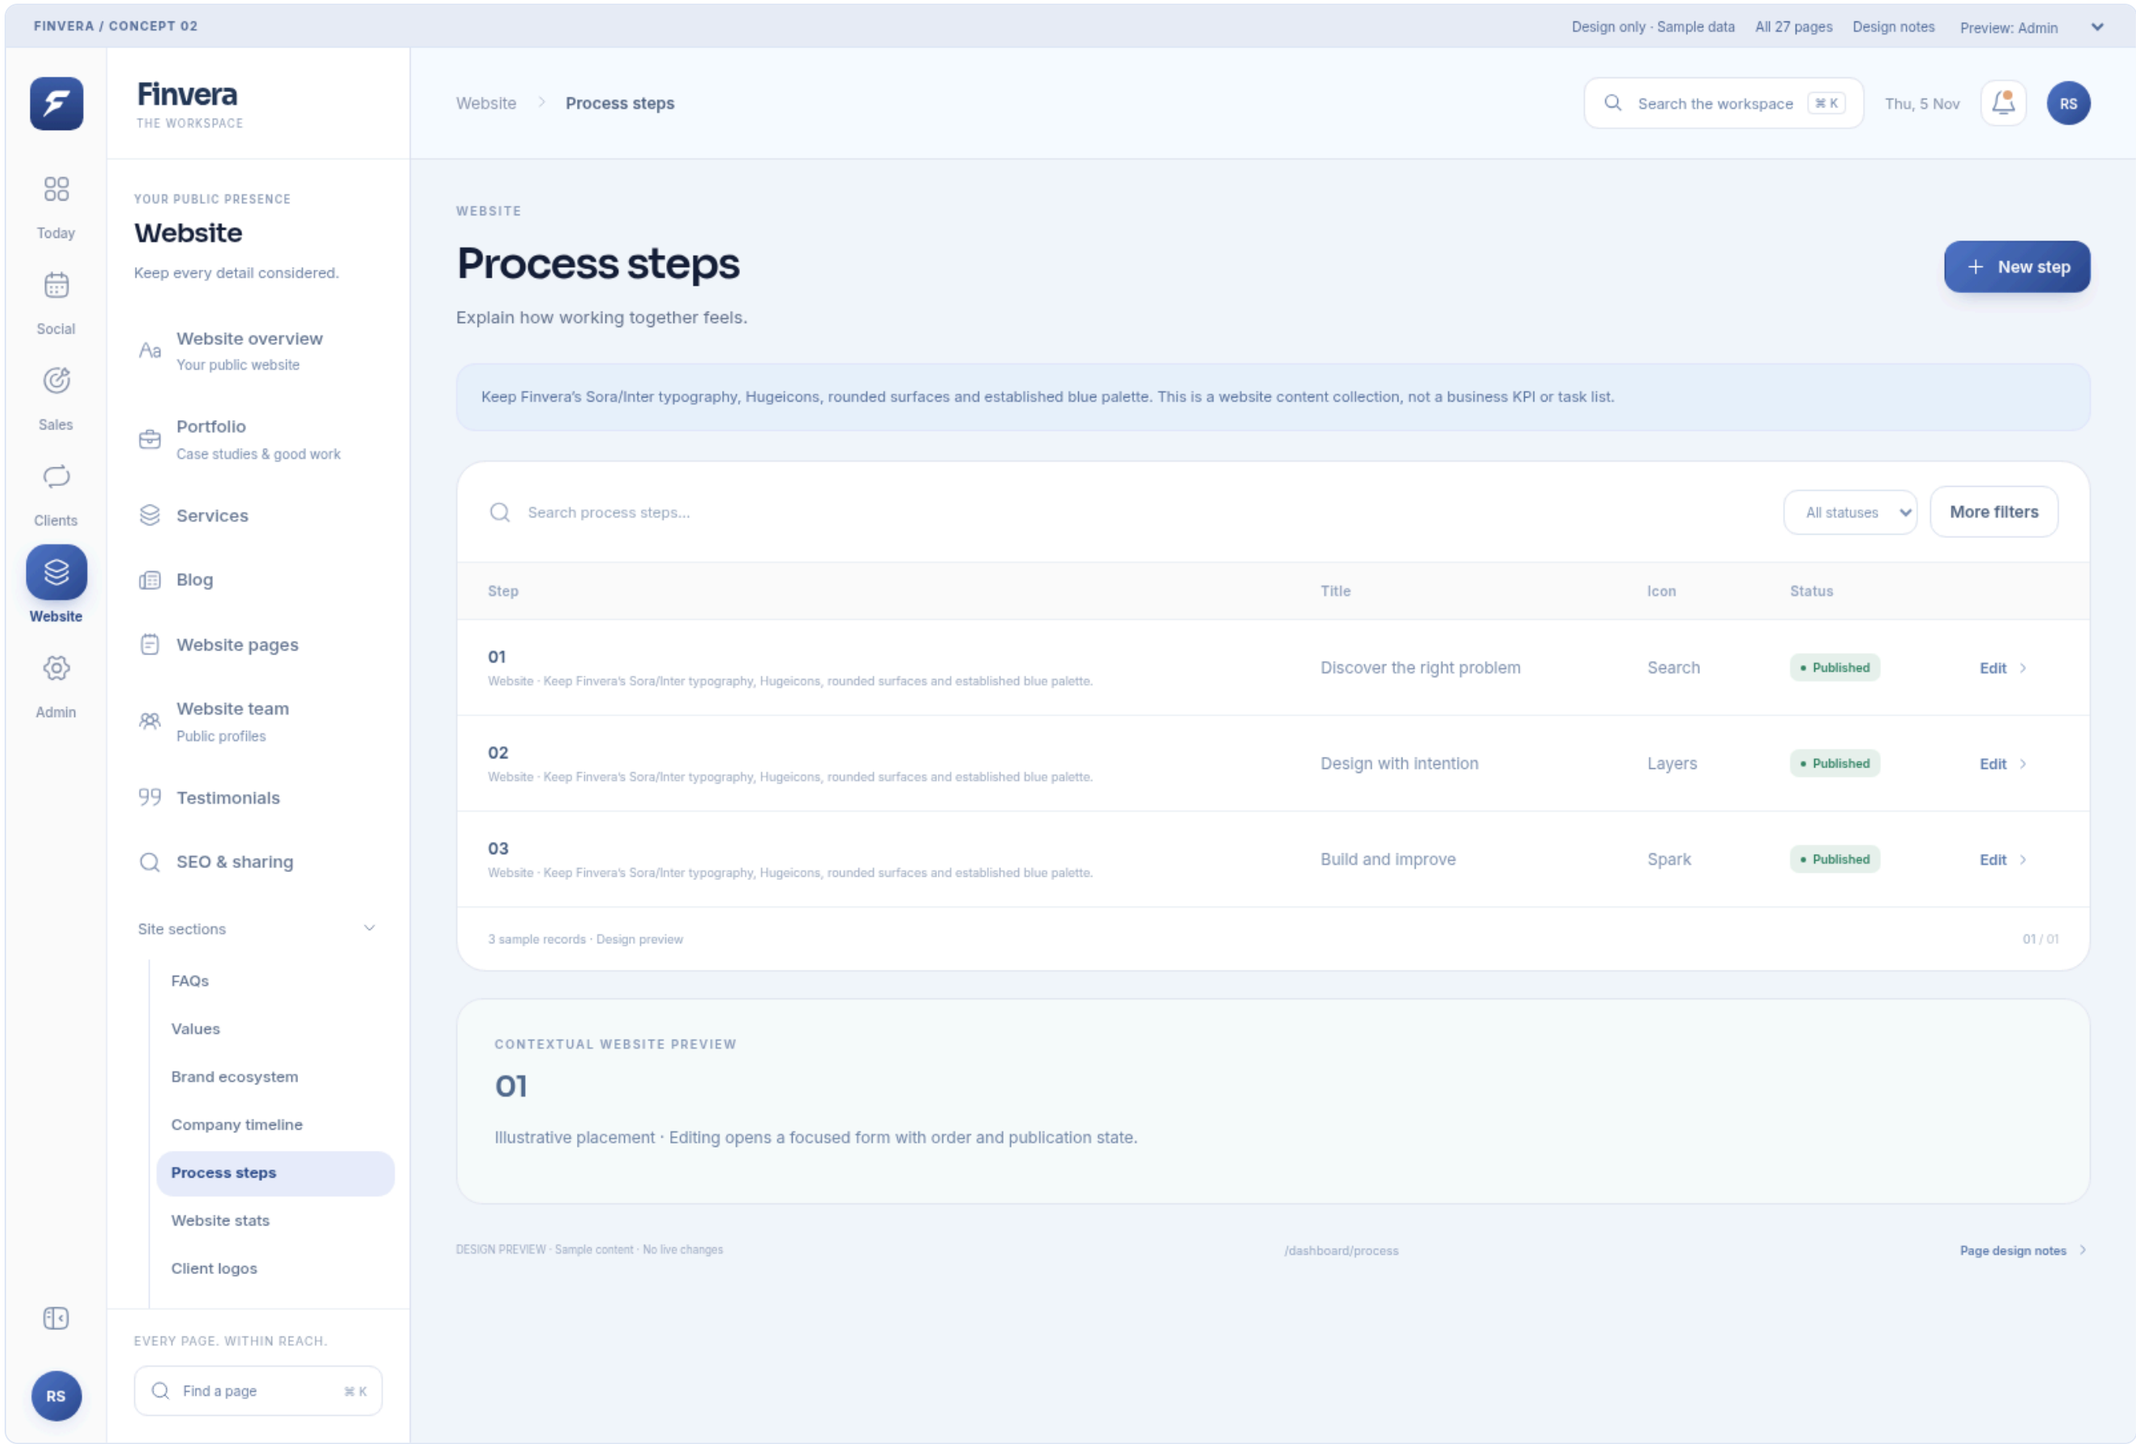

Public placement: About page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Process steps

Website · /dashboard/process

DESIGN ONLY · SAMPLE DATA

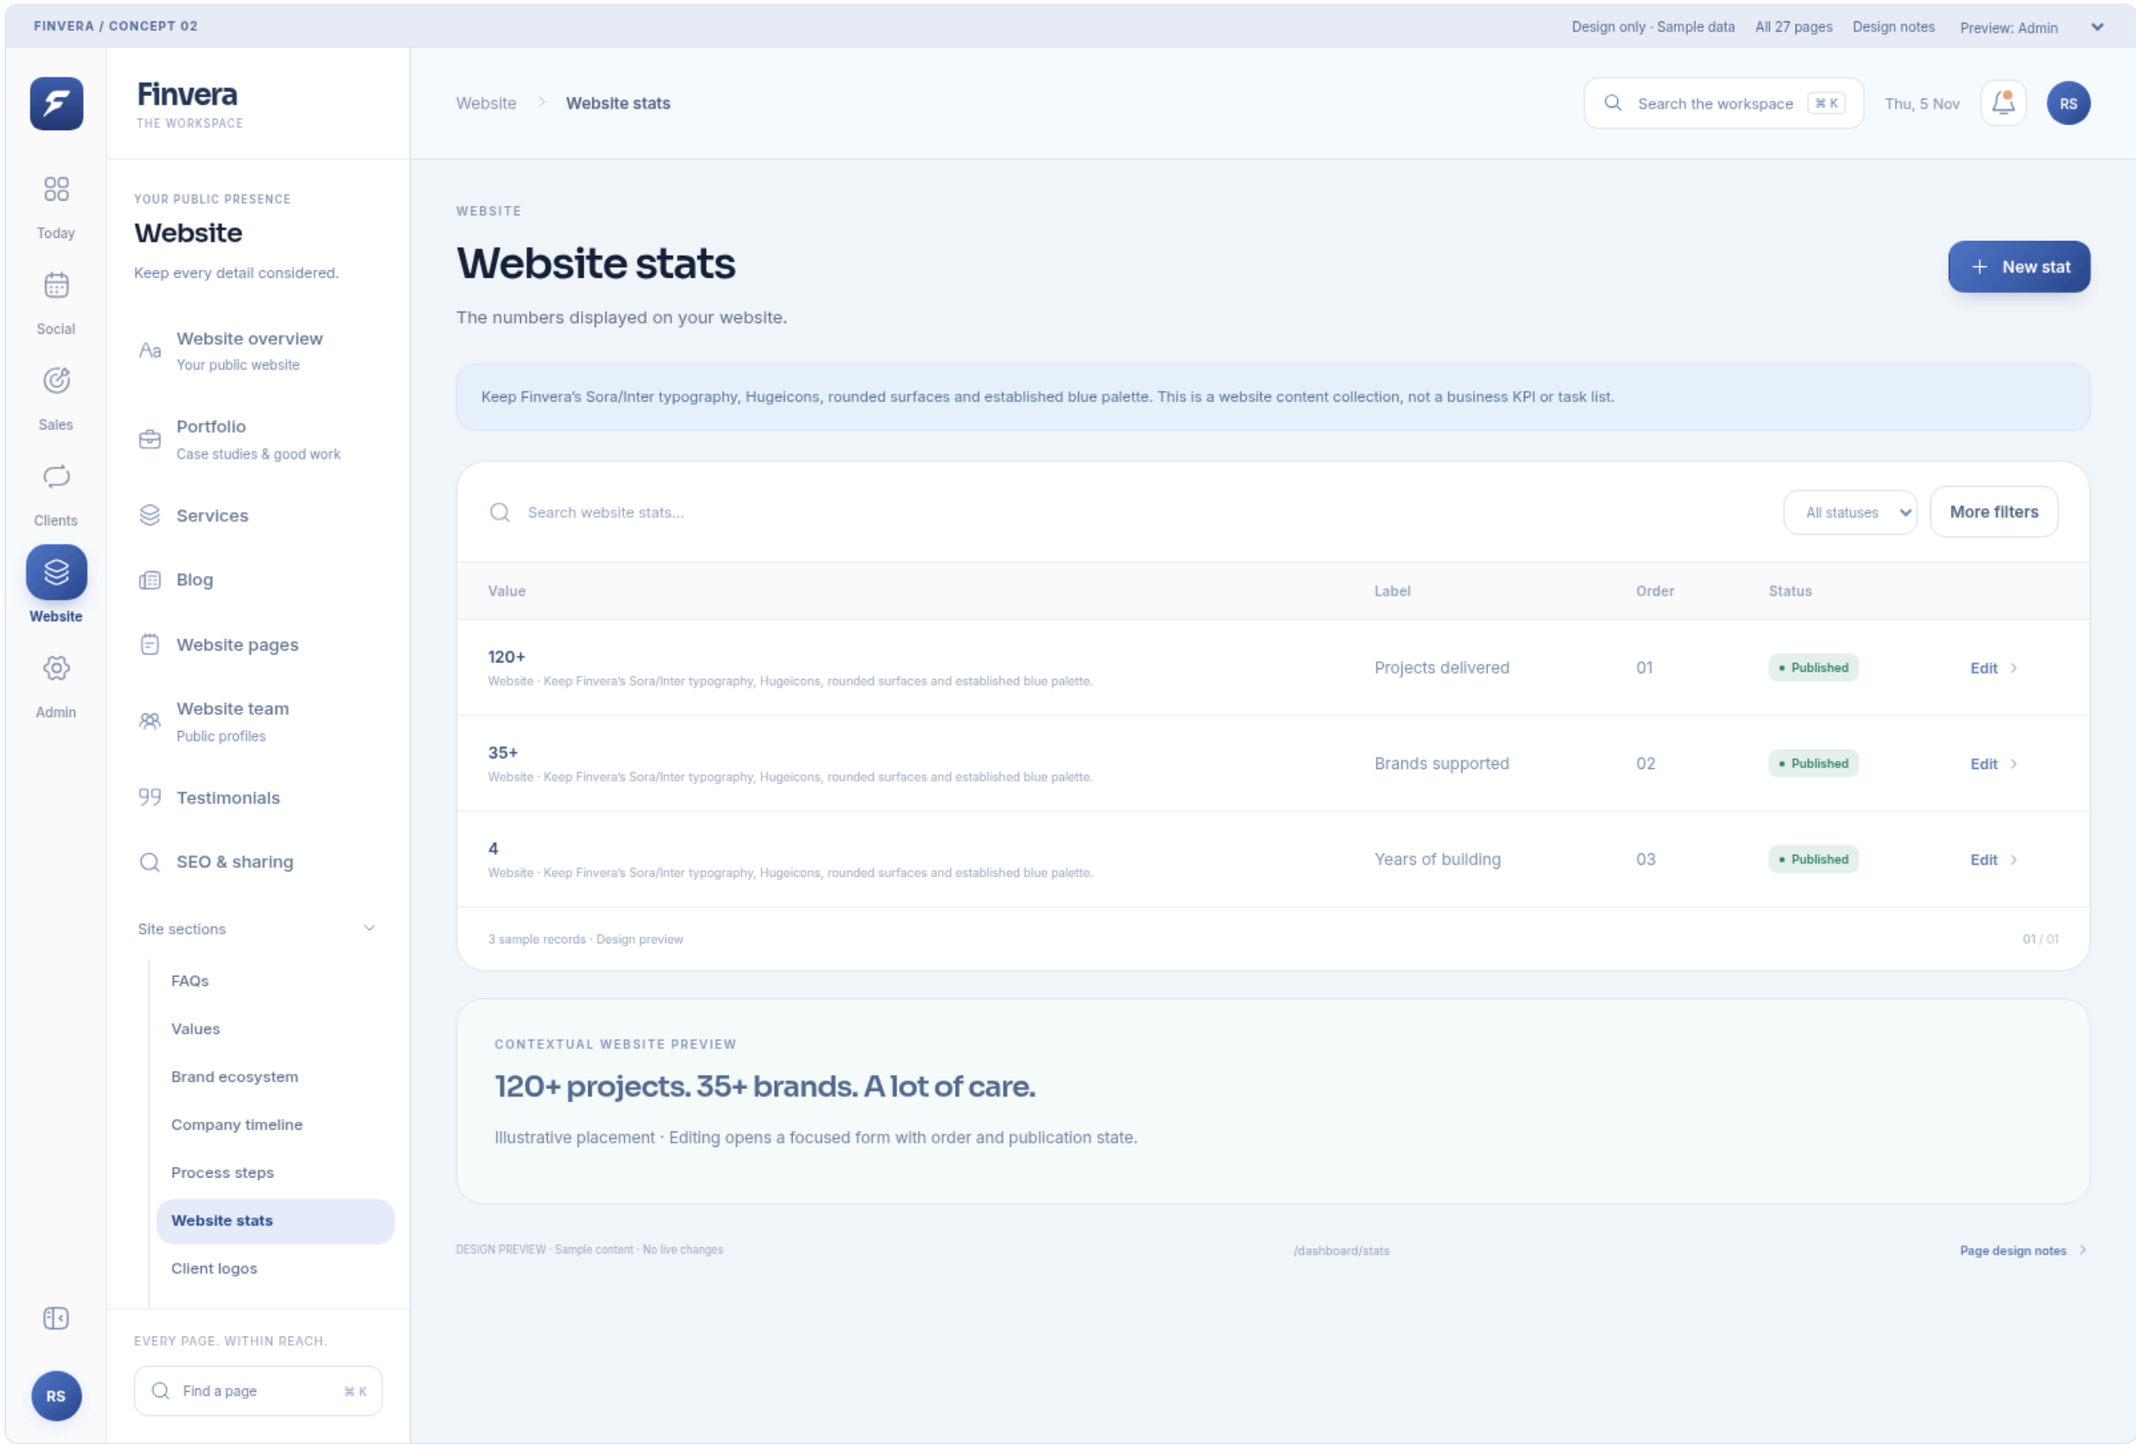

Public placement: Home & Services. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Website stats

Website · /dashboard/stats

DESIGN ONLY · SAMPLE DATA

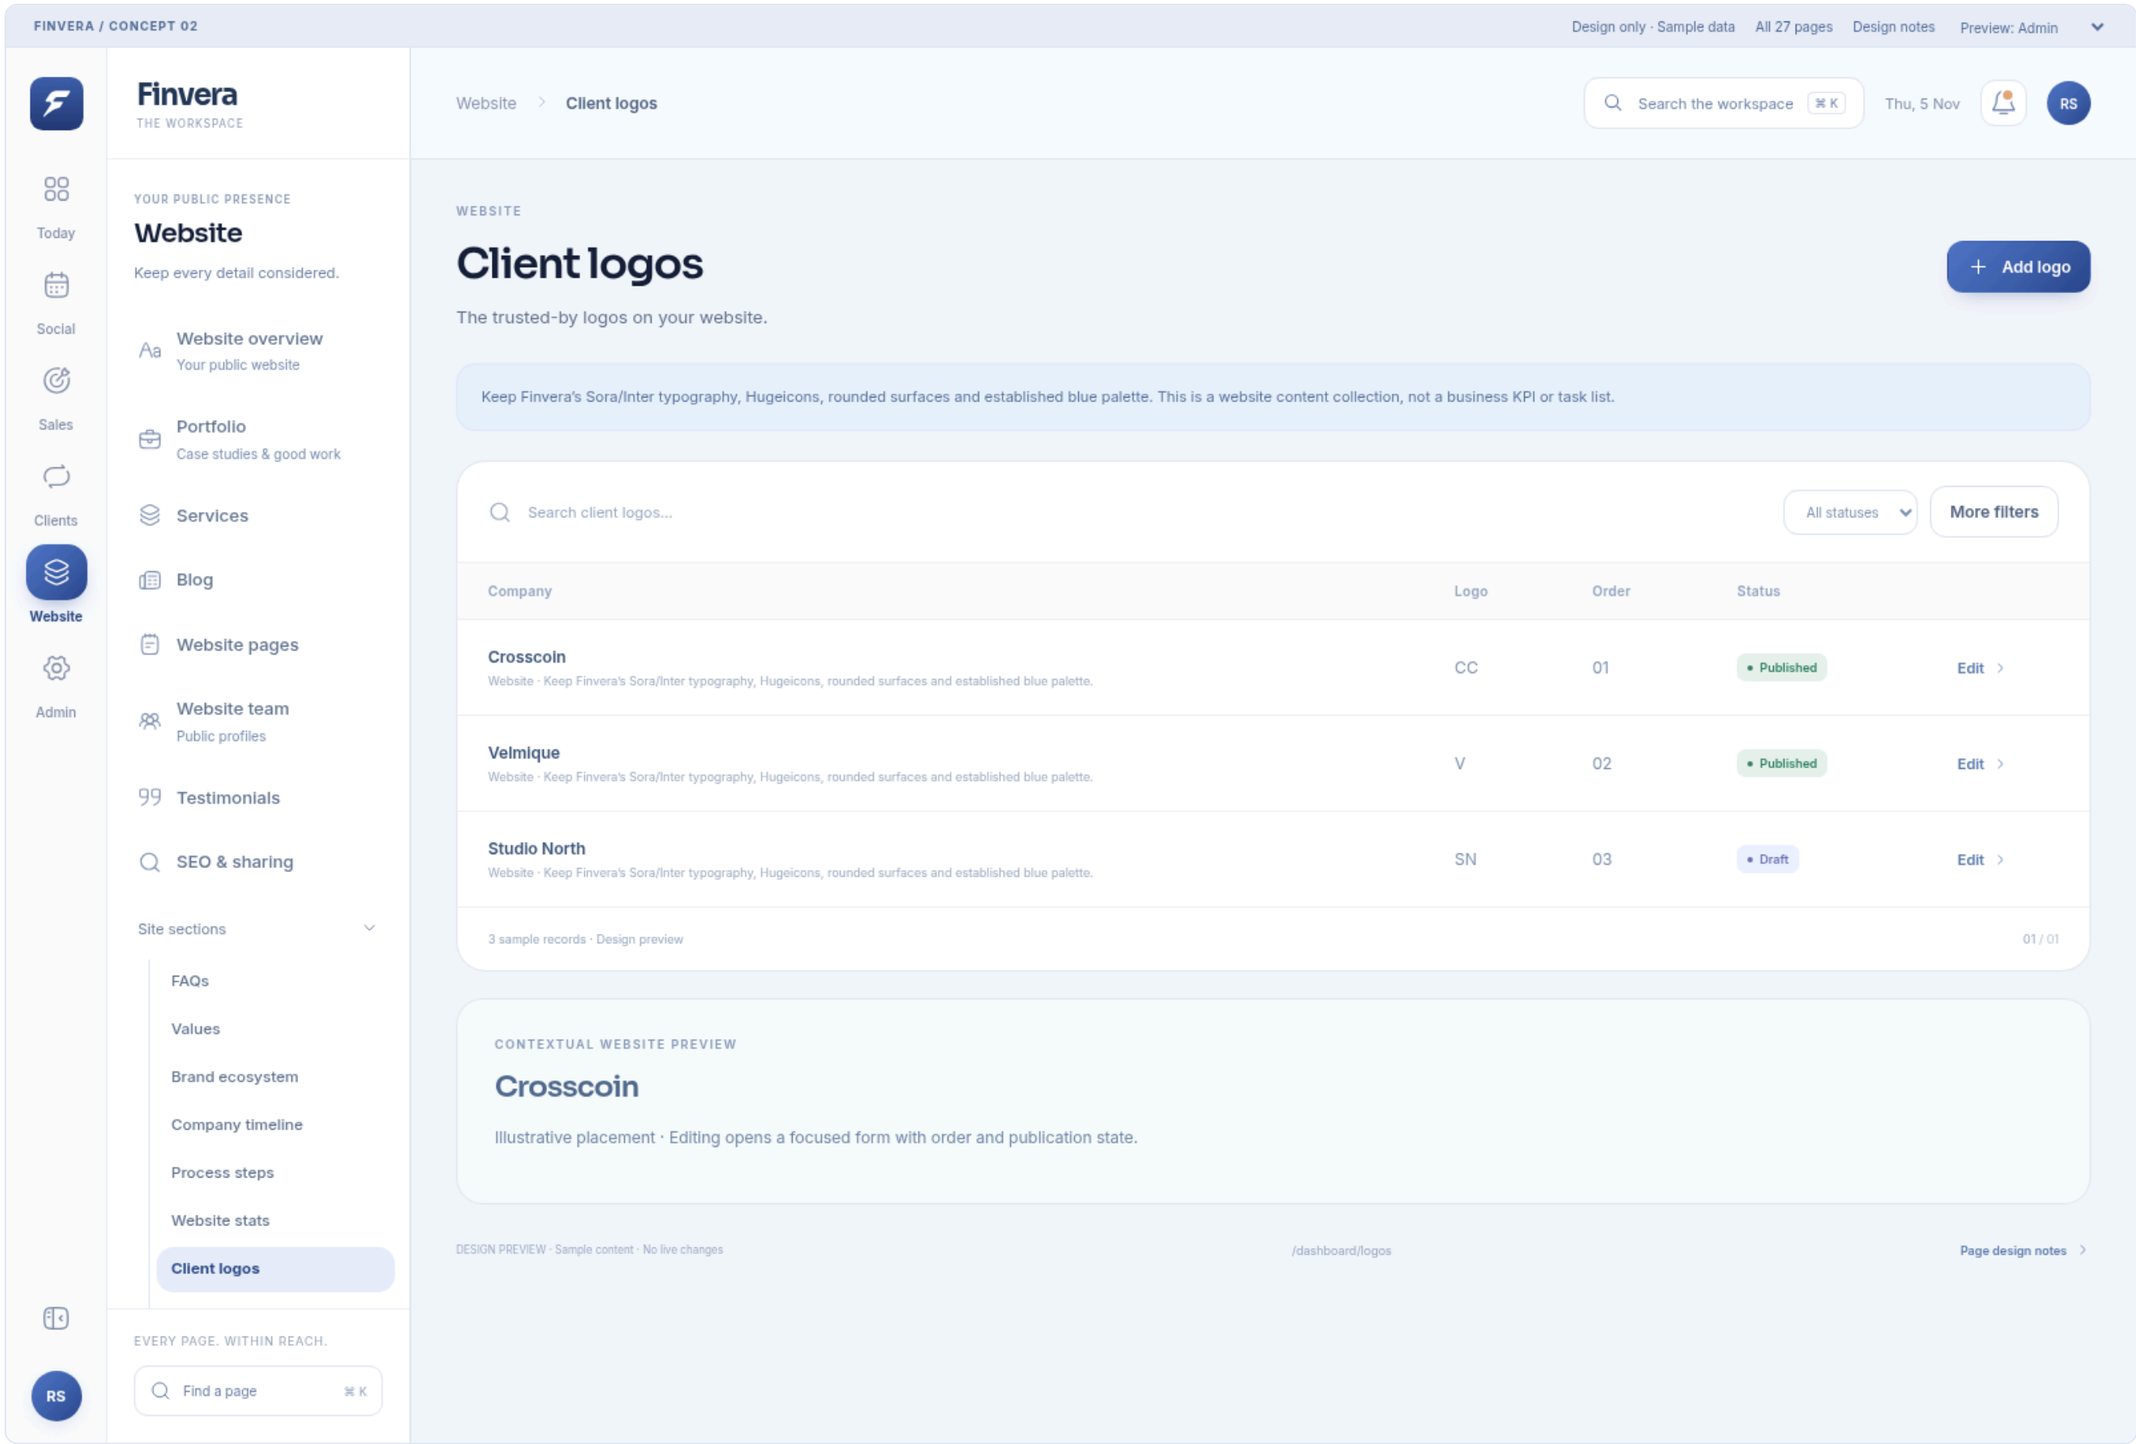

Public placement: Home page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Client logos

Website · /dashboard/logos

DESIGN ONLY · SAMPLE DATA

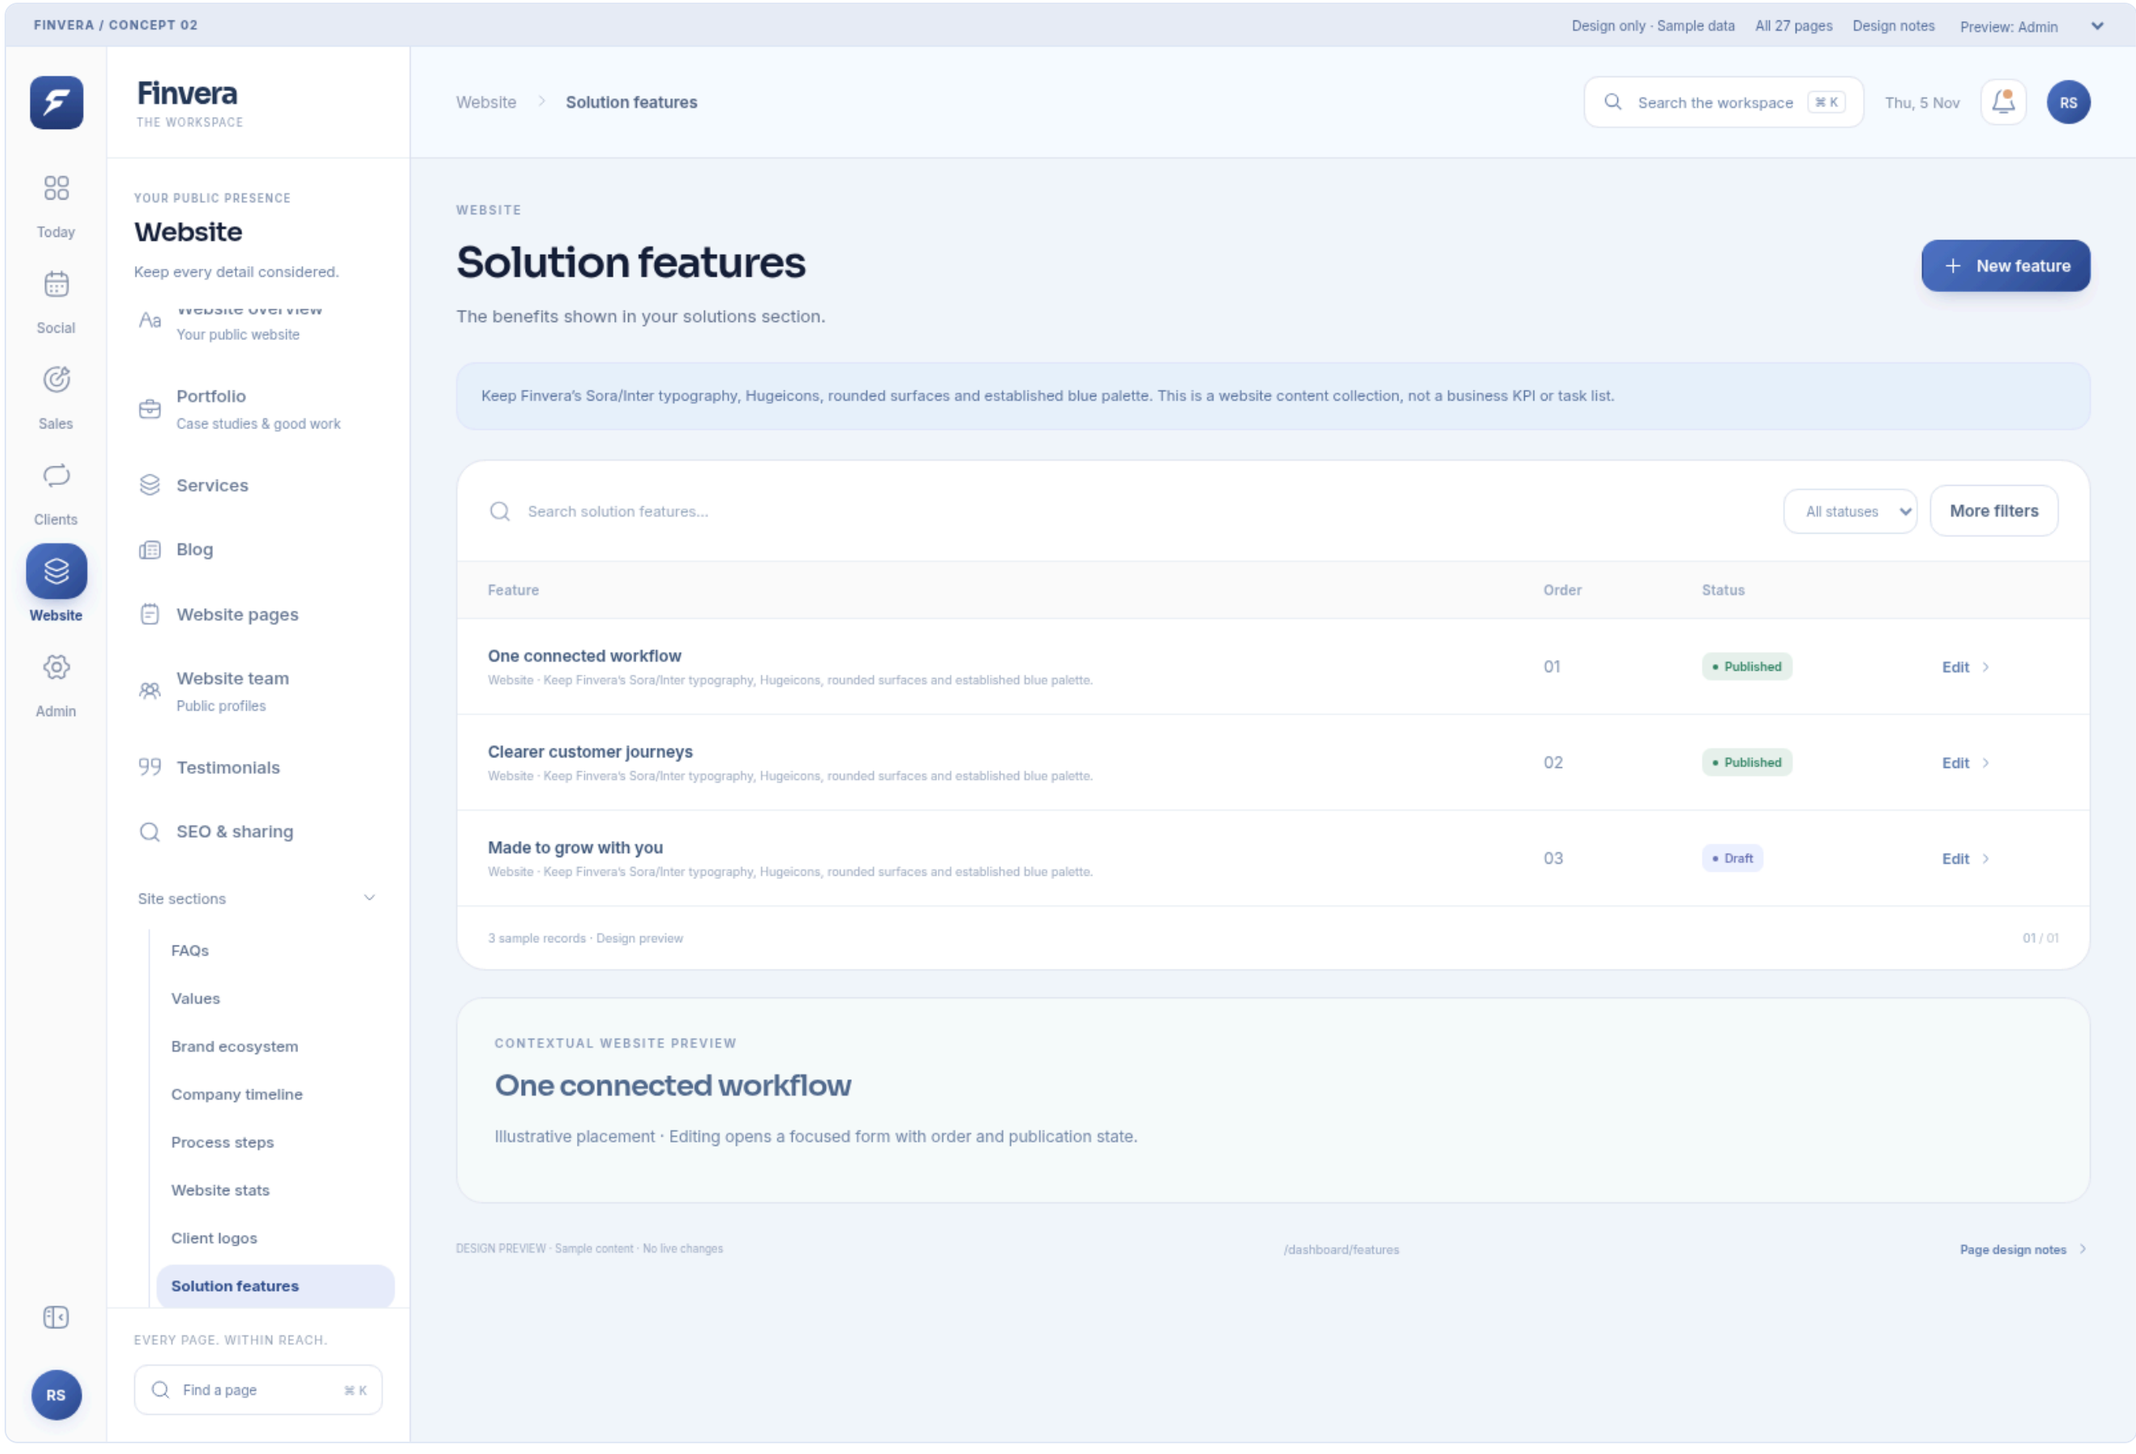

Public placement: Home page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

Solution features

Website · /dashboard/features

DESIGN ONLY · SAMPLE DATA

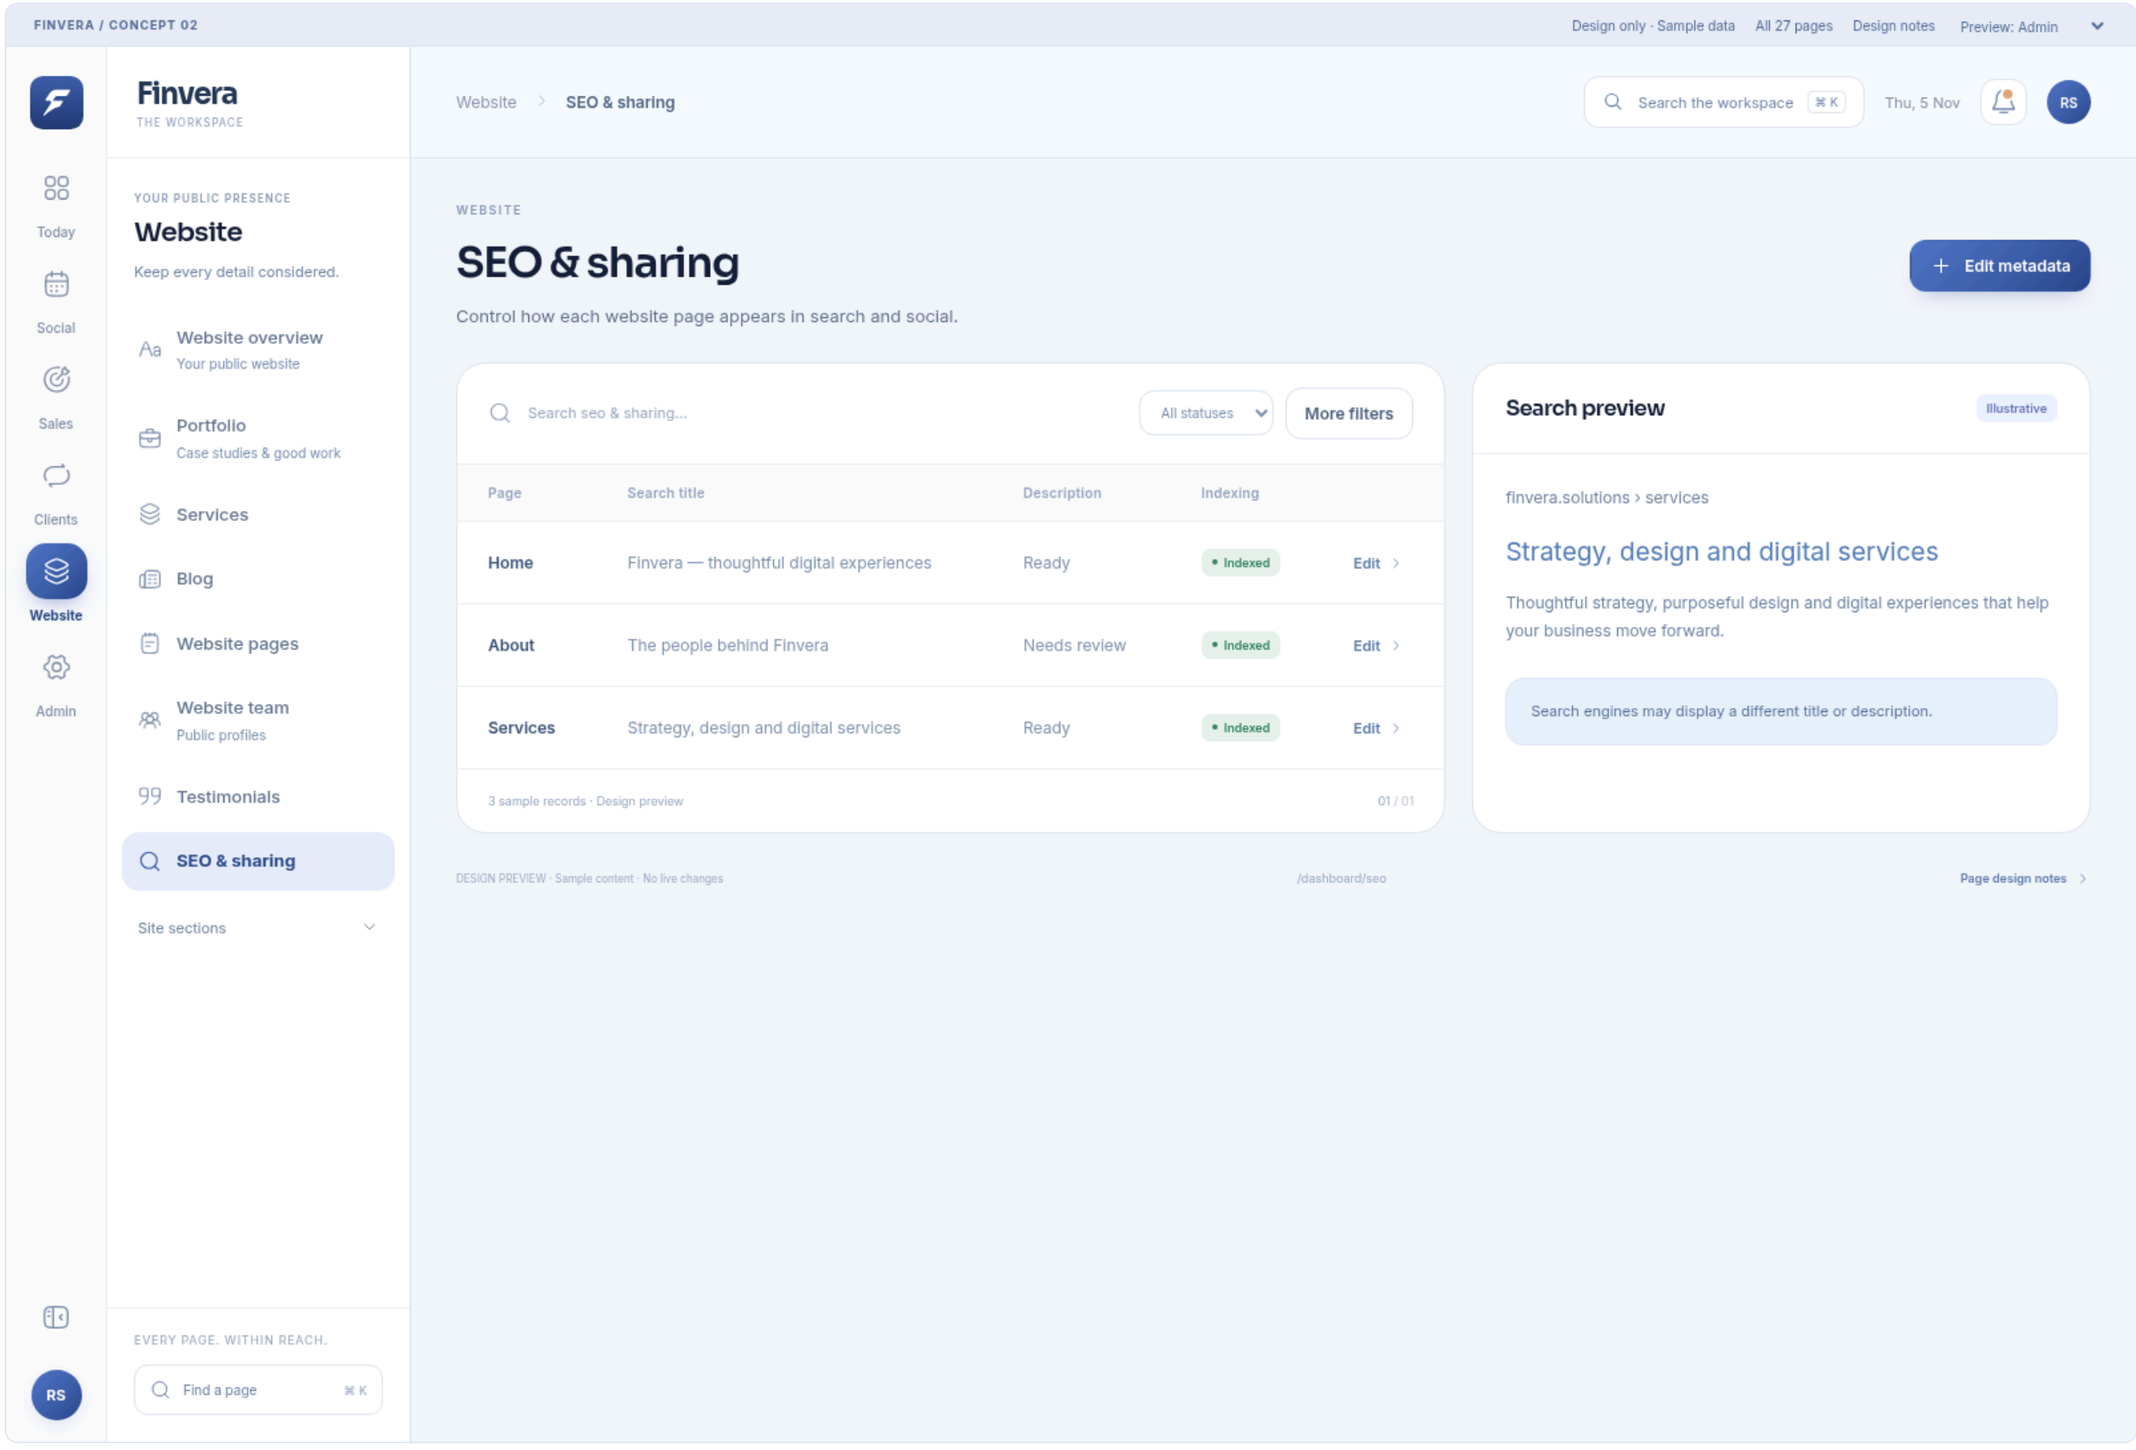

Public placement: Home page. · Use an ordered collection with a contextual preview, not another large dashboard. · Reachable from Website → Site sections, search and the Website overview.

SEO & sharing

Website · /dashboard/seo

DESIGN ONLY · SAMPLE DATA

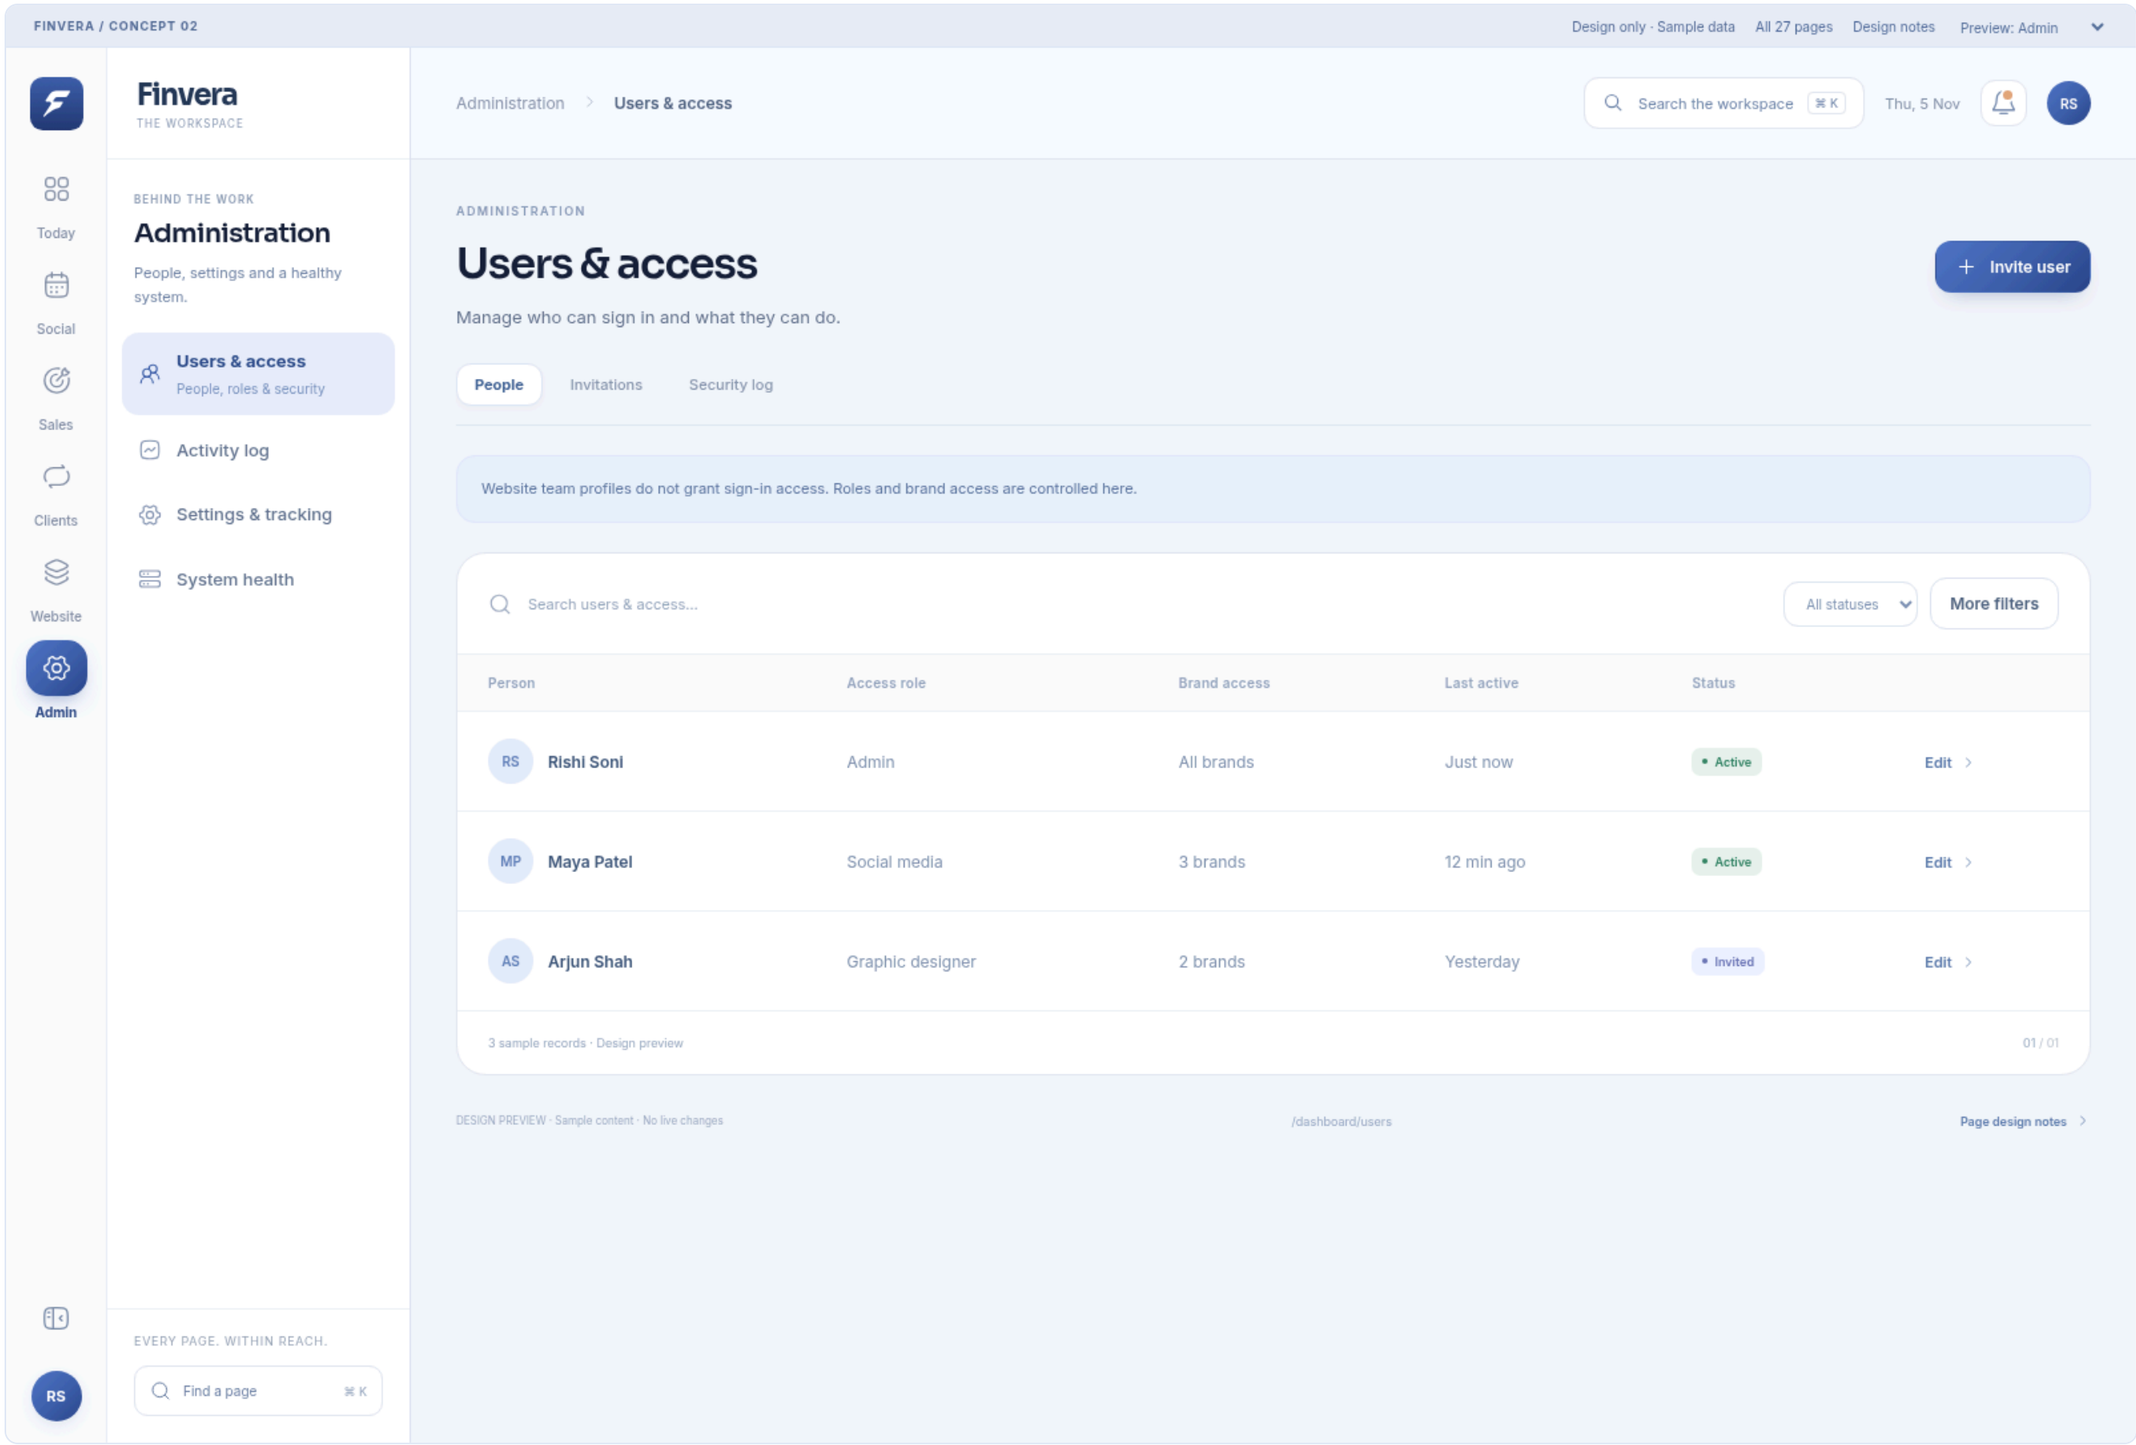

Group SEO with website work, while preserving the SEO role gate. · Show search and social previews beside metadata fields. · A preview is illustrative, not a promise of search-engine appearance.

Users & access

Administration · /dashboard/users

DESIGN ONLY · SAMPLE DATA

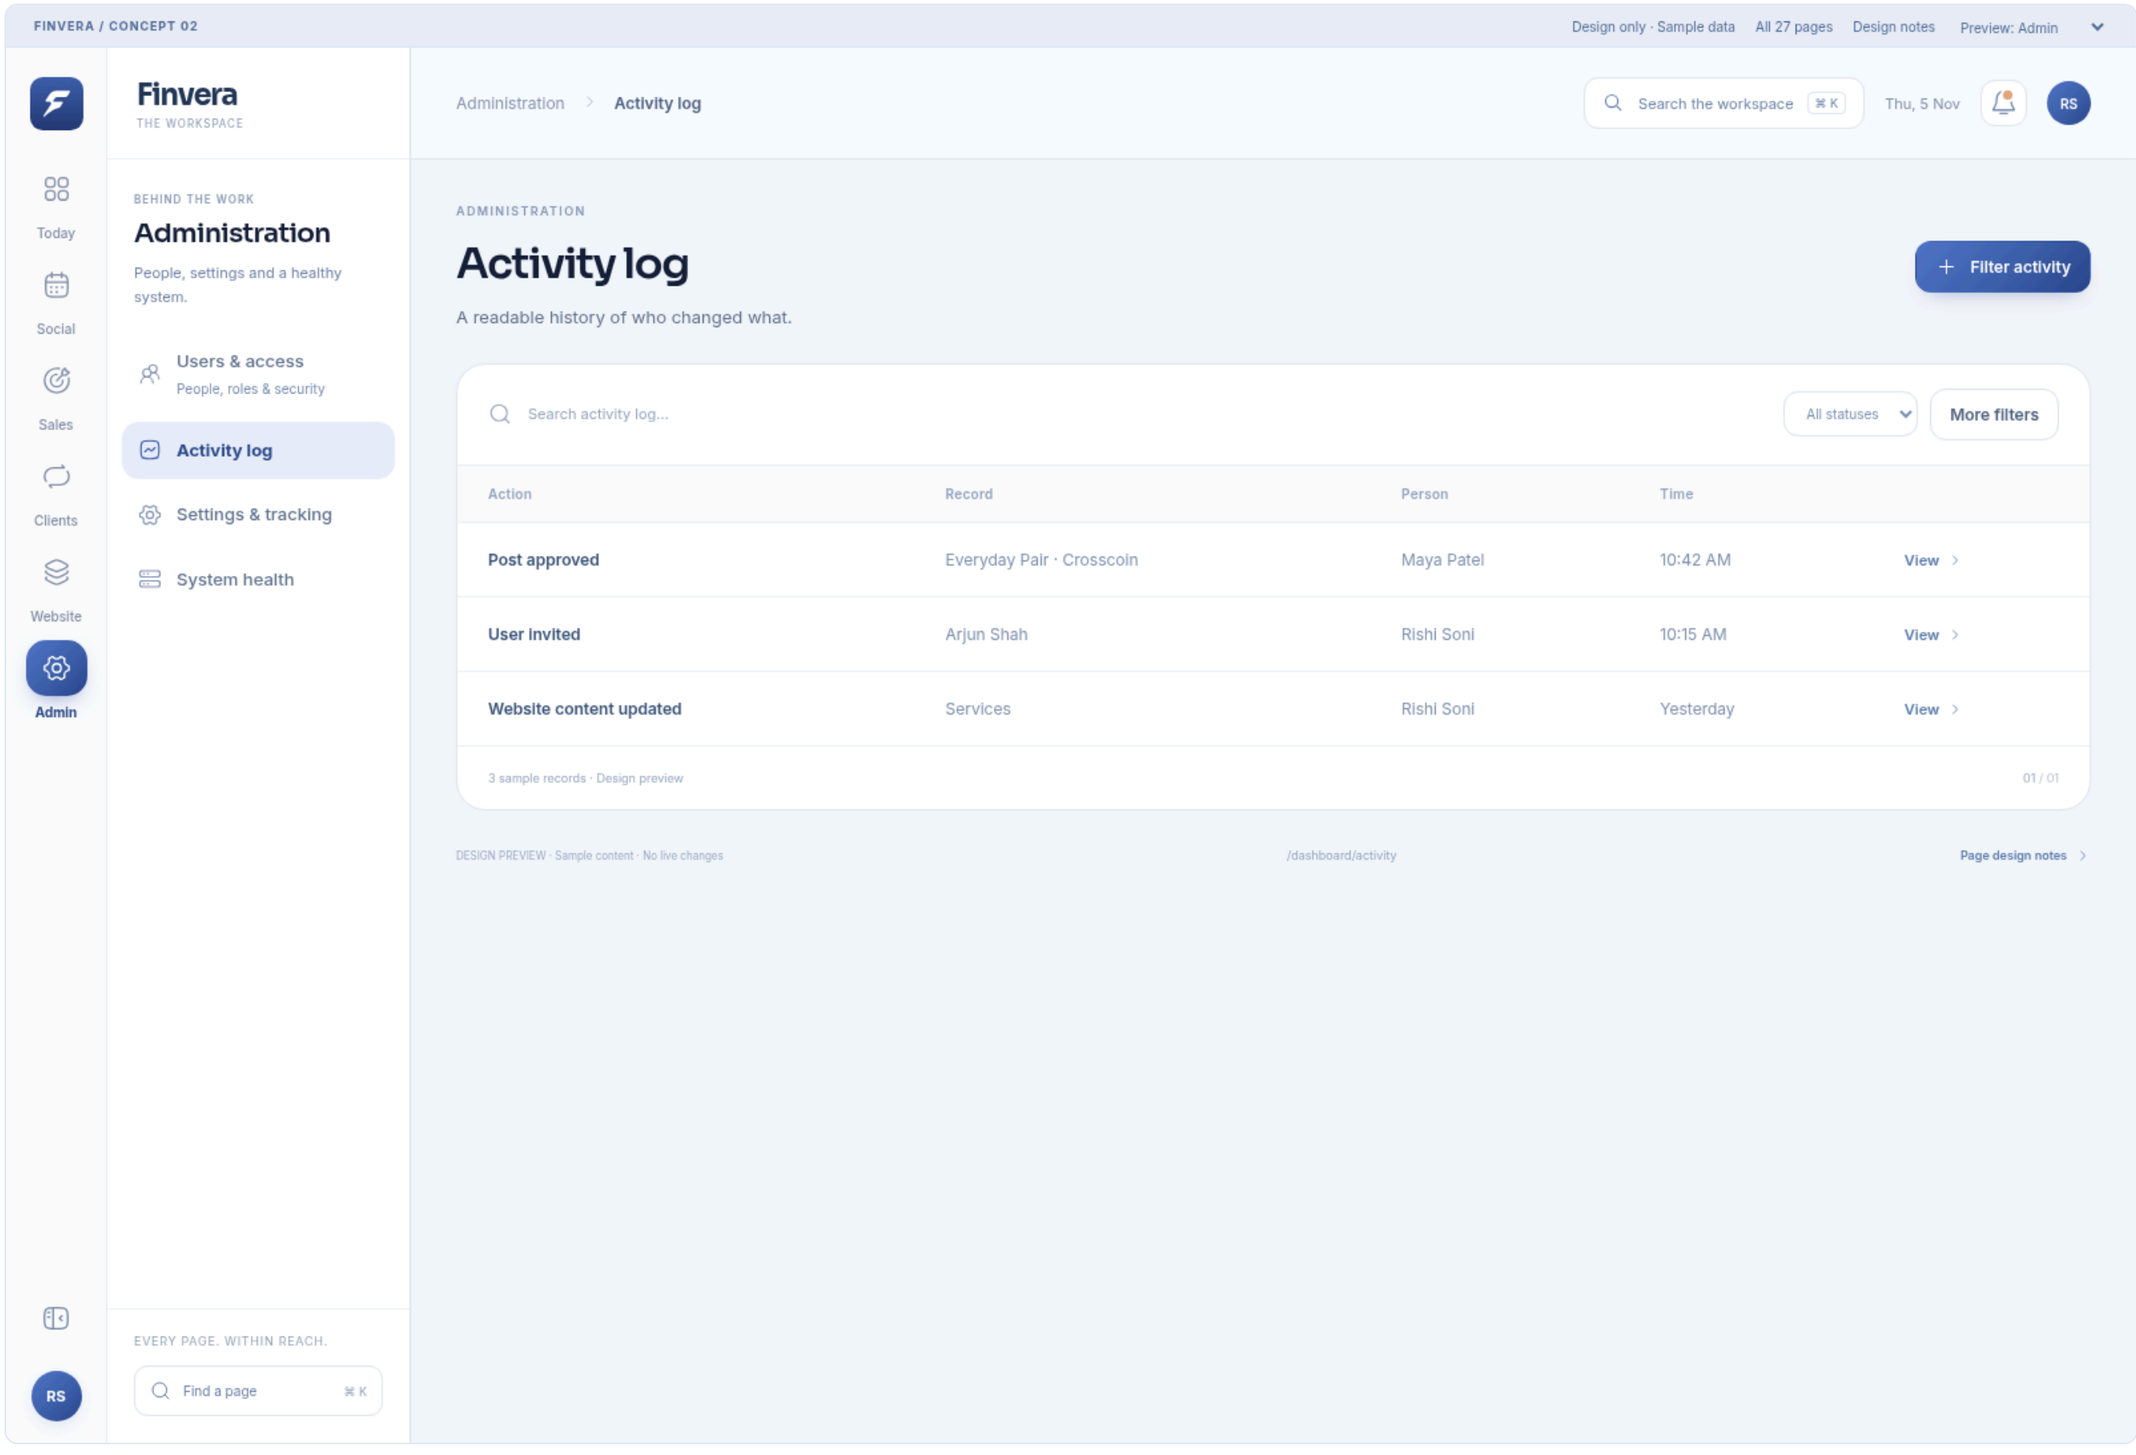

Keep authentication users clearly separate from Website team. · Access, invitations and security events have distinct tabs. · Role previews must not grant access or replace backend checks.

Activity log

Administration · /dashboard/activity

DESIGN ONLY · SAMPLE DATA

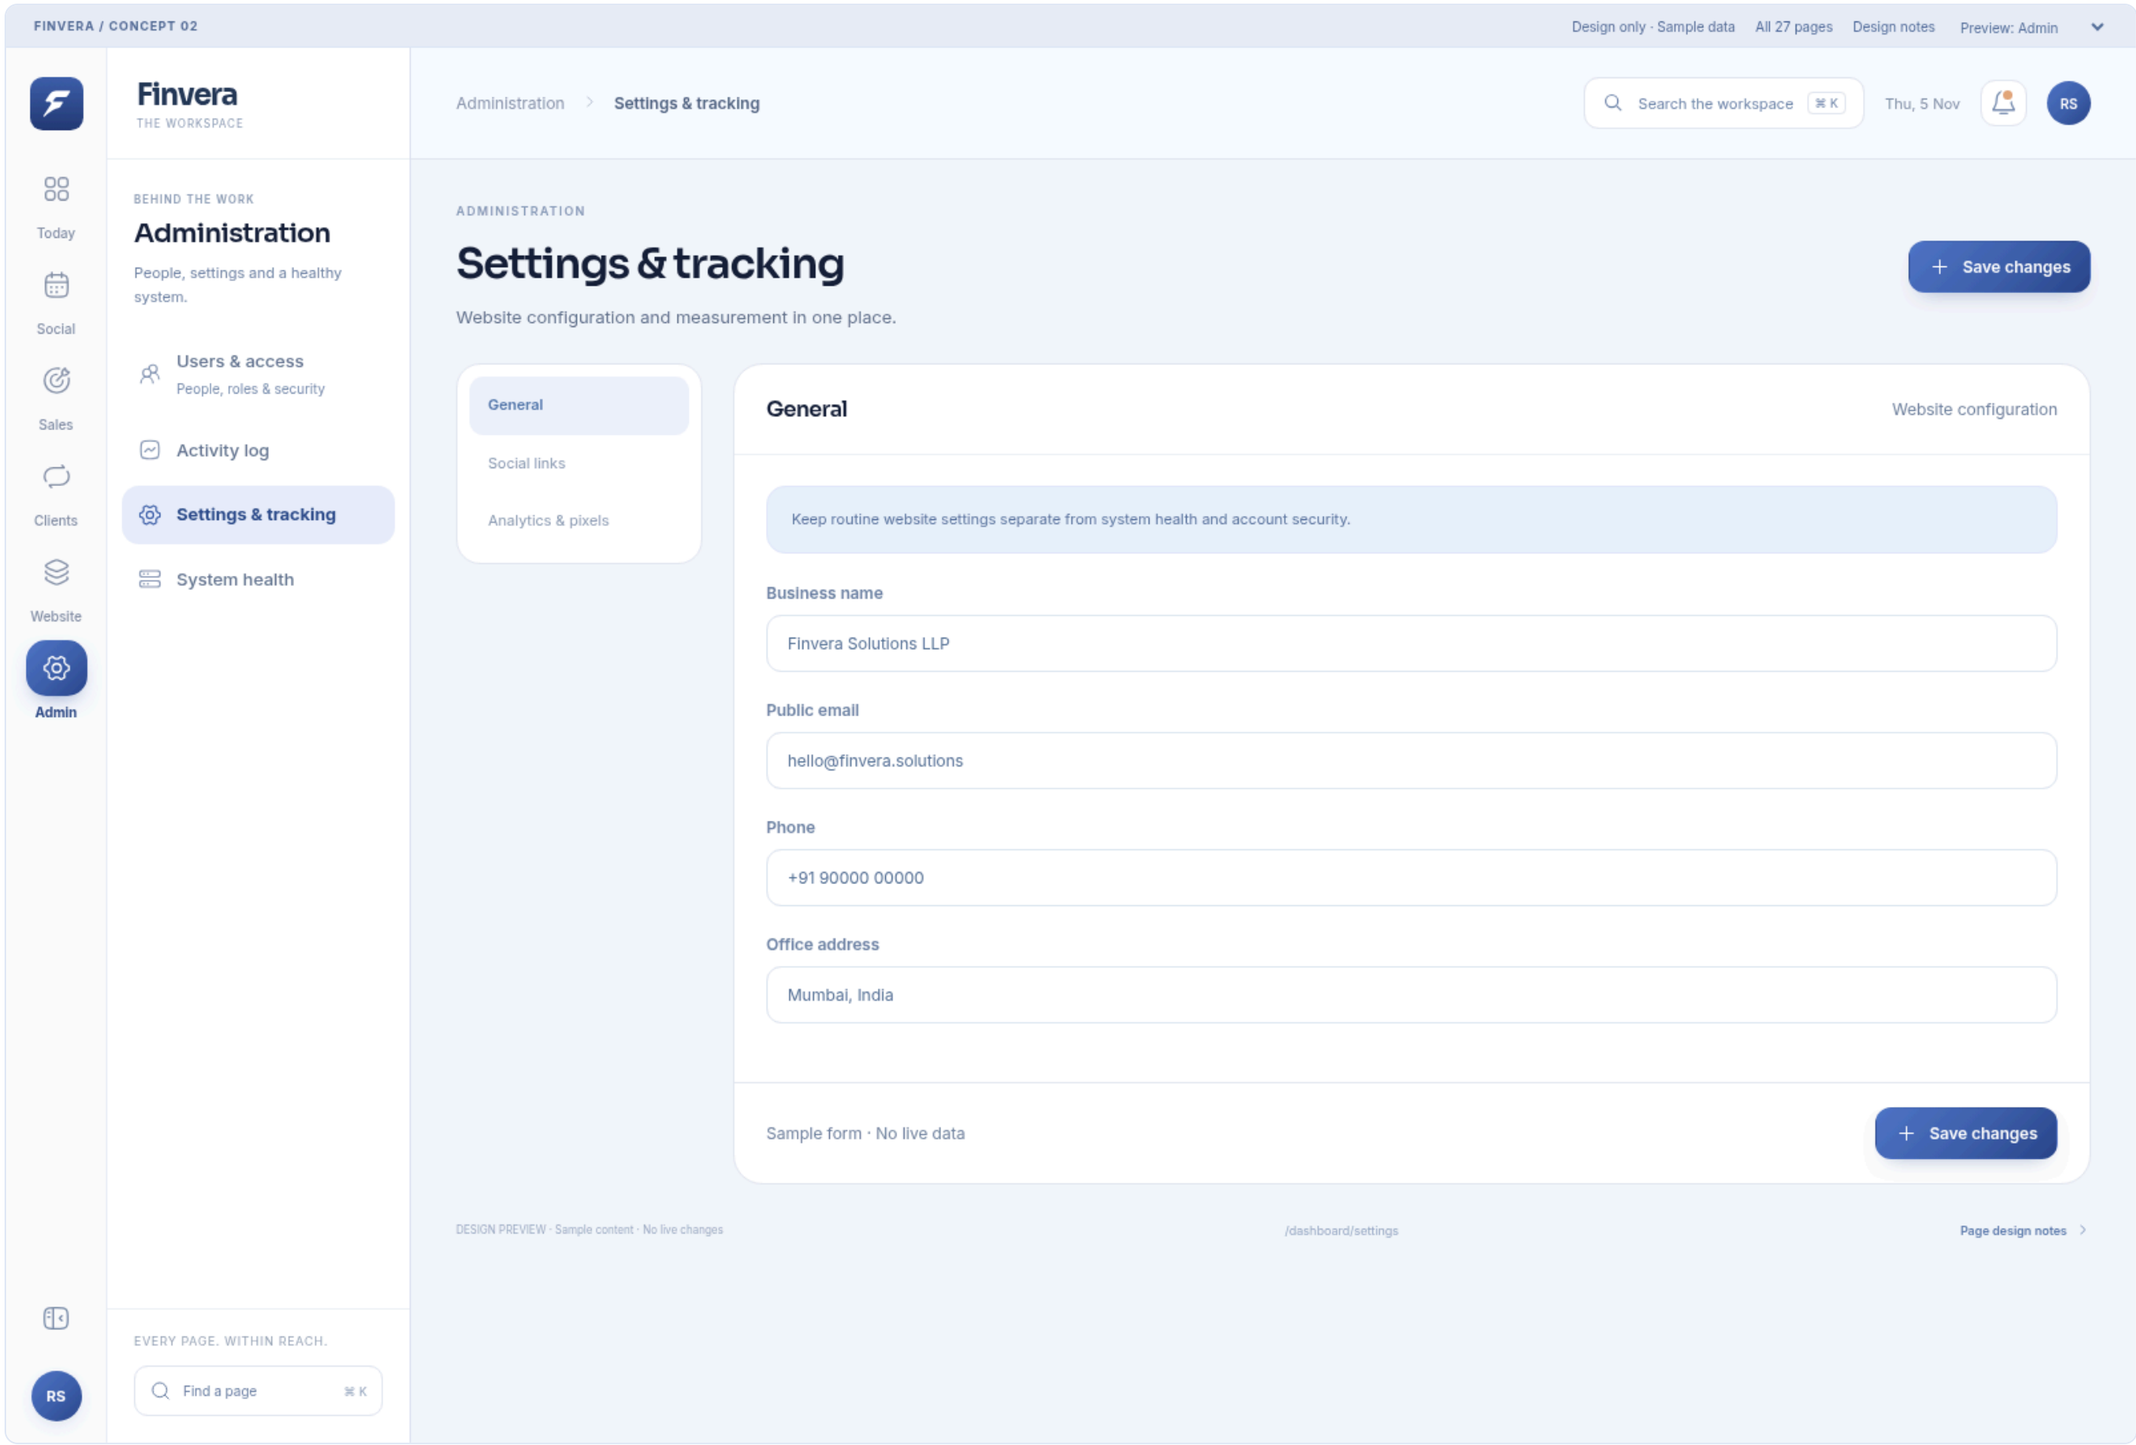

Read-only audit trail; do not add a fake create/edit action. · Filters for person, entity, action and date sit above one chronological list.

Settings & tracking

Administration · /dashboard/settings

DESIGN ONLY · SAMPLE DATA

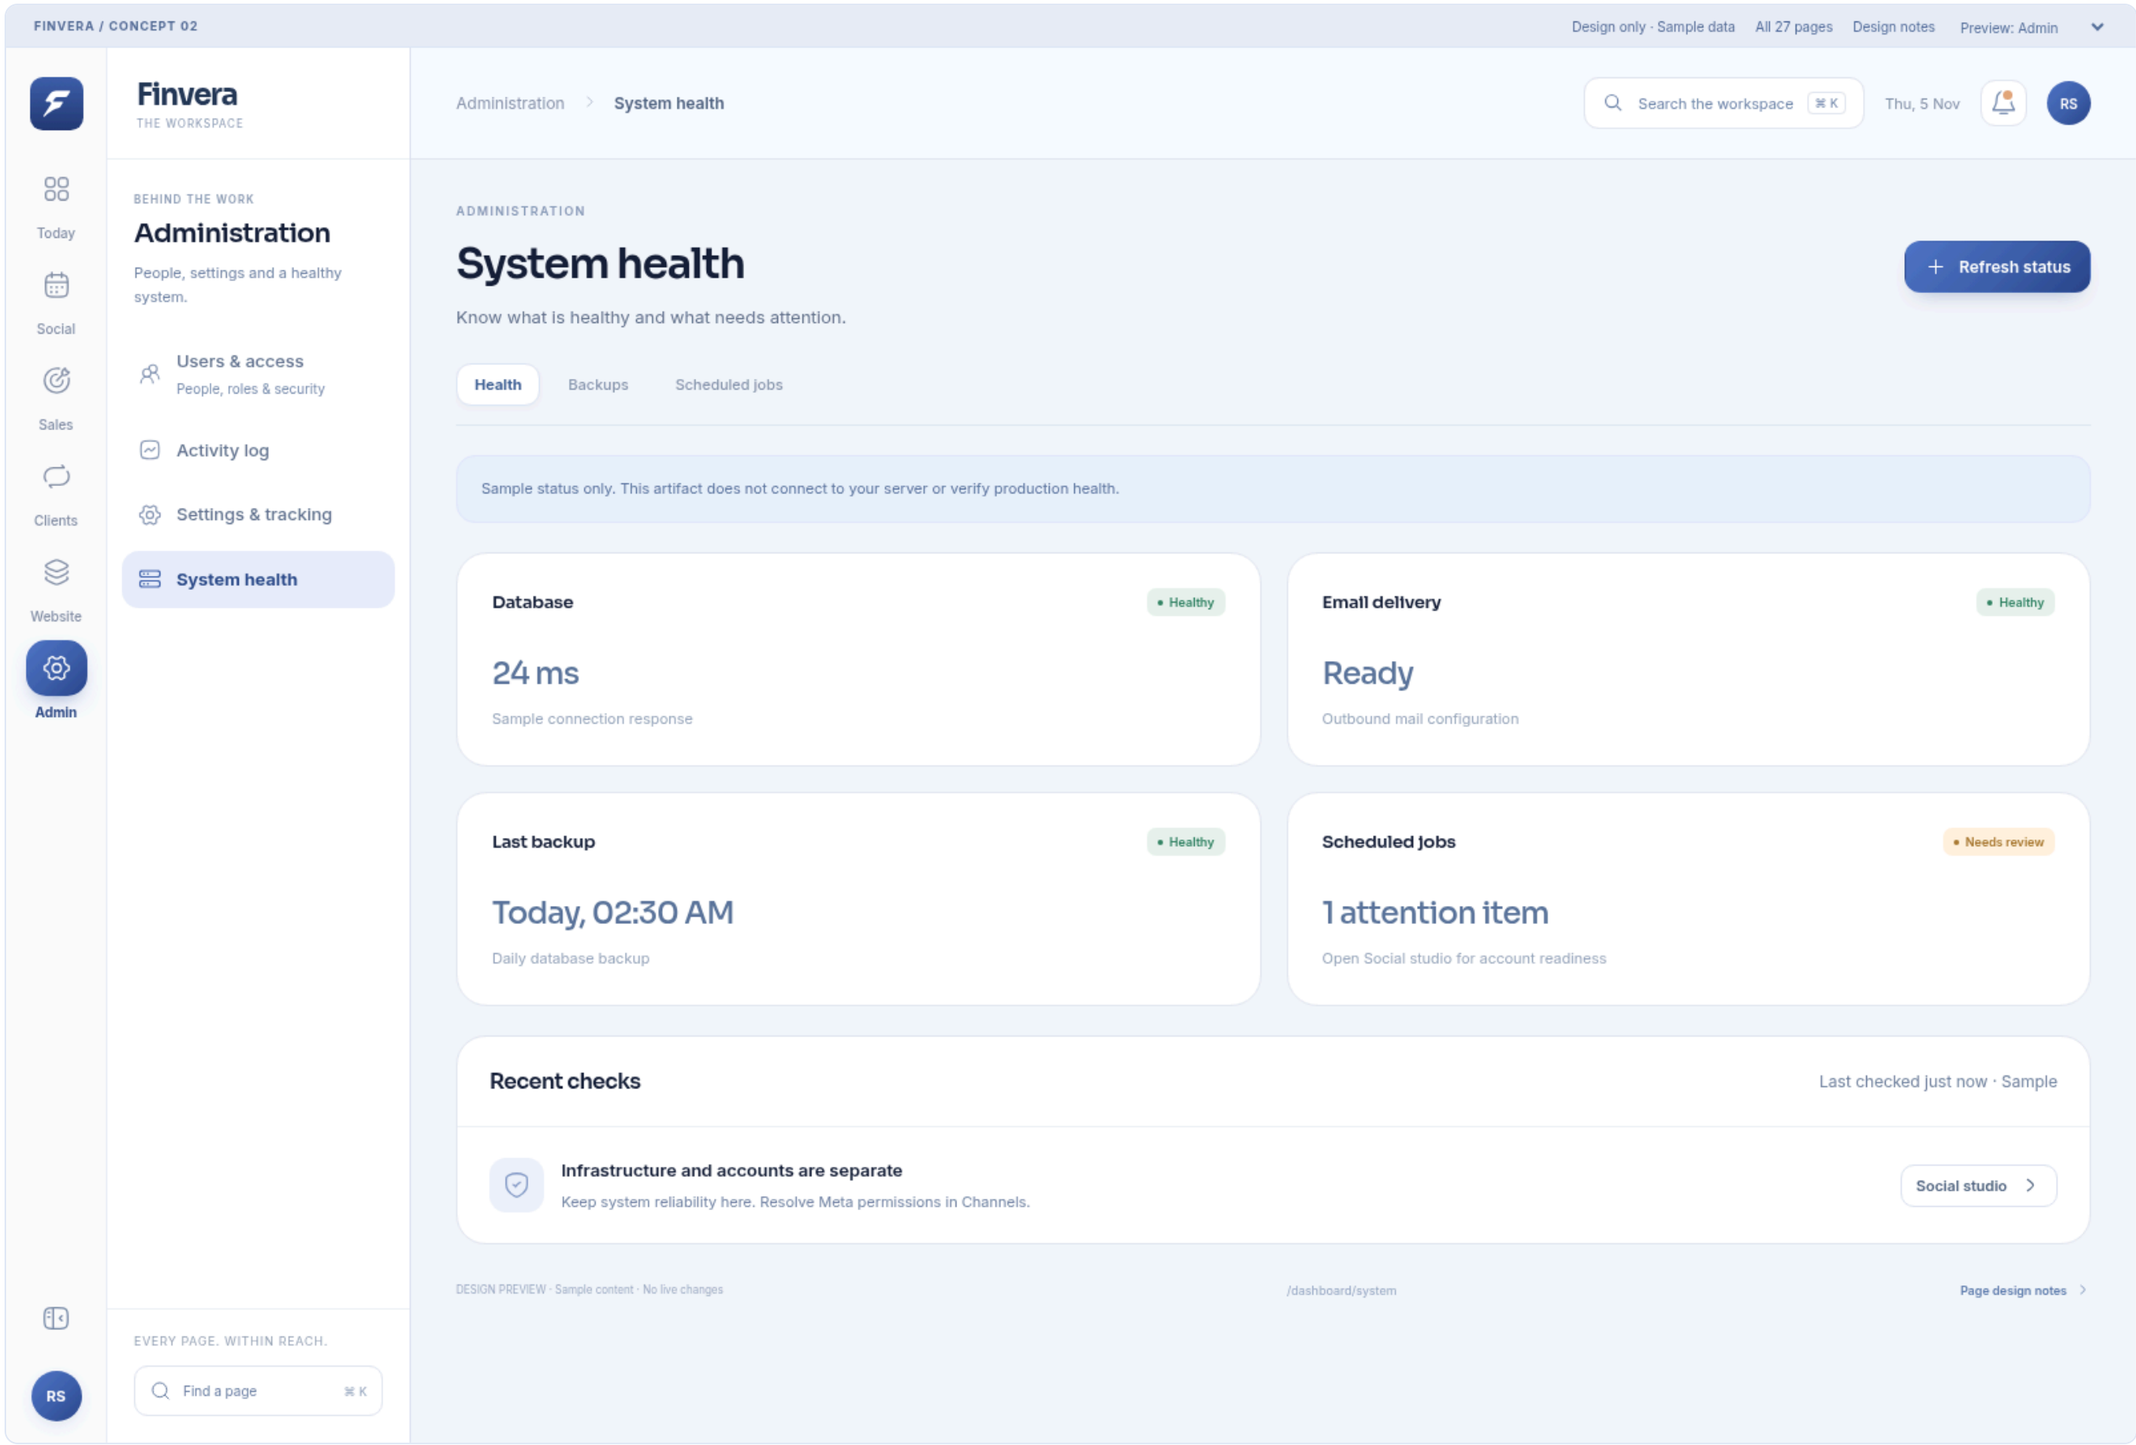

Retain General, Social links and Analytics & pixels settings. · Keep account connections in Social studio and infrastructure in System. · One save bar with unsaved-state feedback; no repeated save buttons.

System health

Administration · /dashboard/system

DESIGN ONLY · SAMPLE DATA

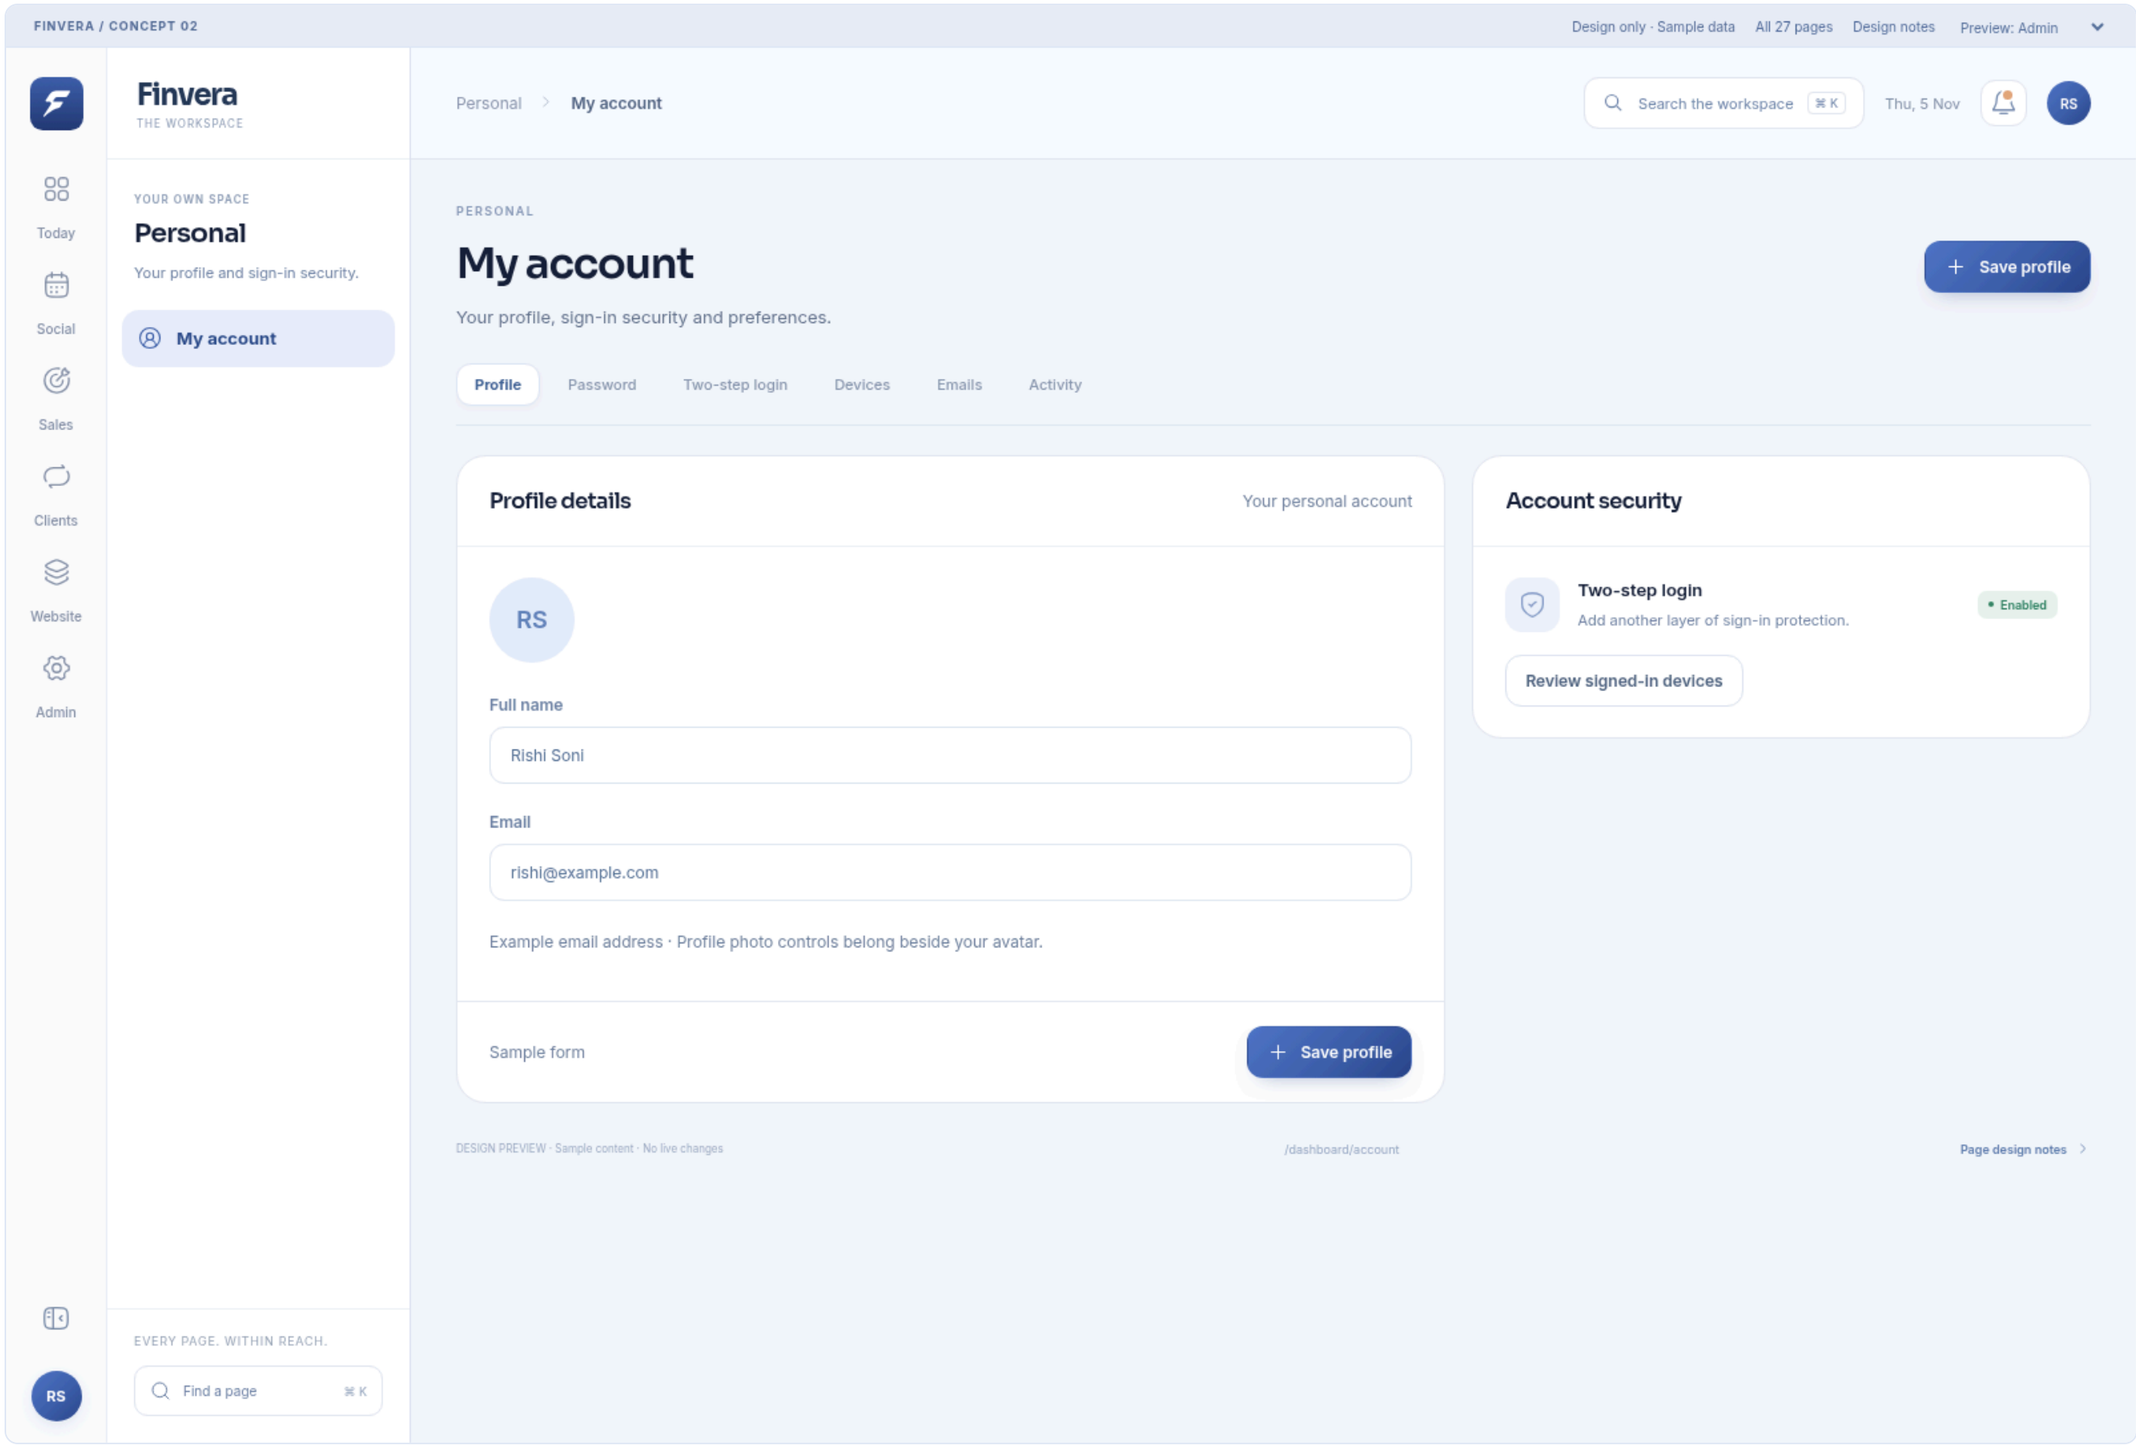

Health cards for database, email, backups and scheduled jobs. · Meta account issues link to Social studio instead of duplicating its controls. · Show last checked time and distinguish unknown from healthy.

My account

Personal · /dashboard/account

DESIGN ONLY · SAMPLE DATA

Pin My account in the sidebar footer, outside business navigation. · Preserve all six account sections. · Show security actions in their own section, away from routine profile edits.
